The liquor people could hold election after election, with a view to establishing dispensaries, and after a dispensary was once established, there was no power in the state that could lawfully remove it. We are glad, however, that the Messrs onzales have seen proper to notice hese charges and make denial of their ruth, for there are a great many people who are sure that Duncan's grouch is not altogether without foundation and in the absence of such a statement they would likely continue to confuse the innocent with the guilty. Our contemporary's position i Featherstone is a very able man of high purposes, and that he is in ne sense a crank. But there is nothing inconsistent in Mr. Featherstone's political record. uals. When the state was sodden with dispensary liquor, he understood how absurd it would be to appeal to it as a whole to come back to decency. He knew that there was no way to get attention except by appealing to the in dividual counties to stand for the right of having a say whether they should have prohibition or continue in th way they were going. The idea wor after a long fight. But just as an in dividual who has once been addicted to the use of liquor, reforms and goes back to drink, so counties and states ty are liable to the same danger. The state is now prohibition with the exception of six large counties. There is still a large minority of liquor people very materially remedied by filling up in each of the dry counties.
