### PROOF OF THE PUDDING

Is in the eating. We have been selling Monarch Bicycles since 1892, and there is not a single solitary wheel that we have ever sold in this section that is not in use today, and there are some that have never had 10 cents worth of repairs on them. Does this prove their durability?

### NOW HERE IS A CLINCHER

There is a certain manufacturer of bicycle tires that employs a team of professional racers to ride their tires, on the sional racers to ride their trees, on the race-track, and the team is composed of the fastest riders—no other kind can hold the job. Heretofore the contract has provided that the rider could choose his own wheel, provided it was fitted with tires made by his employers; but recently they have been forced to modify owing to the fact that too large a proportion were ask-ing for the Monarch Wheels, and the tire manufacturers were afraid that if they allowed all their men to ride Monarchs, the other wheel manufacturers would boycot their tires. See? Their reason (the riders) being that they had learned by observation and experience that the Monarch stood the terrible strain better than any other make and that it runs lighter. It was business with them. Not sentiment.

# THREE OUT OF FIVE.

There were five professional riders en-tered for the races at Rock Hill on Tuestered for the races at Rock Hill on Tuesday last, 25th instant, as follows: Al Newhouse, Buffalo, N. Y.; C. B. Newhouse won the first race, one mile open, and got a Rock Hill buggy. There was only one other professional race and was only one other professional race and it was won by Huffstetler, who under the rules was given 240 yards the start of Newhouse. Coburn won second. So you see the Monarch was in front as usual. No man who rode a Monarch receives a cent from the MONARCH CYCLE CO.
