Dear Sir: A man fed his hens half meal and half saw dust; he thought they wouldn't know the difference. He concluded they did when the eggs hatched woodpeckers.

Another man painted his house with a paint that was made of half paint-substitutes. He didn't know the difference-not till he paid the painter. He had twenty gallons to pay-for, 20 instead of 10. Got fooled \$12.50 He had 20 days' wages to pay-for

Newspaper Readers

Are more or less familiar with the insurance scandals uncovered by the investigation in New York last year. On the recommendation of the committee that conducted the investigation radical changes were made by the New York legislature which was in session for several months in the early part of this year, to become effective January 1, 1907. To comply with this law every life company doing business in South Carolina today, except the Mutual Benefit, will be forced to make radical changes in most of its policies and business methods if it continues o do business in New York after Jan uary 1. The Mutual Benefit will continue without changing a word in any of its policies or making any change in its methods of doing business. The new law is intended to protect every interest of the policy holder and that is what the Mutual Benefit has been doing since the day it was organized in 1845, and that is why it is recog-nized all over the United States as being the best company and writing the best policy for the policy holder.
