Always Bear In Mind

The fact that Fire Insurance protection is something that you cannot buy just when needed, but must be bought when there is no special reason for supposing that it will be needed. The observation of all intelligent peo-

ple teaches that more property is destroyed by fire during January, Feb-ruary and March than in any other nonths of the year, notwithstanding he fact that the other months usually furnish their full quota. Your property may never burn, and it is to be hoped that it will not. If it does not burn and you do not pay out anything for protection you have saved just that much, but if it does burn and you every style that you could possibly desire. If you want a very handsome Gold or Silver Mounted Pen to present to a friend, I have it. If you have paid out nothing for protection, why then the company that might have had the risk has saved from a half to three-fourths YOUR loss. If you think you are more able to carry the risk than one of my time tried and fire tested companies I have no fault to find, but if you desire to shift the risk to people who are in the business I shall be pleased to advise with you as to what the cost will be.
