WALHALLA, S. C.:

WEDNESDAY, MARCH 18, 1914.

REV. W. D. GALLOWAY DEAD.

Passed Away March 6th After Stroke of Paralysis.

Pine Mountain, Ga., March 14.—Special: There are many friends in Rabun county, Georgia, and Oconee county, South Carolina, who will learn with deep regret of the death of Rev. W. D. Galloway, which occurred at his home near Pine Mountain, Ga., on March 6, 1914, at 10 o'clock a. m., after suffering a stroke of paralysis. He had been in bad health for several years.

Rev. Mr. Galloway was 62 years, 6 months, 1 day old, and is survived by his wife, Elizabeth Galloway. He had been a member of the Methodist Conference about 25 years and was a faithful worker for the Lord. He was a kind and affectionate husband and good neighbor.

Like the aroma of sweet flowers was his presence and deep indeed is the wound made in the hearts of the loved ones left behind. But "the Lord giveth and the Lord taketh away." May those who are left behind all meet him in the realms of glory.

His remains were laid to rest at the Rogers cemetery on Sunday, March 8. Funeral services were conducted by Rev. S. J. Eller, who was sent to this community by the Baptist State Board.

PEEVISH, CONSTIPATED CHILDREN LOVE "CALIFORNIA SYRUP OF FIGS."

Harmless "Fruit Laxative" Cleanses Stomach, Liver and Bowels.

Look at the tongue, mother! If coated, it is a sure sign that your little one's stomach, liver and bowels need a gentle, thorough cleansing at once.

When peevish, cross, listless, pale, doesn't sleep, eat or act naturally, or is feverish, stomach sour, breath bad, has stomach ache, sore throat, diarrhoea, full of cold, gives a teaspoonful of "California Syrup of Figs," and in just a few hours all the foul, constipated waste, undigested food and sour bile gently moves out of its little bowels and you have a well, playful child again.

You needn't coax sick children to take this harmless fruit laxative. They love its delicious taste and it always makes them feel splendid.

Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which has directions for babies, children of all ages, and for grown-ups plainly on each bottle. Beware of counterfeits sold here. Get the genuine, made by "California Fig Syrup Company." Refuse any other kind with contempt. adv.

Another Killing in Greenville.

Greenville, March 12.—Emmet Walker, aged 22 years, member of a very prominent family, and prominent socially himself, was shot and instantly killed this morning by G. W. Tidwell, of Clinton, aged 52.

The killing occurred in the office of the Carolina mill, this city, where Walker was employed as clerk. Tidwell claims Walker had been too intimate with his daughter.

Surrendered to Officers.

Mr. Tidwell gave out a statement this afternoon, in which he stated that he killed Walker because he and another young man had ruined his home. He said both his wife and daughter were involved.

Mrs. Tidwell and the girl were arrested here last week in a questionable house, it is said. Tidwell, hearing of the affair, it seems, came here to look for the men he claimed were responsible for their going wrong. Tidwell drove from the mill to the sheriff's office and gave himself up.

DECIDE YOURSELF.

The Opportunity is Here, Backed by Walhalla Testimony.

Don't take our word for it. Don't depend on a stranger's statement.

Read Walhalla endorsement. Read the statements of Walhalla citizens.

And decide for yourself. Here is one case of it.

J. B. Hughes, railroad engineer, Faculty Hill, Walhalla, S. C., says: "For many years I worked on a locomotive and the constant jarring weakened my kidneys. I had soreness in the small of my back and through my shoulders. I felt miserable in every way. As soon as I began taking Doan's Kidney Pills, progressed at Dr. Bell's drug store, I was relieved. It was not long before my health improved. I do not think there is another medicine like them. I have publicly recommended Doan's Kidney Pills before, and I am pleased to say I haven't had any kidney trouble since."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's— and take no other. adv.

ON THE FARM.
(Progressive Farmer.)

Poor Land and Fertilizers.)

(By W. F. Massey.)

My land is a sandy, gray soil and will not make over 20 bushels of corn or 150 pounds of lint cotton without fertilizing. I want to use one ton an acre of yard and stable manure in the furrow, as I have not enough to spread broadcast. I want to mix a fertilizer that will run about three per cent ammonia, ten per cent phosphoric acid and five per cent potash for cotton and corn. Please suggest formula.

You can come close enough to what you want by mixing 1,200 pounds of acid phosphate, 600 pounds of tankage and 200 pounds of muriate of potash to make a ton.

It will pay to use this liberally on cotton, both in the drill and down the middles, half and half, for cotton roots run far and wide. It will increase the corn crop, and the increase will cost about all it is worth. You cannot make corn cheaply by depending on a commercial fertilizer mixture. The best way to make corn profitably is to run the farm in a rotation that will give you a crimson clover winter cover to turn for corn. Then grow plenty of pea vine hay and feed it to stock and get more manure, so that you can give the clover a cover of manure in the winter, and this and the clover turned under will make more corn than any fertilizer you can put on poor land. If your land is poor, and you own it only for a few years, whose fault is it that it keeps poor? Gambling with fertilizers will never make it rich, while with good farming you can get it into a high state of fertility and productivity. I would like to live long enough for farmers to be ashamed to say that the land they have owned for years is poor.

As to "Sour" Soils.

(By Tait Butler.)

A Florida reader writes as follows: "I have read your article on plowing under legumes in your issue of December 6. Many farmers are afraid to plow under legumes, for fear of souring the land and they advise me not to do it. Will you discuss this subject as applied to Central Florida, if we are governed by special rules or conditions."

Since the writer's boyhood days he has heard much of this fancied or real danger of "souring" land by plowing under legumes; but he has never seen much of it. It seems to be one of those things about which we hear much and see little. We sincerely wish every farmer in the South might have to run the risk of "souring" his land by plowing under legumes at all seasons of the year. We fancy there is little "sour" land in the South from this cause and very little "sour" or otherwise that has ever been injured by this sort of treatment.

We have "sour" soils in the South, but much more of this land is "sour" because of insufficient drainage, long, clean cultivation and a low lime content than because of the plowing under of legume crops. It is also true that peaty soils are frequently "sour" from the decay, or partial decay, of an excess of vegetable matter; but the fear of making our worn soils "sour" by turning under legumes should be banished as one of the popular errors which sometimes prevent the land receiving that which it needs most to increase its fertility.

It is possible that the plowing under of a heavy crop of legumes, when the weather is hot and moist, might cause such rapid decay of the vegetable matter as to "sour" the soil, but even this is much more likely to be heard about than actually seen.

On most of our depleted soils there is only one time we would hesitate to plow under a crop of legumes, however heavy the crop might be. In dry weather, when the plowing under of the legumes is to be immediately followed by seeding to another crop, the large amount of vegetable matter plowed under may cause the soil to become too open and to dry out so much that the proper supply of moisture might not remain to supply the needs of the growing crop.

Since most of our soils are deficient in calcium carbonate (lime), it is possible, if we ever plow under enough legumes to supply the needed humus and nitrogen, we may need to apply lime to "sweeten" our soils, but since this is needed already in order to grow legumes to the best advantage, we advise our reader to plow under all the legumes practicable without fear of "souring" the land. As to when this should be done, we are of the opinion that it makes little difference, except in the case noted above; but it is perhaps always best to allow the legume crop to reach maturity that more vegetable matter may be plowed under.

Spring Blood and System Cleanser.

During the winter months impurities accumulate, your blood becomes impure and thick, your kidneys, liver and bowels fail to work, causing so-called "spring fever." You feel tired, weak and lazy. Electric Bitters—the spring tonic and system cleanser—is what you need; it stimulates the kidneys, liver and bowels to healthy action, expel blood impurities and restore your health, strength and ambition. Electric Bitters makes you feel like new. Start a four weeks' treatment—it will put you in fine shape for your spring work. Guaranteed. All druggists, 50c, and \$1. H. E. Bucklen & Co., Philadelphia or St. Louis. adv.

Named for the President.

Georgetown, S. C., March 11.—"Woodrow" is the name of a new station on the Georgetown and Western Railroad, ten miles from this city, at Johnson's farm, and was formerly known as Leland, about midway between Sampit and Kent stations. These two last named have been discontinued and the business consolidated at the new station, which has been given the first name of the President of the United States. Woodrow will be the principal strawberry station of this immediate section during the approaching season.

HONOR ROLL.

South Union School.

Honor roll for month beginning February 2d and ending February 27th:

- First Grade—Jessie Smith, Laurens Burriss.
Third Grade—Cagle Blair, Harry Goodman, Joseph Thomas.
Fifth Grade—Ruble Gibson.
Eighth Grade—Bertie Thomas.

Earle's Grove Graded School.

Following is the honor roll for the month ending March 6th:

- Eighth Grade—Dessie Grant.
Sixth Grade—Adell Irwin, Eliza Black.
Fifth Grade—Grace Ables, Clark Ables, Grady Ables, Onwin Carroll, Clara Carroll.
Fourth Grade—Bessie Belle Smith, Beulah Ables, Nora Campbell.

Second Grade—Eulus Black, Ruby Yarbrough, Flora Callahan, Wade Callahan, Lucile Callahan, Winfred Yarbrough, Henry Black, Dorace Grant, Addie Slayton.

Advanced First Grade—Fred Cole, Homer Callahan, Hubert Callahan, Lexie Franks, Lee Lykes, Joe Stripling, Forrest Smith.

First Grade—Nannie B. Callahan, Violet Callahan, Bertie Ables, Allie Black, Clyde Franks, Ross Sheriff, Lucile Sheriff, Hubert Smith, Nettie Smith, John B. Compton, Priia.

Oakway High School.

First Grade—Lella Watkins, Geneva Watkins, Bertha Watkins, Ola Graham, Bernon King, Beatrice Landreth, Grace Shipes, Fred Mason, Clyde Landreth, Lewis Cole, Allan Martin.

Second Grade—Charles Mason.

Third Grade—Hugh Brown, Lattie Eubanks, Corinne Mason, Marie Landreth, J. F. Landreth.

Fourth Grade—Iber Gibson, Eva Williams.

Fifth Grade—Joyce Bearden.

Seventh Grade—Hill Bearden, Ella Gibson.

High School—1st year—Coleman Haynes, Mark Harris.

Second year—Genora Tompkins, Ewart Brown, Kate Gambrell.

An average of 95 per cent on recitations, examinations, department and attendance is required for the honor roll. There are 230 pupils enrolled in all departments.

DEPRESSED SPIRITS.

Every One Has It Within His Power to Be Happy.

A celebrated French physician has said that "a man's liver is the barometer of his disposition."

Every man and every woman knows that the cheerful smile is a big factor in one's success.

Every one should know that the disordered liver is the cause of 90 per cent of human ills. Lazy, over-worked livers are the prime causes of headaches, indigestion, constipation and dozens of other ills.

But the inactive liver always warns by coated tongue, sour stomach, dull eye and even laziness. Heed your warning and you insure happiness to yourself and reflect it upon your associates. Calomel used to do. Modern-day science has found a better way in CARSWELL'S LIVER-AID, which is a pure vegetable remedy on sale under guarantee or money refunded at 50c. for large bottle. Ask Bell's Drug Store about it. adv.

WHITE HOUSE WEDDING AGAIN?

Reported Secretary McAdoo and Miss Eleanor Wilson Marry in June.

Washington, March 12.—Prospects of another White House wedding became more definite to-day with the persistent renewal of the report that Secretary of the Treasury McAdoo and Miss Eleanor Wilson, youngest daughter of the President and Mrs. Wilson, were engaged, the marriage to take place in June.

There was no announcement from the White House and when the attention of officials was drawn to the report they refrained from making any comment or denial.

Secretary McAdoo himself said it would be indelicate for him to comment on the subject one way or the other. Nevertheless, official Washington is taking it as a definite fact that another wedding at the White House will be solemnized in June after the adjournment of Congress.

Many persons who know Secretary McAdoo were not surprised at the report because he has been a frequent social visitor at the White House during the last year.

Mr. McAdoo is 59 years old while Miss Wilson is 24. He is a widower and has six children, one son and one daughter being married.

Mr. McAdoo, who is the builder of the Hudson tunnels, knew the Wilson family before his entry into the Cabinet and has been an intimate friend of the President since early in the pre-convention campaign.

England Going It Heavy.

London, March 12.—The British naval estimates for 1914-15 amount to \$257,750,000, an increase of \$13,700,000 over last year. The new construction program provides for four battleships, four light cruisers and twelve destroyers.

The Forty-Year Test.

An article must have exceptional merit to survive a period of forty years. Chamberlain's Cough Remedy was first offered to the public in 1872. From a small beginning it has grown in favor and popularity until it has attained a world-wide reputation. You will find nothing better for a cough or cold. Try it and you will understand why it is a favorite after a period of more than forty years. It not only cures relief, but cures. For sale by all dealers. adv.

ELEPHANT HUNT IN CAROLINA.

Beast Escaped from Show Near Hartsville—Citizens Slay Runaway.

Hartsville, March 11.—A large elephant which escaped from a circus train, said to have been wrecked to-day on the Seaboard, near Patrick, was killed to-night in the Hall's Mill neighborhood, six miles out, by a large party of men. It is said to have been a very large elephant by those present at the killing. It was shot into repeatedly and chopped into with axes and finally weakened and killed. It caused quite a stir in the sparsely settled portion of Chesterfield and Darlington counties through which it traveled.

Many wild reports were circulated in Hartsville to-night about damage it had done. The military company was asked for, and while it did not go, of course, many men went from here and some were at the killing.

It is a great pity that it was not watched and followed until a keeper could arrive on the scene, for from all reports it does not appear to have attempted any violence to the party in pursuit.

Was Perfectly Harmless.

Hartsville, March 12.—It was ascertained to-day that the elephant killed last night about six miles above Hartsville was the property of a small show owned by a man named Gillespie, which the night previous had given an exhibition at McBee, some eighteen miles above here. The elephant had gotten away after the performance. To-day his old keeper came to Hartsville, and from him it was learned that the elephant had been recently sold to Gillespie by Brinkling Brothers' Circus, and that it had cost \$6,000. He had just turned the animal over to its new keeper and trainer and had gone away when he heard of its death. He says that it had been in his charge for six years and was perfectly gentle, and that it would have followed a dog or horse about and would have harmed no one. Indeed, it only showed fight after it had been shot in the eye, and after it was brought down from exhaustion and approached by its pursuers.

Gillespie has not put in an appearance here, though he may have gone out to the scene of the killing. His only hope of recouping for the loss of \$6,000 is insurance, which it is presumed he carried.

TO SEGREGATE COTTON.

Hereafter Government Report Will Put Linters in Column to Self.

Director Wm. J. Harris, of the Bureau of the Census, Department of Commerce, announces a change in the method of publishing the statistics of cotton.

The annual reports on the quantity of cotton ginned have heretofore included the quantity of linters obtained by the oil mills. Formerly there was only a comparatively small quantity of linters obtained, and they were of such a grade as could be used to some extent, for the same purposes as were the lower grades of cotton. Many of the oil mills have now installed machinery for the closer delinting of the cotton seed. This has resulted in a large increase in the total quantity of linters produced each year, at the same time lowering the average quality of the fiber, so that now only a small part,

THE Most Profitable Fertilizer to Be Used Is:

for red lands, 8-3-3-9-3-3-10-3-3; for gray lands, 8-4-4-10-4-4.

You get more for your money in these analyses than in the lower grades.

The freight incoming and outgoing, labor account and general expenses, is just as much on a ton of 10-2-2 as it is on a ton of 10-4-4. The difference in the cost of the goods is the difference in the cost of the extra material in the 10-4-4 and then you get Fish in these high grade goods, and fish lasts longer in the soil than any other ammoniate going into Fertilizer.

The longer your fertilizer lasts the longer your crops will keep growing.

The longer you keep your crop green and growing the better crops you will make.

The difference in cost per acre is very little, say One Dollar an Acre; the difference in the yield of cotton is much more than that.

The high grade goods are the economical goods to buy. The Anderson Phosphate & Oil Company goods are the goods to buy. They use the very best of material and use plenty of it.

Buy Goods Made by

Anderson Phosphate & Oil Co., Anderson, S. C.

The Price is the Same and the Goods are Better!

if any, is used as a substitute for lint cotton.

It, therefore, appears advisable not to include the quantity of linters in the total production of cotton for the crop, and accordingly, the totals in the annual report to be issued on

March 20th will relate only to lint cotton and will not include linters.

Information as to the production of linters, however, will be given in a footnote so that comparative figures may be computed on the basis of the reports issued in previous years.

"As good as Roysters"

If a fertilizer dealer says this to you, ask yourself why Royster's is the standard of comparison.
