What One Gallon of Kerosene in a "Z" Engine Will Do for You

Do you realize how much work the "Z" engine will do at the low cost of one gallon of kerosene?

It will pump 10,000 gallons of water for your stock, for your home, for fire protection.

It will light 10 20-watt, 16-candle power lamps for 15 hours from your light plant.

It will grind 40 bushels of feed to fatten your stock.

It will saw over 5 cords of wood for you.

It will run your churn—cream separator—milk machine.

It will operate your family washing machine—your grindstone, corn sheller, clover huller, shredder, hay baler and other machines about the farm.

Over 300,000 "Z" engines have been bought by farmers everywhere. They saved labor—got more work done. The many big advantages of the "Z" were convincingly demonstrated to these farmers before they bought.

Note these features at the left and then you, too, come in and see the "Z."
