

AIR MAIL PILOTS OF THE PEACE CONFERENCE

These are the pilots that carry the air mail daily between London and Paris for the British peace conference delegates.

MAKING HUNS CLEAR UP THE YPRES CATHEDRAL RUINS

German prisoners of war at work clearing away the debris from the cathedral of Ypres which they wantonly destroyed.

EDWARD R. STETTINIUS IS HONORED

Secretary of War Baker pinning the distinguished service medal on Edward R. Stettinius, assistant secretary of war. In the room are other officers who have been similarly decorated.

SMOKE SCREEN PUT UP BY A WARSHIP

This photograph, taken at sea from a kite balloon, gives an idea of the effect of a "smoke screen" on going into action. The warship is the Erin of the British navy.

SCRAPS

Porto Rico last year increased its area devoted to food crops by 43 per cent. The French were the first people to preserve fruits and vegetables. This was in 1817.

A sanitary hairbrush has the bristles on a flexible pad, which enables that part to be separated from the back for cleansing. A meteor that shot through the sky over Santa Maria valley, California, was first seen and reported by Mrs. Robert Gray of Santa Barbara.

TWO TYPES OF CRUSADERS

A doughboy of the First division, American army of occupation, is shown standing next to the armor of a feudal knight at Sayn, Germany.

Real Art.

Arthur was proud of his fox terrier dog which he had taught to do a number of tricks. His neighboring playmate wanted a pet and was finally sent a bantam chicken in a box and promptly called Arthur to view it. As the two stood looking at it Arthur asked: "What can it do?" "Oh," replied his companion, "it will lay eggs." "Huh," replied Arthur, "every old chicken does that," and turning to his dog he called: "Sit up, Fox," to which the dog promptly responded. Pointing to his dog with pride he exclaimed: "Now every dog can't do that. That's art!"

A Child Critic.

The famous Dr. Parkhurst said in a Brooklyn address: "One reason why people don't go to church is the dullness of the sermons. "I said one Sunday to a little boy in Sunday school: "Why did David prefer to be a doorkeeper in the house of the Lord?" "Because," the lad answered promptly, "he could walk up and down outside then while the sermon was being preached."

900 Tools to Make One Rifle.

Nine hundred and ninety-seven cutting tools alone are required in manufacturing a modern rifle. The twist drill is one of the busiest of these. To supply 1,000,000 rifles, 94,000,000 holes must be drilled. Shrapnel, torpedoes, machine guns, biplanes, motortrucks and antiaircraft guns require from 75 to 5,000 holes each.—Nyxak Evening Journal.

RECLUSE CANNOT LOSE HIS MONEY

Chicago Man Made Unsuccessful Attempts to Give Millions Away.

SOUGHT TO BE PAUPER

Aged Eccentric Is Again Millionaire, Although He Transferred Money to Attorney—Victim of Many Fleecings.

Chicago.—Edward W. Morrison, aged recluse of Chicago, has been trying to get rid of his millions for many years, but, despite the assistance of his lawyers and cronies, he is unable to become a pauper. The millionaire nearly succeeded a few years ago, when he transferred all his property, variously estimated at \$3,000,000 to \$6,000,000, to his attorney, but the transfer was recently set aside by a federal court.

In addition to his dealings with his attorney, Edward Morrison gained notoriety some years ago when he was accused by Joseph Burnstein, a Chicago junk dealer, of being the father of the two Burnstein girls he had adopted. The charge never was proved. Spent \$94,000 to Get \$25,000.

In the investigation conducted by Federal Judge Landis it was shown that the eccentric millionaire had paid \$94,000 to a man named Douglas to go abroad and to search for \$25,000 worth of bonds supposedly stolen from his safe. Another man is said to have collected thousands of dollars for providing the aged millionaire with questionable entertainment.

"My father was rich," he declared when questioned about a real estate transfer. "He left me \$3,000,000 when he died. I doubled that in speculation

HOME TOWN HELPS

PUT HEALTH MEASURE FIRST

Value of Proper Civic Conditions Cannot Be Estimated in Dollars and Cents.

The cost of public playground parks and similar recreational features for the benefit of all our people drops into insignificance when compared with the priceless value of safeguarding the health of our men, women and children, and the knowledge that we are doing our full duty in creating conditions which will increase happiness, elevate morals and produce better citizens. The physique of people in cities is deteriorating, and the only way it can be safeguarded and made more efficient is through proper provision of light and air, which are hygienically basic, and healthful amusement, fun and recreation, which are the greatest lubricants for physical welfare and the greatest protection for moral health.

The ideal of a city, however, must rise above mere commercial and industrial supremacy, taking the higher ground of becoming an attractive, composite home for its residents, both of large and small means, as well as for the stranger within its gates. While the wealthier class of citizens in any community can build up beautiful residence sections on well-laid-out avenues and boulevards, what will become of those who have neither organization nor money to aid them in intelligently planning the most meager comforts of ordinary home surroundings? The interests of the inhabitants of the most unfortunate districts must be safeguarded.—Chicago News.

FOR BETTER PUBLIC HEALTH

Attention of Rural Communities Drawn to Necessary Steps in That Direction.

(Prepared by the United States Department of Agriculture.)

Much remains to be done in rural districts, according to the annual report of the secretary of agriculture, to control such pests as mosquitoes and the hookworm, to eliminate the sources of typhoid fever, and, even more, to give the country districts the advantage of modern hospitals, nursing and specialized medical practice.

Noting that many agencies, some of them private enterprises with large funds, are working for improvement, the report says that the department of agriculture, through its home demonstration service, is giving valuable aid, and the public-health service is increasingly extending its functions.

To what extent the further projection of effort is a matter for state or local action remains to be determined, says the secretary, but it seems clear that there should be no cessation of activities until there has been completed in every rural community of the Union an effective sanitary service and, through the provision of adequate machinery, steps taken to control and eliminate the sources of disease and to provide the necessary modern medical and dental facilities, easily accessible to the mass of the people.

Truly Peculiar Bequest.

Some years ago there died in Montreal a wealthy old Scotsman who had been noted for his shrewdness in business matters. One of the bequests in his long will was a hairbrush that he had used for many years. This hairbrush he gave to his nephew, with the proviso that the said brush should be kept in the family vault two months out of twelve.

During the brush's sojourn in the vault the legatee was not to brush, comb or cut his hair. The acceptance of the brush meant that the nephew was to inherit and enjoy two-thirds of the estate, and we have not the slightest doubt that this fortunate young man willingly became a "shock-headed Peter" in order to fulfill his eccentric uncle's wishes.

Damage From Fires.

This is the time of year when great caution should be exercised to prevent fires. Ninety per cent of all fires are caused by carelessness, such as children playing with matches, cigarettes or cigar butts thrown into inflammable materials, defective flues, stovepipes or heating apparatus. Many a career has been ruined by a fire that could have been prevented by a little caution.

All fires are waste. Never relax in your watchfulness in this respect. Nearly every great fire in the history of the world started from some trivial cause and could have been prevented if simple precautions had been exercised.—Thrifty Magazine.

Knew Them Both.

The young instructor was holding a class on board of one of his majesty's ships. Grammar was the subject his bright but uninterested pupils were trying to tackle.

"What are the two principal parts of a sentence?" he asked an old salt. Expecting, of course, the answer, "Subject and predicate."

After much meditation, Jack finally plunged into it. "Solitude, confinement and bread and water."

Transferred All His Property.

In mines and real estate. It was my money; I made it. I had a right to spend it as I pleased, and I did."

But the Chicago courts and the Chicago board of education, to whom the will of Morrison's father provides the estate shall revert for the erection of a high school building, should the recluse die without children, thought otherwise and through their efforts the property has been regained. So Edward Morrison is a millionaire, once more.

Accused of Theft in Home Where Dead Lay

Atlanta, Ga.—You must watch things even when you have a funeral in the house. J. L. Wood has just been indicted in Atlanta charged with stealing a lavallee and a small sum of cash from a home in Hemphill avenue where Wood had gone from a local undertaking establishment to make arrangements for the burial of the mother of the household.

USE GAS TO QUIET CHICKENS

Fall Off the Roosting Places and Are Easy Prey for Thieves in Ohio.

Springfield, Ohio.—Chicken thieves are using gas in looting the hen-coops of Clark County. Farmers in the vicinity of Buena Vista, near this city, have noticed a peculiar odor in their chicken coops after thieves have been there. The mystery was explained when one farmer found a chicken under one of the roosts which he took for dead. He tossed it in the barn yard and in a few minutes the chicken recovered and walked away. Farmers say the gas puts the chickens to sleep, they fall off the roosting places and are easy prey for the thieves.

Steals "Shots in Arm."

Bellefontaine, O.—When Dr. H. A. Skidmore started home from his office he found a note on the table in his reception room. It said: "When you get this I will be on my way. Many thanks. I hope sometime to have money enough to pay you." Investigating, the physician found that his supply of morphine and all of his hypodermics were gone.

PHYSICIAN WAS IN SERIOUS CONDITION

Dr. Farnsworth Gives Doan's Credit for His Wonderful Recovery.

Dr. T. G. Farnsworth, 76 S. Kanawha St., Buckhannon, W. Va., retired physician of over forty years' experience, ex-State Congressman, ex-City Mayor and ex-County Health Officer, praises Doan's Kidney Pills. Here is Dr. Farnsworth's experience as he tells it: "It was just a few years after my retiring from practicing medicine that I found I was afflicted with severe disorder of the kidneys and bladder. I grew steadily worse, and sometimes I was unable to get around at all. The kidney secretions were retarded and so painful in passing I would cry out in misery. I was in a frightful condition. After I had lost hope in other remedies, Doan's Kidney Pills were brought to my attention and I tried them. I soon noticed a change for the better. I used several boxes and they cured me completely. Never in my practice did I know a remedy that would accomplish what Doan's Kidney Pills did, and I give them my heartiest endorsement."
