Humorous Department.

LAWFUL DEBT, LEGALLY COLLECTED. -When Mike left the employ of Brother Rubbles, who keeps a country store and also "farms it" in Washington county, Maine, he owed a considerable balance to Brother Rubbles. Mike seemed quite willing to forget about it, but more intimate acquaintances of Brother Rubbles never lost faith that the account would be squared in due time.

After Brother Rubbles had ceased even to drop gentle hints about the little bill, Mike became the owner of lighted the heart of the lucky owner.

with my stock."

never heard it. At the first opportunity he went over to Brother Rubbles's barn, and brought away the sorriest-looking shote that ever lived.

The next day Brother Rubbles "levied" on the big hog. The law would not have permitted him to do that so long as Mike was the owner of only one pig.-Youth's Companion.

bryo professor proposed to a lady, afterward Mr. Duncan became Prono more of him, not even by letter.

Some time after she went to St.

point, said:

"Mr. Duncan, there was a subject you once mentioned to me some time for I have changed my mind since that time.'

The professor simply remarked: "Yes, but I, too, have changed my mind."-London Tit-Bits.

A. STRONG INDUCEMENT.-Senator a congratulatory call, said to him.

petition that the delegates had to of- this city, Mr. G. W. Kirkpatrick of

"Penrose, tall and straight and boyish, smiled and said in a low voice: "'If you don't grant it, sir, we'll have that speech repeated all over again to you."

NOT OLDER THAN SHE LOOKED .- A Brooklyn woman lately returned from Europe was describing to her husband, who had remained at home, her experiences with the customs inspectors who had taken her declaration in the cabin of the liner coming up the bay, and according to the Brooklyr Eagle, this is the conversation: "When he asked me my age," she

said. "I told him 30." "But, my dear," exclaimed the husband, "you're over 30."

"I know it," she returned; "but do

"No, you don't; that's a fact."

"Well," she continued triumphantly, convinced that mere man was squelched once more by the force of feminine logic, "until I look more than 30 I'm going to be 30, and I don't care for the old United States government and all the customs inspectors and declarations. They can't make me older than I look or want to be.'

THE ONE WHO WAS MAD .- A corpulent German came rushing into the circuit court one morning before court was called and said: "I vant to git varrant for a mar

to kill a tog." "Well, my man, you don't come to

this court to get warrants in cases of that kind. If you want the dog killed you should go to a police court,"

The German started to leave, when the judge inquired in an interested manner:

"Did the dog bite you?" "Yeas, he bit me."

"Well, was the dog mad?" "Vas de tog madt? No. I vas madt."-Buffalo Commercial.

PROPRIETARY RIGHT .- Little Edith had spent an afternoon busily searching with nimble fingers through the soft fur of her pet kitten, says Lippincott's Magazine. When she was

a little flea on kitty, and I caught for some time and death resulted

"What did you do with it?" asked her mother.

of course. It was her flea." to "Yes," said Henpeck, "the thing that impressed me most in Egypt was

"Why, I put it back on kitty again

the mummy of one of the ancient "What was remarkable about it?" "The fact that they could make her dry up and stay that way."

Easy to Shoot Rattlesnake's Head Off.

In this wide world there are several things that are swifter than a rattlesnake, but they can probably be counted on the fingers of one hand. One of these things is a bullet, whereby hangs the explanation why it is easy to shoot the head off a rattler although a marksman finds it difficult to place a bullet along the fat, seven foot line between the neck of the reptile and the tip of its tail. It has long been regarded as a

curious coincidence that even the man not famed for accuracy has had no trouble in blowing the head off a diamond back. In the diamond back country only one explanation is offered for this-it is the snake and not the man that does the aiming. At close quarters, the instant the

muzzle of a six-shooter is thrust toward a rattlesnake, the infallible eye catches the range and in the fraction of a twinkle the deadly head has aligned itself. As the gun roars and darts its tongue of flame, the head of the creature is torn clean as if severed with a knife and the viper lies writhing, emitting a defiant ratceases its beat .- Pearson's Magazine.

THE MODERN TORPEDO.

Takes an Important Place Among De-

structive War Materials. The original inventor of the torpedo was David Bushnell of Connecticut, who flourished during the American war of independence. His torpedoeskegs of gunpowder—were secured to a ship's bottom by the aid of a submergible boat, and fired by a time machine. The vessel containing the submergible boat was sunk by the British, and the boat itself badly damaged.

Bushnell then determined to float his kegs against the British ship by aid than twice over." of the tide or by a towing line. By way of preliminary experiments he blew up one or two hogsheads in ponds. Then, in 1777, he went forth in a whaleboat and launched one of his kegs against a British frigate, the Cerebus. The official report of this experiment, written by Bushnell himself, reads rather quaintly.

"This machine fell in with a schoon er at anchor astern of the frigate, and oncealed from sight. By some means or other it was fired, and demolished the schooner and three men, and blew the only one left alive overboard, who was taken up very much hurt."

In 1778 the Americans floated a number of Bushnell's kegs down with the tide against the British shipping on the Delaware, "but the British, fearing the making of ice, had warped in their ships to the wharves, and so escaped much of the intended mischief."

Various inventors followed in Bushnell's wake, but none of their torpedoes was a success. At length a Captain Lupuis of the Austrian navy prooosed a torpedo which should float on he surface of the water and be directed by ropes from a fixed base. The Austrian government thought the suggestion was not feasible unless Lupuis could devise a reliable independent motor. He consulted with Mr. Whitehead, the English manager to an engine manufacturing company at Flume. Whitehead saw that there was something in the idea, though Lupuis' device was crude, and set about inventing a torpedo by himself. In two years he produced the first Whitehead torpedo. It was charged with eighteen pounds of dynamite, and its speed was six knots. The great defect was that it would not keep its proper depth. Sometimes it skimmed the surface and sometimes it plowed the bottom. In 1868 however, Mr. Whitehead invented the "balance chamber," which keeps the torpedo at the right depth. The secret of the "balance chamber" was kept till 1894, the Austrian government refusing to deal. Whitehead offered his torpedo to other powers, and Great Britian

asked him for two. After exhaustive trials the committee appointed by the admiralty to try the torpedo reported that a stationary ship might be fired upon end on with every probability of being struck at 200 yards; a ship at anchor might be struck broadside on at a distance up to 400 yards, and that a ship moving at a moderate speed could be struck with a fair degree of certainty up to

out done by the up-to-date Whitehead were deemed satisfactory. "In spite of the protests and sneers of the old gunnery school of officers," says Lieutenant Armstrong in his invaluable work on torpedoes, the English government purchased the secrets and rights of manufacture of the Whitehead torpedo for \$75,000.

Other nations followed suit, and the Whitehead is the torpedo of today. It is made in various types, and its charge ranges from sixty pounds to 300 pounds of guncotton, its speed from twenty to thirty knots an hour, and it can be relied upon up to 800 yards-almost half a mile.

Russia has several factories where Whiteheads are manufactured. Her favorite type has a charge of 300 pounds and a speed of thirty knots In 1897 Japan ordered 150 Schwartzkopf torpedoes, a Berlin made variety This order was promptly completed. Afterward Japan ordered a consignment of Whitehead torpedoes, each to

have a 200-pound charge and a speed of twenty-five knots. England's torpedo fleet is, of course, the greatest of any. Alan H. Burgoyne, in his complete and up-to-date book or "Submarine Navigation," says:

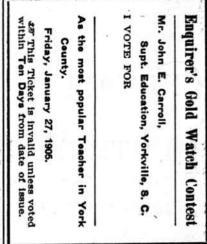

"That country has in its service something between 4,100 and 4,500 torpedoes, each capable of sinking the most powerful vessel affoat if hit in a vulnerable place. Even if half of these were to take effect on the combined war squadrons of the world (including obsolete and torpedo craft) the fleets of the universe would be sunk mor

This is especially encouraging in veiw of the Japs' recent exploits with the torpedo.-From the St. Paul Globe.

LUCKY MAN .- In crossing the ocean a father and son both became very seasick. The father recovered quickly but the son was so exhausted with the attack that he sank into a state of apathy, from which it seemed impossible to arouse him.

The steamer physician, thinking he would try a sudden shock, said: "I have bad news for you. Your father is dead!"

The son, raising his expressionles eyes to the doctor, replied, "Lucky man!"

TAX RETURNS FOR 1905.

Office of the County Auditor of York County, South Carolina. YORKVILLE, S. C., November 29, 1904 NOTICE is hereby given that the undersigned, Auditor of York county, will meet the several taxpayers of said county at the places and times stated, to receive their TAX RETURNS for 1865 TURNS for 1905, of PERSONAL PROPERTY and such CHANGES IN REAL ESTATE as have taken place

SINCE JANUARY 1ST, 1904 by pur chase or sale.

ALL NEW BUILDINGS ERECTED SINCE JANUARY 1ST, 1904, must be reported, otherwise the penalty for nonreturn attaches. Township assessors and special assessors are required by law to report all delinquents in this

The law requires taxpayers to list their property at what they believe to be its "market value." A tax return, in due form, will be re

quired, and any return which says "SAME" or "NO CHANGES" is not in conformity to law, will not be filed. All returns must be sworn to before the auditor, his assistant, or other officer duly qualified to administer ar oath. When parties so desire, they can

make returns under oath, on the proppublic, or other officer qualified to ad minister the same, and send by registered mail to Auditor, at Yorkville, S. before the 20th day of February For the purpose of receiving returns, the Auditor will attend, either in per-son or by assistant, at the following

places and at the times stated: At Rock Hill, Friday, Saturday, Monday, Tuesday, Wednesday, Thurs-day and Friday, January 27, 28, 30 and 11, and February 1, 2 and 3.

At Yorkville from Saturday, Febru

ary 4th until Monday, February 20th, inclusive.

All males between the ages of 21 and 60 years, except ex-Confederate soldiers above the age of 50 years, are liable to \$1 poil tax.

Taxpayers, liable to poll tax, are specially requested to inform them selves as to the number of the school

district in which they reside Taxpayers are requested to examine their last tax receipt and see that the number of acres, lots, etc., are correctly reported.

25 I respectfully request taxpayers to

meet me in their respective townships in order to avoid a rush at Yorkville during the closing days.

W. B. WILLIAMS, County Auditor.
