**************** THE RACE OF LIFE. .A LESSON FOR THE SOUTH.). * * * * * * * * * * * * * * *

(Extracts from an address by President Roger A. Derby at North Carolina Farmers' Union Convention.)

In Germany we have an example of a nation that has for half a century been preparing its people not only for lance fighter who neither gives nor success in peace, but for success in war. That Germany has organized many good causes, we feel that if he the largest and most efficient army had devoted himself more largely to the world has ever seen is not the only reason why for three years she cal, he would have left an even has been able to stand off the combined attack of the rest of Europe. and stand it off, not on her own soil, outstanding figure in Georgia and but on soil conquered from her enemies. Her well-worked-out system of rural credits that has made her small farmers independent land- Strength Comes from Struggle, Sufowners, producing more per acre than any other farmers in the world: her splendld system of schools that not only educate the children, but train them for life; her careful system of medical inspection and correction through these schools-all have contributed quite as much as the army itself to her national efficiency. in Germany the child is a national asset. He cannot be allowed to grow up handicapped by disease or deformity because his nation needs him as o worker in peace and a defender in war.

Bismarck said, "Give me control of the schools and I will make of the nation what you want." They gave him control of the schools and he did it. The order came from the ruling class of Germany. Here you and cess. 7 and the rest of the folks at home are the ruling class, and I am going to ask you, What do you want this nation to be? It is for you to decide, and when you do decide there are men who can carry out your plans quite as effectively here as Bismarck carried them out in Germany. There is a man sitting there (pointing to the State Superintendent of Education) who can remake this State in ten years if you will tell him what you want him to do and pay the bills.

YOU'RE BILIOUS! LET "CASCARETS" LIVEN LIVER AND BOWELS.

Pon't Stay Headachy, Constipated Sick, With Breath Bad and Stomach Sour,

Get a 10-cent box now!

You men and women who can't get celing right-who have headache, oated tongue, bad taste and foul breath, dizziness, can't sleep, are tilious, nervous and upset, bothered with a sick, gassy, disordered stomach, or have a bad cold.

Are you keeping your bowels clean with Cascarets, or merely forcing a , assageway every few days with salts, catharitic pills or castor oil?

Cascarets work while you sleep: cleanse the stomach, remove the sour, undigested, fermenting food and foul gases; take the excess bile from the liver and carry out of the system all the constipated waste matter and poison in the bowels.

A Cascaret to-night will straighten you out by morning—a 10-cent box from any drug store will keep your stomach sweet, liver and bowels regplar, and head clear for months. Don't forget the children. They love Cascarets because they taste go

A Talk With the Boys.

(Progressive Farmer.)

(Few men in the South have more riends or more enemies than Tom Watson, of Georgia, Unusually gifted with tongue and pen, he is a free asks quarter. While he has alded constructive effort rather than critigreater impress on the South than he has. But anyhow he is a genius, an the South, and we are glad to have him as the author of this weeks Talk With the Boys.)

foring and Willingness.

Manliness, and willingness to do any kind of respectable work, are two of the great essentials to success.

Boys must be taught that no kind of honest labor must be ashamed of itself; and that fine clothes to wear, a fine turnout to drive, and an easy job at a good salary, do not necessarily make the best beginnings in life. Strength of will and achievement is usually a product of the Blacksmith-shop of Experience, where the metal goes into the fire and has the dross beaten out of it on the anvil of actual struggle and suffering.

A boy behind the plowhandles is as apt as the boy behind the counter to be footing the royal road to suc-Thomas E. Watson.

Thomson, Ga. Killing Weevils in Peas.

Clemson College, Oct. 2 .--- All cow life; look not behind thee, neither peas are more or less liable to be in-1 stay thou in all the plain; escape to fested with weevils when harvested; the mountain, lest thou be contherefore, it is advisable to fumigate sumed." (Gen. 19:17.) hem soon after harvesting. The best material to fumigate with is carbon-bisulphide, sometimes called "high-life." The peas to be fumigated should be placed in a tight bin or barrel so that the fumes will be more effective. The carbon-bisulphide should be placed in shallow dishes on top of the peas. One ounce of the carbon-bisulphide is sufficient to fumigate a barrel of peas; three to five pounds are required for every thousand feet of a tight bin, and more is required if the bin it not gas-proof. Fumigation should be continued for twelve hours, after which the peas should be aired for several hours. The peas should be stored so that they will not become reinfested with weevils. This fumigation kills all stages of weevil development, but does not prevent the weevils from working in the peas later. Use the same precautions in handling carbon-bisulphide that you would use in handling gasolinekeep all sources of fire a good distance away.

* * * * * * * * * * * * * * * * **GUARDSMAN IS IN HOSPITAL** HEROIC WARNING SAVES TOWNS. ---

* * * * * * * * * * * * * * * Under the above caption the Christian Herald of September 13, referring to the recent Toxaway floods, and commenting thereon, says:

During the great North Carolina floods recently it was seen that the huge Lake Toxaway dam was weakening. A stream of water began to seep through the masonry, and the watchers sent out the warning that it was doomed. Hardy mountaineer horsemen volunteered to ride down the valleys to warn men, women and children in the little hamlets that would be swept away by the pouring torrents. Traveling short mountain cuts and often risking their lives by breakneck speed along narrow trails, the riders kept ahead of the waters. Many refugees reached heights bare. ly in time, their houses being washed away before their eyes. But not one life in that valley was lost. The tenacity with which people stay settled close by great natural dangers, flooded valleys, volcanoes and earthquake zones has always been a strange fact. After a terrible disaster they quietly move back and go their way undisturbed until another recurrence brings them a warning or else loss and death. We are surrounded, too, by dangers in the moral world, no less fatal than floods and volcanic eruptions. Living on the lower spiritual levels is always a danger, and the only safe course is a dwelling place on the heights, where life is bracing and temptations can be conquered. This warning to the plain-dwellers is strikingly like the errand of the angel sent to rescue Lot from Sodom, "Escape for thy

GIRLS! GIRLS! TRY IT! STOP DANDRUFF AND BEAUTIFY YOUR HAIR.

Hair Stops Falling Out and Gets Thick, Wavy, Strong and

Beautiful. Your hair becomes light, wavy, fluffy, abundant and appears as soft, lustrous and beautiful as a young girl's after a cleanse." Just t "Danderine hair Just try this-moisten a cloth with a little Danderine and carefully draw it through your hair, taking one small strand at a time. This will cleanse the hair of dust, dirt and excessive oil and in just a few moments you have doubled the beauty of your hair.

Besides beautifying the hair at once, Danderine dissolves every particle of dandruff; cleanses, purifies and invigorates the scalp, forever stopping itching and falling hair. But what will please you most will be after a few week's use when you will actually see new hair—fine and downy at first-yes-but really new hair growing all over the scalp. you care for pretty, soft hair and lots of it surely get a 25-cent bottle of Knowlton's Danderine from any druggist or toilet counter, and just try it .--- Adv.

As Result of Attack by Unknown Non-Commissioned Officer.

El Paso, Texas, Sept. 28.-George A. Lloyd, of the First South Carolina Infantry, is in the base hospital suffering from concussion of the head, as a result of an attack by a noncommissioned officer near Fort Bliss. Private Lloyd was found unconscious about a mile north of the fort, and upon regaining consciousness said a sergeant whose name he did not know struck him on the head with an axe. Lloyd's condition is critical. An investigation is being made by military authorities. Getting Ready for Big Hike.

The First and Second South Carolina regiments are preparing for the practice hike of 67 miles to Fort Selden, northwest of LasCruces, New Mexico, next week. The South Carolina troops will be a part of the fifteen regiments of guardsmen commanded by Brig. Gen. Chas. Morton. Fifteen days will be required for the trip

After the march it is believed the Massachusetts brigade and one Pennsylvania brigade will be relieved by guardsmen recently ordered to the border.

Defense Guns Saved Ship.

Newport News, Va., Sept. 28 .- The British steamer Antinous, which left here early to-day after taking on bunker coal, had a narrow escape from destruction by a German submarine when off Algiers, en route to New York via Gibraltar and Newport News. The Antinous was badly battered up by shell fire from the Uboat and only the two guns carried by the steamer, by keeping the undersea craft at a distance too great to fire a torpedo, enabled her to escape. A large portion of the Antinous' bridge was shot away, one shell penetrated the bunkers and another struck just over the boilers. Minor damage was done to several other parts of the vessel.

Capt. Fishwick said his two guns had a range of three miles as against the five mile range of the submarine's guns. The three mile range, however, he said, was sufficient to prevent the successful discharge of a torpedo at the Antinous.

The submarine finally gave up the chase of its own accord, said the captain.

One of Robber Gang Slain.

Fort Myers, Fla., Sept. 28-Leland Rice, one of the four bandits wanted for robbing the 'Homestead (Fla.) Bank two weeks ago, was killed, and his brother, Frank Rice, another of the band, was probably fatally wounded when they sought refuge on Chokolukee Island, 15 miles south of here, yesterday, according to Frank Rice, who was brought here to-night for treatment. Jim Tucker and Hugh Alderman, said to be the other members of the band being sought, are still at large, but officials bringing Rice here declared the bandits were being pressed closely by two posses.

Fall from Bicycle Kills.

Rock Hill, Sept. 28.-Hasel Wells, a lad of 46 years of age, was found dead in his bed Wednesday morning, hafing died some time during the night of internal injuries sustained yesterday by a fall from his bicycle.

The accident occurred some dist ance out from the city, where young Wells with a companion had gone muscadine hunting. While descending a steep hill the brake on his bicycle gave way, with the result that he dashed down at great speed, and the wheel striking some obstacle the rider was thrown upon the rocks with great violence. His companion returned to the city and a conveyance was sent out for the injured boy. boy. He was carefully examined by a physician, who found no bones broken or any external evidence of serious injury.
