Fertilizers Will Pay This Year.

A decision must be made now.

The planting season is here and time is precious.

What crops will you plant and what acreage will you give to each crop?

Don't forget that only big yields per acre pay when crop prices are low.

You can't get high yields in the south without a liberal use of Fertilizers.

It will pay to get large yields per acre with Fertilizers.

Rightly used, at present values, \$1.00 worth of Fertilizer will give a crop increase worth \$3.00 to \$5.00.

Fertilizers cut the cost of growing a pound or a bushel of crops by increasing the yield per acre.

You must have Fertilizers. Waste no time in ordering them. Delay is dangerous.

GOOD-NATURED AND PATIENT

English Visitor Pays Tribute to Virtues He Noted as Distinguishing American People.

A while ago I published a little book on a tour I made in America during war time. I dedicated it "To the kindest people in the world," and I put the dedication in Latin to spare their blushes. Should I write another work of the same kind, I think I should dedicate it "To the most good-natured, tolerant and patient people in the world," writes Sir Arthur E. Shipley in the Outlook.

Although as the election grew imminent interest in it became keen and discussion eager, still I only once heard an acute disagreement between the supporters of the rival candidates, and this was between a husband and wife. It seemed based upon a fundamental difference of opinion on that most innocuous and unexciting fluid, milk.

As a rule the discussions were most amicable, and usually finished up, after the method of Lincoln, in a joke or a story. Their toleration equals their good humor. They bear patiently every variety of religious dogma; these are almost as numerous in the United States as are patent medicines. They quietly endure and ignore the most infernal noises. Owing to the enormous distances one has to traverse in the states, one spends a considerable part of one's time on the train and it is this reason which possibly accounts for the fact that Americans persist in talking on the cars. Mr. Lucas has recently reminded us that Carlyle bequeathed certain books to Harvard university because of his esteem and regard for the American people—"particularly the more silent part of them." The latter exist not only in the imagination of the Chelsea philosopher. They are perhaps not very numerous, still they exist.

MEAT UNDER PERPETUAL BAN

Residents and Visitors on Island of Valamo, Finland, Must Obey Law Centuries Old.

Every day is fish day on the little Island of Valamo, Finland, 12 squares miles in area. Almost ten centuries ago monks of the Greek Catholic church embarked on Lake Ladoga to find a new home and landed on Valamo.

A fine old monastery they built and framed a law that from that day on no meat should ever be eaten on the island. Recently several members of the American Red Cross stationed at the Russian refugee camp at Viborg, made a journey to the island and were entertained at lunch in the monastery built to replace the one destroyed in 1754. The old law is still observed by the 450 monks now living there.

From the day they arrive on the island to the day they leave or die no meat is eaten by them. Husky, strong and living to a good old age, this lack of meat as food is not apparent in their build. For lunch the Americans had fish in several forms, fried, baked and in soup, but always fish.

Hunting is barred, trapping is taboo, so that temptation in the shape of meat may never come. Smoking also is banned.
