

SENEX JUBILIANS.

The world is growing better Every year
It throws off many a fetter Every year
There are many things to relish Every year

The Fall Season.

The 'fall of the leaf' is the season of death and decay. The gorgeous coloring of the leaves and the changing hues of the lower vegetation, are all significant of this.

Neighbors Sacrifice.

A good many years ago a cashier took a little lad from a neighboring poor-house, and when the boy had become a youth he was given a responsible position in the bank of which his patron was practically the head.

Sounded Familiar.

A seely-looking fellow dropped into the city editor's room and, failing to borrow a half dollar, begged to share his experience. 'I used to be an officer of State, I did, I was Sheriff, and member of the Legislature, and Constable, and Clerk of the courts, and Judge, and a candidate for governor, and had a high old frolic, I did.'

Chicago's First Edition.

The Chicago Tribune, closing an elaborate article on Hon. Carter H. Harrison, Mayor of that city, gives the following as Mr. Harrison's opinion of St. Jacobs Oil: 'When I first found myself suffering from the rheumatism, my leading thought was naturally to call a physician, but my neighbors all advised me to try St. Jacobs Oil, the Great German Remedy. I procured some of it immediately, and found it excellent for that ailment.'

Chicago's First Edition.

The Chicago Tribune, closing an elaborate article on Hon. Carter H. Harrison, Mayor of that city, gives the following as Mr. Harrison's opinion of St. Jacobs Oil: 'When I first found myself suffering from the rheumatism, my leading thought was naturally to call a physician, but my neighbors all advised me to try St. Jacobs Oil, the Great German Remedy. I procured some of it immediately, and found it excellent for that ailment.'

Taken Care Of.

Let charity begin at home, But not stay there forever. She was very sick, so sick that life and hope seemed to drift away together, and so poor that there were no indications for her to live, and as she lay there day after day with a little wailing babe on her arm, and only a stranger to bring her bite or sup, she wondered why she could not die and so be out of her misery.

The Mystery of Comets' Tails.

The cemetery displays of the last two years have excited in an unusual degree the spirit of astronomical speculation as to the causes of comets' tails and their mysterious movements. An English scientist in the Philosophical Magazine propounds a novel theory to explain these phenomena. The forces on which he relies to make out his theory are the force of gravity which urges the comet toward the sun, the expansive force of the sun's heat, and the resistance of an invisible atmosphere surrounding the sun at immense distances.

The Flower City Furor.

The Commission framed by the State of New York, and published in the Democrat and Chronicle, was published in this paper recently, and has been the subject of much conversation, both in professional circles and on the street. Apparently it caused more commotion in Rochester, as the following from the same paper shows: 'Dr. J. B. Henion, who is well known, not only in Rochester, but in nearly every part of America, sent an extended article in this paper a few days since, which was very surprising, that the public thought experience and rescue from what seemed to be certain death. It would be impossible to enumerate the personal inquiries which have been made, and the statements of the validity of the article, but they have been so numerous that further investigation of the subject was deemed an editorial necessity.'

Effect of Cultivation.

The common potato probably shows the effect of cultivation as much as any plant ever introduced into fields or gardens. But it is not generally known that the change from its normal to what we may term improved state is quite rapid, requiring only a few years to produce large tubers of various colors from the wild ones of careful culture. Where the wild plants grow abundantly in New Mexico and some parts of Arizona, the ranch men assure us that when they first saw the wild plants in putting in cultivated crops, the largest and most tuberos tubers of the valleys of New Mexico, as well as from the disturbed or plowed land, and noted the difference in size as claimed by many of the residents of the country.—N. Y. Herald.

A Commercial Item.

Mose Schauburg's little boy, although only ten years old, is traveling around slung to a tray, like a miniature Sam of Psean, instead of being sent to school where he could acquire a knowledge of arithmetic that might be useful to him hereafter.

Chinese Masonry.

Last Sunday was a great day for the Chinese Masons of Philadelphia, for no less a personage than Loow Chow, a genuine Mandarin, and a man of great use and honor, was present at the ceremony of the initiation of a new candidate into the mystic order of the Gee Hing. The ceremony began in the afternoon with a feast, at which a generous supply of chicken, rice and shark's fins was put where it was the most good, and a considerable quantity of American whiskey where it would do the most harm.
