- The gold Democrats of Illinois, who organized not long ago to steal the state from the silverites have decided to keep their organization intact and put out an independent ticket.

- Within the past few days, what all along been working with the Seaboard people, and the Baltimore, Chesapeake and Richmond Steamboat company has been working with the Southern people. The alleged cause of the trouble is the action of the steamboat company in invading the territory of the packet company. The railroads have taken up the fight with the result that there have already been some cuts of 40 per cent. in freight rates, and the outlook is that this is only the beginning.

- All the leading Democratic bank presidents of New York, says a dispatch of Wednesday, repudiate the Democratic platform and ticket. E. D. Randolph, president of the Continental National bank, and a life-long Demo-crat, said : "I repudiate utterly both the platform and the nominees, and as far as I can judge from the present cirfar as I can judge from the prescription of the for McKinley, cumstances, shall vote for McKinley, bitter though it will be to do so."

Broad River Is Raging-Some Fine Cow These-Personal and Other Notes.

Correspondence of the Yorkville Enquirer. HOODTOWN, July 15 .- Last week will likely go down to history as one of the wettest times on record since the floodso it seemed to some of us at least. The ground has been thoroughly saturated, and on this account the wind storm of last Tuesday did considerable damage to both cotton and corn. Corn was badly blown down and twisted about and the roots so injured as to very materially lesen the yield, which before was very promising. While great damage was done by all the streams, both large and small, the river has probably destroyed greater amount of corn than the other vatercourses, by remaining up so much longer. Broad river was about as high as it usually gets, being according to conservative estimate over 20 feet above low water. It is to be hoped that we will not have a repetition of this freshet, as a little later on incalculable damage would re-

- Beginning with the administration of Washington, in 1789, the ages of the presidents, on assuming the oath of office, have been as follows : Washington, 57; John Adams, 62; Thomas Jefferson, 58; James Madison, 58; James Monroe, 59; John Quincy Adams, 58; Andrew Jackson, 62;

Martin Van Buren, 55; William Henry Harrison, 55; John Tyler, 51; James K. Garfield, 49; Chester A. Arthur, 51; Grover Cleveland, 48; Benjamin Harrison, 55. From this list it appears that the average presidential age is somewhere between 50 and 55 years. Mr. Bryan,

therefore, should he be elected in November, as seems at the present time most highly probable, will be about 15 years younger than the average president.

At first it was thought that the president had been killed ; but it was discovered immediately afterward that he was uninjured. Francois claimed that he had with blank cartridges.
