### TUESDAY, MAY 4, 1909.

## Scraps and facts.

- A terribly destructive cyclone swept down from the Great Lakes last Thursday, Friday and Saturday, and went out into the Atlantic at Savannah. As to whether it was a single big storm or a series of storms is not certain; but there is no doubt of the fact that the loss of lives aggregated hundreds and the property loss went high up into the millions. Although many people were killed in Ohio and Illinois, Tennessee was probably the worst sufferer, a hundred people being killed at various points in that state alone. The Cumberland valley suffered dreadfully. Eighteen houses were destroyed at Ebenezer, Tenn., and almost as many at Fayetteville. Many deaths are reported from Mississippi, Arkansas, Alabama and Georgia. Georgia reports about forty deaths.

- Raleigh special of May 1, to Char lotte Observer: Rev. Thomas Dixon father of Rev. A. C. Dixon of Chicago, and of Thomas Dixon, Jr., the well known author and playwright of New York, died here tonight, aged 90, at the home of his daughter, Dr. Delia Dixon-Carroll. His illness was very brief. He came here three weeks ago from his home at Shelby to visit his daughter. Rev. A. C. Dixon spent last week with him. Rev. Josiah William Bailey, so widely known among the Baptists, was asked to give an appreciation of this man of God. He said: "Rev. Thomas Dixon, Sr., was one of the noblest men and ministers our country has produced. In my judgment he was the last of the patriarchal type and one of the best. His ministry in Cleveland county was without a parallel in this state and not surpassed in all his history of the ministry. He baptized more than 5,000 believers and was shepherd of one flock more than sixty years. He was more than a preacher or pastor, he was the patriarch of a great tribe. In all things he was tried and in none found wanting." The funeral will be at New Prospect church, Cleveland county, at 3 o'clock Monday.

- Washington, May 2: The senate bill which deals with the maximum and minimum tariff proposition, has, in the judgment of tariff experts, one very important feature. It practically vests in the president the power to declare a tariff war against any nation, or to refrain therefrom. It is given to him to decide whether or not any nation is discriminating against the products of the United States. This permits the government to make agreements with other nations as to trade and tariff concessions which can be made effective by a proclamation from the president. In this way the delay can be obviated which would necessarily follow the submission to congress or to the senate of any proposition requiring such apauthorizes the president to employ at his discretion any persons to secure in- of it. formation or assist him in the discharge of these duties, which would

mean that he can appoint commissionwith foreign nations. Any change in ator Brice's appointment as a member the case of any nation, however, must be a change in the way of higher du- comment of the Lantern thereon. We

any reduction in the tariff law passed by the present congress. -New York, May 2: Wm. Travers

Jerome, district attorney of New York, radically departed from his usual attitude toward the public tonight by stepping before a large audience, members of the People's Institute, at Cooper Union, and declaring that he wished to explain the conduct of his office "to establish a precedent which would make it difficult for a public servant to dodge responsibility for his official acts." Heretofore Mr. Jerome has maintained a policy of silence as regards his office. But in his speech to- few days he will be employed could night he said: "It seemed to me that the public officers in this city, and generally in this country, were not sufficiently in touch with the persons who public servant should be appointed so

in written reports, where he could give the thing the color he wanted, not in newspaper interview, but face to face with the people who have the right to vote. During the seven years I have been district attorney, more than one hundred thousand criminal cases have gone through my office. As to many of them I could have no knowledge. As to others I had full knowledge. But I am not trying to avoid responsibilities for my acts nor the acts of my chosen assistants. I would rather have your approbation than disapprobation," he went on, "but I come here not for your approbation or disapprobation, so that it is in a sense immaterial whether I get it. I think I see an opportu-

an opportunity for making it difficult for other public officers to evade meeting the people face to face and answering their questions. And you need not be afraid of hurting my feelings." - Nairobi, British East Africa, May

ceeded slowly to the Mau hills. This

hardly be much of a temptation to him. Surely the Times must be laboring ators Tillman and McCumber, under misapprehensions in regard to the matter, for a newspaper that feels elected them. It seemed to me that a responsibility to the people it serves, would hardly be led into a wilful and that the senator from Minnesota (Mr. that from time to time he can account deliberate misrepresentation of the to the public for his stewardship, not facts. THERE is a good deal of talk in the papers about the plans of William Henry Pickering, professor of astronomy of Harvard university, to establish communications with the planet Mars. The professor's plan is to set up a great field of mirrors out in west Texas, or in some other locality where the atmosphere is rare and clear and to do his communication through powerful reflection of the sunlight. By means who is a man of courage, and daring of the mirrors, he proposes to project the reflected sunlight through a space of thirty-five or forty million miles, and did not know of them until that and to keep up his wigwagging until the

has led the Democratic forces of his state to victory after victory and he Maritans catch on to his signals and find a means of answering. As the nity for public service. I think I see dispatches have it, the professor says his speeches, one favoring a small duty on cotton seed oil and the other on the necessary apparatus will cost only a matter of about ten million dollars, and Texas people have advised him that they will have the money ready on: whenever he gets ready to begin his experiments. Now, while we confess that there is a certain kind of interest in all this talk, we also confess that

native followers are joining with the the subject. Professor Pickering, of them some little part of this swill." Here the worm turned.
