### Free Seeds.

THE ENQUIRER has received from Senator A. C. Latimer a limited supply of garden seeds (about 100 packages) and these seeds will be distributed with the senator's compliments to such of his friends as may see proper to call or write for them. call or write for them.

Folliott Butter Separator.

Folliott Butter Separator.

Mr. J. B. Bratton has secured the agency for the exclusive sale of the Folliott Butter Separator for York county. Call on him and give him your order for the Separator and it will have the best attention. The factory agrees to pay a forfeit of \$1,000 if the Separator does not do all they claim for it. The Folliott Manufacturing company makes eight different sizes, for two gallons up to 100 gallons and the price is in the reach of all. We guarantee the Separator will pay for itself in 180 days from the product of two cows on quality and quantity of butter made. It also saves 180 hours hard work at 10 cents per hour, which would be worth \$18.90. This Separator is something new, but good. It is a complete revolution in the art of making butter. The air is forced through the hollow shaft by the wheel in the bottom of the churn. It aeriates milk in five seconds and will keep from 10 to 18 hours longer perfectly sweet according to the time of year. The finest granulated butter is made in less than three minutes. If you have no cow, buy you a small separator and get a quart of 25 per cent cream and make a pound of butter worth 50 cents a pound. You will then have the milk left for strawberries, toast and coffee. The milk is just as nutritious without the butter fat. All the fattening qualities, such as casein and sugars are left in the milk. The best doctors in the country recommend this milk for infants. With the butter fat out it is easily digested. The air passing through the cream purifies the milk just as a running stream will purify itself on coming in contact with the air. The oxygen absorbs all impurities and is the only thing that will absorb bitter weed and onlon. Every separator is sold under a guarantee that it does the work. Simple in construction, anyone can operate it. It is a marvel of perfection in the art of making butter.

# MY METHODS

ARE FAIR AND SQUARE BECAUSE I DO YOUR BUSINESS BEFORE MAKING CHARGES. Some
think a broker should spend time and
money placing property before the public, and let the owner or some one else
sell it and leave him out, which would
not be just. It is also difficult for a
broker to "stand pat" and command
best figures when there are others
working on the same deal, cutting
prices for both profit and glory. To do
business, we must have stock in trade,
the larger, the better, as customers
usually go where they can find what
they want. Listing property with a
broker does not do it or the owner any
injury, as titles remain with the owner
until it is sold. It is a broker's interest
to conduct business in a satisfactory
manner to all interested, as his success
depends on the words of others. Clients
should furnish complete and honest descriptions of what they wish to buy or
sell, so interested parties will find it as
represented. Propositions, and not all
questions are the main factor to transactions. I am a high buyer for a code
which will teach how to transact business with questions only. Drive propositions and let questions rest, if you
want success and pleasure. Say what
you will do and if it is not accepted, it
is no fault of yours. My object is to
do business as speedily as possible, but
must have a customer, or nothing can
be done.

# The "DRUID"

Is the Sewing Machine That We Sell for Only

\$15.00.

If You Pay More You Pay the Dealer an Unreasonable Profit or Pay for a Name.

For about a year now we have been selling Sewing Machines at \$15 Cash. The machine that we are selling at this price is the equal of any machine sold on this market at three or four times the price in so far as good sewing, light running and lasting qualities are concerned. The only practical difference to be found between the machines we sell at \$15 and those sold on this market at \$30, \$40, \$50 and \$60, is the price. If you only want to buy a machine that will fill every requirement of the sewing room with a minimum amount of labor, our \$15 machine will fill every possible requirement. A \$60 machine will not do any more or any better work. This is a fact that is beyond dispute.

Is this machine guaranteed? It is guaranteed by the makers and the guarantee is further endorsed by us which we think makes the guarantee absolutely good.

The guarantee that goes with every machine we sell reads as follows:

We hereby warrant this Sewing Machine, No. to endure the natural wear and tear of family use for TWELVE YEARS and agree to replace FREE OF CHARGE, during that time, any parts that may prove defective, excepting only the wear and breakage of Needles, Bobbins and Shuttles. STRAUSS-SMITH CO.

The Druid machine is a high arm, nickel trimmed, and the frame is black enameled. It is a drop-head quartersawed and swell front oak case and has three drawers and extension table-leaf. Every machine is supplied with a full set of latest improved nickle-plated attachments.

Here are the names of some buyers of our \$15 machines: Miss Floride Bowen, Yorkville; A. W. Smoak, Filbert; W. R. Biggers, Clark's Fork; Mrs. M. R. Burns, Beersheba; Berry Burns, Yorkville; Mack Revels, Guthriesville; Mrs. Robt. Black, Yorkville; H. P. Thomasson, Yorkville; J. J. Ramsay, Hickory; Mary Hunt, Yorkville; Andy Love, Yorkville; R. B.
