Iron in the Blood

MAKES THE WEAK STRONG,

The Peruvian Syrup, a Protected Solution of the Protoxide of Iron, is so combined as to have the character of an aliment, as easily digested and assimilated with the blood as the simplest food. It increases the quantity of Nature's Own Vitalizing Agent, Iron in the blood, and cures "athousand ills," simply by Toning up, Invigorating and Vitalizing the System. The enriched and vitalized blood permeates every part of the body, repairing damages and waste, searching out morbid secretions, and leaving nothing for disease to feed upon.

This is the secret of the wonderful success of this remedy in euring Dyspepsia, Liver Complaint, Dropsy, Chronic Diar-

plaint, Dropsy, Chronic Diarrhœa, Boils, Nervous Affections, Chills and 'evers, Humors, Loss of Constitutional Vigor, Diseases of the Kidneys and Diseases of the Kidneys and Bladder, Female Complaints, and all diseases originating in a bad state of the blood, or accompanied by debility or a low state of the system. Being free from Alcohol, in any form, its energizing effects are not followed by corresponding reaction, but are permanent, infusing strength, vigor, and new life into all parts of the system, and building up an Iron Constitution.

and building up an Iron Con-stitution.

Thousands have been changed by the use of this remedy, from weak, sickly, suffering crea-tures, to strong, healthy, and happy men and women; and invalids cannot reasonably hes-itate to give it a trial. itate to give it a trial.

To the Planters and Farmers of South Carolina.

THE subscriber respectfully invites your attention to a Portable Plank and straight rail fence, which he confidently believes solves the Fence Questize, which since the change of our labor system is now the constitution of the form

is now the question of the farm. This fence is one of unquestioned reritsoproclaimed by all who have examined or used it. With nearly ONE HALF LESS RAILS, the unsigh ly crooked fence can be converted, with a small cost, into a sub-stantial, durable fence, without the use of new rails. It is easily made—can be rapidly constructed. Properly constructed t is proof against unruly stock, wind ar lood, and will stand ten years, if not longer, without ropair. No part of the fence need touch the ground Requires no post-holes, no vire, no baring or mortis-

This fence has been in use in the States of New York and Mississippi, and in every instance has more than met the most san guine expectations of the most practical

This fence was patented by Geo. R. Clake and Co., of New York in 1867. The undersigned has purchased the entire interest of the patentees for the State of South Carolina, and is prepared to sell COUNTY AND FARM RIGHTS for the same. These will be sold on reasonable

Over the justly popular Fence of the Rev. John H. Stone, it has the following advantages :

lst. It is cheaper, because being an "Air Line Fence," it takes less rails. Because, having no wire and post-holes to pay for, it will save in actual cost more than double the cost of Farm Rights of any sized farm. 2nd. It is more durable. Having no

post in the ground, it cannot rot off. Every rail being clear of the ground, exempts it from he same disadvantage. Being firmly braced, it offers great resistance to stock, wind or flood. 3d. Being portable, it is more convenient

in construction and desirable in use. To enterprising young men a care op portunity is offered to make maney in the purchase of County Rights. Corresion-dence solicited. Address

G. H. ROBERTSON, WINNSBORO.
