DON'T PUT

It's not too late to sow at least two bushels of wheat. It does not take long to prepare two acres of good land. It does not cost a fortune to pay for two sacks of fertilizer. It rests two acres of land. If you sow in April, and acres of land. If you sow in April, and think the wheat is no good you have two acres of land you can plant corn on, and it will pay in the long run to sow some wheat. It comes in a splendid time when most people need it, and if a good, if a fair crop, just sow four bushels of peas on the land and see how much hay you will get. The land will be worth from \$3 to \$5 an area for the next crop. Such elegant acre for the next crop. Such elegant weather to sow wheat and it will pay!
