ests of the people and thus come into immediate appears with their minds.

The true country editor understands that his paper theires by being intensely local; that it is not by learned editorials on tariff and income tax, but by articles in favor of the new railroad, by descriptions of the new factory, by advocacy of the new bridge, that he must succeed. People look in his columns not only for the latest general news, but for a mention of every interesting fact of every curious matter of gessip in his own county. And thus the paper be comesothe reflector of the current events and the public sentiment of his section. Nothing is too small to be itemized if only it is of interest. A country editor advertised the other day that he would insert a list of the names of all the people who had joined the churches in the county in a recent revival. Which showed that he understood his busines-He proposed to chronicle every event of interest occurring in his jurisdiction.

Every intelligent family should give a cordial support to the local new-paper It is one of the great educational influ ences .- American Newspaper Reporter.

A WOMAN TIRED OF EDITORIAL LIFE .- The wife of the editor of the Utica (N .Y.) Bee is filling the editorial chair of that establishment, like a brave woman, while her husband is in prison for contempt of Court, She is tired of the editorial life, however, as may be seen by the following paragraph.

"We wish the editor would come back We don't want to occupy his chair any longer. It isn't plesant; we don't like it We don't like to have tall, beetle browed Bob Harts comes striding is to our presence, armed with a heavy endeel, an demand to know who wrote son e of the meekest paragraphs ever put in a paper - We den't like to have the proprietors of old established printing offices get our printers away from us. We don't like so much responsibility. We are glad we ar not a man. We would not have his earch and auxiety of business for all the ballotin the United States. Women who choose may occupy exceptional positions, but we had gather be excused. We never cravethis job. It is dingy and dark here, and we had rather be out in the surshin . Shopping has inexpressible charms for us, and it is a woman's privilege.

A Poor man must work, And woman be gay.

Besides, their are some points of scene ry about here which needs sketchings. So let's have the editor back by all means

INSTINCT OF TUETLE .- Audobon, the matusalist, stated that at certain places on the coasts of Florida sea turtles, those hugh stupid looking reptiles on which aldermen are fed at the expense of tax payers, possess an extenordinary faculty of finding places. Working their way up out of the reach of tide-water with their flippers, quite a deep hole is exe. yated, in which a batch of eggs are de posited, and then carefully covered up On reaching the water they not unfre-De quently swim 380 miles out at sea, for appropriate food. When another baten of eggs are developed, after a lapse of about fourteen days, they will return unerringly in a direct line, even in the dark est night, and visit the buried eggs. Rebeing the sand, more are deposited and secured. Away they go again as before. They know instinctively the day and hour when the young brood, incubated by solar rays, will break the shell, and are promptly at the spot to liberate them from their prison. As soon as fairly out of the hole the mother turtle leads them down the bank to the waves, and there

Ayer's Sarsaparilla,

The reputation this excellent medicine enjoys, is derived from its cures, many of which are truly marvellous. Inveterate cases of Scroft-lous discuse, where the system seemed saturated with corruption, have been purified and cured by it. Scroft-lous and disorders, which were aggravated by the scroft-lous of the country, that the public scarcely need to be informed of its virtues or uses.

Scroft-lous poison is one of the most destructive enemies of our race. Often, this unseen and unfelt tenant of the organism undermines the constitution and invites the affack of enfeebling or fated diseases, without exciting a suspicion of its presence. Again, it seems to breed infection throughout the body, and then, on some favorable occasion, rapidly develop into one or other of its hideous forms, either on the surface or among the vitals. In the latter, tubercles may be suddenly deposited in the lungs or heart, or tumors formed in the liver, or it shows its presence by eruptions on the skin, or foul ulcerations on some part of the body. Hence the occasional use of a bottle of this *Karsaparhla* is advisable, even when no active symptoms of disease appear. WAXHAWS, LANCASTER COUNTY, S. C. To P. P. Zimmerman, Exq., Secretary of the Fair of the Carolinas, Charlotte, N. C .:

The following is a correct scattement of Cotton raised by Stevens & Cureton, on 11 acres of stubble land, which was manured with 400 pounds of Carolina Fertilizer. The collowing is the mode of cultivation: It was horoughly broken up 12 inches deep, and aid off in rows 34 feet wide, and the Fertilizer applied in the drill, then bedded on it on the 15th of May, and planted the same day, but owing to the cool and dry weather, did not come up to a stand until about the lat of June. First working it was run around with a half shovel and partially trimmed out wisk a hoe. Second working it was run around with a 8 inch grub, 12 inches long and the middles thrownout with a sweep 18 inches wide. One furrow to a row and thinned to a stand with a line about 12 inches between the stocks, and after-12 inches between the stocks, and after-wards it was ploughed every two weeks-with a sweep 18 inches wide, and hoed eachtime, until it was worked five times.

The following is a correct statement of the
