## THE YOREVILLE ENQUIRER.

## Scraps and Lacts.

- The Democratic members of conto cut down the Democratic representation upon the house committees to five members. The speaker's plan, the Democrats assert, will, if carried out, cause all kinds of trouble in the minority ranks, and in order to avoid hard feelings among his followers the minority leader, John Sharp Williams, may refuse to recommend any appointments.

- A large number of prominent colored men from all parts of Texas and other southern states met at Houston last Saturday in convention to consider ways and means for preventing the frequent occurrence of the crime of rape in sections where there is a large negro population. Among those present are a number of leading colored ministers and educators. It is expected that an education-

al campaign among the young colored men will be begun soon, in the hope that it will have a beneficial effect upon the moral status of the young negroes.

- London Daily Mail: Several British subjects who have returned to Cape Town from German Southwest Africa tell extraordinary stories of the hanging and shooting of women and children by the German columns operating against the native rebels. A young Transvaal Dutchman named F. Wepener stated that at Okanjiso eight women and six children were "strung up to trees by the neck and then shot. The Germans said they were spies, but they were captured with the natives with whom we had been fighting, and

some of the children could not have been older than five. All the women and children we captured on the march were treated in the same way. I have seen at least twenty-five of them hanged and shot."
