All in the Wrong. Many years ago, I contracted an intimacy with a Mr. Wm. Legrand. He was of an ancient Huguenot family, and had

unce been wealthy : but a series of miefortunes had reduced him to want. To avoid the mortification consequent upon his disasters, he left New Orleans, the city of his forefathers, and took up his residence at Sullivau's Island near Charleston, South Carolina. The Island is a very singular one.

consists of little else than the sea sand, and is about three miles long. Its breadth at no point exceed a quarter of a mile. It is separated from the main land by a scarcely perceptible creek, odzing its way through a wilderness of reeds and slime, a favorite resort of the

marsh-hen. The vegetation, as might be supposed, is scant, or at least, dwarfish. No trees of any magnitude are to be seen. Near the western extremity, where Fort Moultrie stands, and where are some miserable frame buildings, tenanted, during summer, by the fugitives from Charleston dust and fever, may be found, indeed, the bristly palmetto; but the whole island, with the exception of this western point, and a line of hard, white beach on the sea-coast, is covered with a dense undergrowth of the sweet myrtle, so much prized by the horticulturists of

England. The shrub here often attains the height of fifteen or twenty feet, and burthening the air with its fragrauce.

In these excursions he was usually accompanied by an old negro, called Jupiter, who had been manumitted before the reverses of the family, but who could be induced, neither by threats nor by promises, to abandon what he considered his right of attendance upon the footsteps of his young "Massa Will." It is not probable that the relatives of Legrand, conceiving him to be somewhat unsettled in intellect, had contrived to instil this obstinacy into Jupiter, with a view to the supervision and guardianship of the wanderer. The wintes in the latitude of Sullivan's island are seldom very severe, and in the fall of the year it is a rare event indeed when a fire is considered necessary. About the middle of October, at least-have had good masters and
