We all know that the promiseuous vaccina-tion indulged in during the late war bred the most villahous diseases. Vaccination pus was taken from the arms of many persons full of scrofulous sores Then of course the impurities of the sero-fulous patient were absorbed in the blood of men otherwise without diseases, and both became infected alike. Men, women and children throughout all the West are most wofully diseased from this cause, and knew not, until a few months ago, the origin of it. ETIWAN GUANOS, SOLUBLE MANURES.

SULPHURIC ACID. MANUFACTURED AT CHARLESTON

TNDER THE DIRECTION OF N. A. PRATT, CHEMIST FOR THE Sulphuric Acid and Super-Phosphate Company.

Sulphuric Acid and Super-Phesphate Company.

SOLUBLE PHOSPHORIC ACID, in the form of SOLUBLE PHOSPHATE OF LIME, or DISSOLVED BONE PHOSPHATE, is the basis of all good Fertilizers, and these are valuable in the ratio of Soluble Phosphoric Acid which is in them.

The immense deposits of Phosphoric Gunos which is in them.

The immense deposits of Phosphatic Gunos which were discovered in 1867, in South Carolina, by Dr. PRATT, consist mainly of Insoluble Phosphate of Lime, which is made available as a Fertilizer by being ground to powder, and reduced by Sulphuric Acid to such a condition as to make its insoluble phosphate soluble in water, and thus made capable of being taken up by growing plants. The insoluble Phosphate found in any commercial Fertilizer is of no more value to the plant than the original Phosphate rock. The greater the proportion of this soluble Phosphate which any Fertilizer centains the less the quantity reproportion of this soluble Phosphate which any Perfilizer contains the less the quantity required per acre, and consequently the cheapest Perfilizer is that containing the leghest pe centage of Soluble Phosphate.
Impressed with these truths, the SULPHUME ACID AND SUPER-PHOSPHATE

COMPANY have erected at Charleston the first extensive Agid Chambers South of Balti-more, and are able to offer to planters the HIGHEST PER CENTAGE OF SOLUBLE PHOSPHATE OF LIME known in any market.

Their Fertilizers are offered under two forms: 1. Etiwan, No. 1.—PURE SOLUBLE PROSPRICTE, guaranteed to contain 2 cent, of Dissolved Bone Phosphate of Line, Set per ton. It per cent, dissount for each 2. Etiwan, No. 2.—PERUVIAN SUPER PHOSPHATE, guaranteed to contain 20 per cent, of Dissolved Hone Phosphate, and 11 to 3 per cent, of Ammonia, with a sufficient addition of Peravian Guano to adopt it to all Craps, 870 per ton, 10 per cent, discount
