There are love stories that are simply sweetly told tales. There are others in which the love tale, sweet in itself, is made a part of an exciting plot.

"The House of Isstens" is one of the latter. It is a story of the olden time when there were knights and ladies and when fighting was natural. It is admirably told and fascinating from begin- Daily Daily

ning to end. One thing that induced us to purchase the serial rights of this story is the fact that, although intensely interesting, it is of a different order from the serials that we have heretore presented to our readers. It begins in TODAY'S issue.

About the Man Who Hid Defects

WITH Putty and Paint: Once upon a time, not so very long ago, there was a Buggy maker who didn't use very good material. "But," says he to himself, "I will FILL the bad spots with putty, and over all I will put nice shiny paint and then the bad material cannot be seen."

And the poor systems who bought

And the poor customers who bought from the manufacturer, soon found that 'All's Not Gold

That Glitters!' So come to our factory and inspect the

wood and iron material, and select your Buggy before there is a speck of paint on it. If you do this way, you can't be it. If you do this way, you can't be deceived; if you don't, you might.
