Americans Rescued.

San Antonio, Texas, May 17 .-- The rescue of the American soldier, J Deemer, and the negro cook, Montoe Payne, carried off as prisoners by the bandits that raided Glenn Springs and Boquillas, was reported to Gen

Their rescue alive was due to the refusal of the residents of the village, where they had been left, to carry out the orders of the bandits to kill them if the American troops attempted

The report came from Col. Sibley, who received his information from Major Langhorne, now about miles south of the border. A detachment of Major Langhorne's forces found the Americans at El Pino, 90 miles south of Boquillas yesterday morning. The prisoners had been eft there by their captors in charge of the residents. None but the unarmed inhabitants of the town were here when the American soldiers arrived and no resistance was made. Major Langhorne reported to Col. Sibley that he was pushing forward and hoped to overtake the bandits daring the day.

He added that no Federal troops had been encountered and that the attitude of the residents in the terri-tory through which he had passed appeared friendly.

A scarcity of forage was reported and Col. Sibley said that he was preparing to send forward as rapidly as possible hay and grain for the horses and mules. Col. Sibley was at point about 40 miles south of the border.

New Pistol Does Deadly Work.

Field Headquarters, May 8 .- (By Army Motor to Columbus, N. May 17.—The high mortality of Mexican bandits in the Ojo Azules fight last Friday, when Major R. L. Howe's command killed 55 Villa bandits, was credited by officers here to-day in part to the effectiveness of the new army automatic .45-calibre pistol. Most of the fighting was done with pistols by the Americans, who ran

down the bandits, at close range. The blow from the big .45 lead bullet is said to be nearly sufficient in

itself to stagger a horse. Accuracy is the strong point of this In former types of army pistols the men found that each weapon was a trifle off from absolute accuracy on account of gas in the chamber, so that in shooting at a bull's eve it was necessary to aim a little to the right or left, according to the bias of the particular gun. The new pistols shoot point blank at more than 100 yards.

The briefest report of the fight was that brought back to the advanced base by Sergeant Chicken, the oldest of the 20 Apache Indian scouts. one with this expedition seems know Sergeant Chicken's age, which is estimated variously at from 70 to He was in the van during the pistol battle, where his experiences were said to be thrilling. urged to tell what he knew, Sergeant Chicken said: "Him damn fine fight."
