Bumorous Department.

The Other Barrel,-"Speaking of the wild west," smilingly remarked Thos. B. Dunn in the lobby of a Washington hotel, according to the Philadelphia Telegraph, "reminds me of a story of a hostelry in the sage bush country.

"Sometime ago," continued the congressman, "a traveler who stopped overnight at the aforesaid hostelry noticed that instead of ringing a bell or sounding a gong at meal time the proprietor went to the front door and fired a double-barrel shotgun. Later in the evening the traveler commented on the strange procedure.

"That is a novel idea of yours, he smilingly remarked to the proprietor, 'calling your guests by fir-

ing a gun. 'Yaas,' drawled the proprietor, but it generally fetches 'em around

in time for sayin' grace.' "'Yes,' admitted the traveler. 'But pardon the question, why do you dis-

charge only one barrel?" "'Wouldn't do to shoot 'em both, answered the proprietor, 'I have to keep t' other barrel to collect pay for the meals an' lodging."

Proved His Claim.-While a building quarrel. So violent was it that the police were called in and the offenders taken before a magistrate. Both of the men were sober and industrious and good workmen; this, according to the testimony of the foreman in charge of their work, who had followed in hopes of being able to intercede for them. The magistrate asked, in astonish

ment, the cause of the quarrel. It seems that one man had accused other of stealing his coat. "And I can prove it, too," added the

"How?" asked the magistrate.

"I always keep my card in the pocket." said the man. The policemen were directed to

earch the garment. But they found bsolutely nothing. "Gimme my coat," said the workman. It was handed to him. He took two dried peas out of the pockets and held them up triumphantly. "P. P. Peter

Powel. That's me name. Them's my card. He got his coat.-New York Globe. The Supreme Test .- "What make

you think that you really love me?" she said. He thought for a moment before he

replied, and then he said: "I am willing to button you up the back all the rest of your life."

"That is something, but is it all?" "I am willing to let our house be run by strangers, and that you should ever remain in entire ignorance of its management."

"Rather good. Anything else?" "I am willing that we should have o children, so that you will be able o go to Europe whenever you want to, entertain your friends, and not be tied down."

"Good! And is that all?" "Is this not enough?"

"I suppose it ought to be, but I was n hopes that you would say you were willing to have me wear anything I pleased all the rest of my life, no matter how really ridiculous it was."-Judge.

Thought He Was a Publican.-A story of the Duke of Argyll is being told in connection with a recent trade exhibition at Olympia, London. The duke paused at a stall to ex-

mine some patent chimney pots. "I'm troubled very much with smoke at my house in Scotland," he said to the attendant. "You may send me some of these chimney pots."

"Certainly, sir," said the attendant, who did not recognize his customer. "May I ask your name and

"Send them to the Duke of Argyll, at Roseneath," replied the duke. "Yes, sir. But what name?" asked the attendant.

But the duke moved off and some body kindly explained to the attendant who his customer was.

"Bless me!" remarked the attendant,, "I thought he was a publican and I took 'the Duke of Argyll' to be the name of his pub." -- Answers.

Saving the Waifs .- A story is told of a man in this section who has a son who is a deep thinker and somewhat experimental. In the past he has carefully watched his father as he would partially smoke a cigar and then place the remainder in the ash try, hours later to pick up the cigar and Sometimes the father would have two or three "butts" awaiting his pleasure. His son took deep interest in the matter. Not long ago the smoker picked a partially smoked cigar from his ash tray and lighted it. The boy watched with more interest than usual, and remarked a few minutes later: "Papa, is that a

good one?" "Yes, that's a fine one," remarked the satisfied father. To this the son replied: "I thought

church."-Sodus Record. One on the Warden .-- An elderly churchwarden in shaving himself on Sunday before church time, made slight cut with the razor on the extreme end of his nose. Quickly calling his wife, he asked her if she had any court plaster in the house. "You will find some in my sewing basket,' she said. The warden soon had the cut covered. At the church in assisting with the collection he noticed every one smile as he passed the plate, and some of the younger people laughed outright. Very much annoyed, he asked a friend if there was anything

"Well. I should think there is." was the answer: "what is that on your

wrong with his appearance.

"No," said the friend. "It is the label of a reel of cotton. It says, 'Warranted 200 yards long."-New York

The Way It Was.-It was a cold day in December and the superintendent that they have a dull heavy feeling of a charitable institution was examining a number of poor children as to their claims for more comfortable clothing. Margaret was under examination. She was pinned up quite

securely in a thin shawl. "Have you any clothes at home?" she was asked kindly.

"What have you got on?" "Please, this is me aunt's shawl, I."-Everybody's Magazine.

BETHEL IMPROVEMENT Large Turnout at the Chapel Last

Saturday MEMBERSHIP PASSES HUNDRED MARK

Dr. Dulin Reads Interesting and In structive Paper on How to Keep the School Room up to the Highest Standard of Healthfulness and Com-

Clover, R. F. D. October 13 .- Fully one hundred of the one hundred and twenty-eight members now constituting the total enrollment of the Bethel Improvement association were pres ent at the meeting held at Bethel Chapel last Saturday night, and as interesting, but pleasant and profit-

Dr. T. N. Dulin the president, was the programme was the reading by him of a highly instructive paper on the subject of preserving the health of the children in the school room. He emregard for proper cleanliness, proper was in process of construction two of lation, and gave full instructions as to Second, because each child ought to

> by several of the members, including ual desk is used. Miss Lottle Belle Simril, G. L. Suggs, Water Supply and the Common Drink-W. P. Boyd and A. C. Harper, the two first named speaking at some length and the two last named more briefly. school house was selected as the place have tubular wells; but if we do not

in's paper:

"As some of our schools are already open and others will be open in the deal worse by an open vessel and the near future, it occurs to me as especially fitting that our attention be di- the pupils of a school is suffering from rected to some of the things in connection with them that suggest room influenza or any of the contagious disfor improvement, and I am sure that we cannot fail to profit by due consideration of the subject.

"It is needless for me to say that our school rooms should be kept clean; but when I say kept clean I do not mean simply sweeping and dusting.

in the majority of cases. "When we sweep our floors we usu ally raise a cloud of dust and this dust is usually laden with disease producing germs. One of the ways to keep down the dust is to sprinkle before weeping, but this causes the dirt to stick to the floor and to that extent contracted from drinking after some operates against the object sought. Nevertheless, however, it is better to sprinkle before sweeping than to sweep without sprinkling.

"The floors of all school rooms should be mopped at least once a week with some antiseptic solution such as improve along these lines in our homes say Kreso, of from one to fifty to one as well as in our public places." one hundred. I mean by this one pint of Kreso to fifty to one hundred pints of water. There are other antiseptics just as good if not better than Kreso, and I only mention Kreso be cause it is cheap, and can be purchas ed at almost any drug store. Tarce and many other coal tar products are as cheap and just as good as Kreso as

a disinfectant. "Further, our school rooms should be disinfected once a month with a solution of formaldehide. One pint of a forty per cent solution is sufficient for room 12 feet wide by 15 feet long and rom 9 to 12 feet high. The way to use this disinfectant is to close all the doors and windows and sprinkle of throw the desired amount of formaldhide over the room. Keep the room closed for twenty-four hours and then open it in order to admit fresh air. The ormaldehide may be introduced on Friday afternoon after the dismissa

of the school. Then let the doors windows and other openings be closed until Saturday afternoon. Open the room up on Saturday and let it remain open until Monday morning when i will be ready for use again withou danger or discomfort to the occupants. Formaldehide will not injure anything or stain the most delicate fa-If it is properly used by the method described our children will no be liable to contract diseases from that class of germs which remain in houses from year to year, and we will save doctor's bills, as well as a great

deal of anxiety.

"Of course, every school room should have plenty of fresh air and as a mai ter of fact most of them do not have jority of our buildings are constructed we cannot get sufficient ventilation. We frequently have twenty to thirty pupils in a room not over sixteen feet wide by twenty-four feet long by nine all, do not draw on the Bank of Futurhigh, but I am glad to say that this overcrowding is not as common as it was a few years ago. Instead of our school houses being

constructed after any old plan, with out regard to ventilation, light and you would like that one. I picked heating, they should be planned by our it up in front of the Methodist very best architects. But as the houses in which our schools are to be taught at least for this year are already constructed, we need give this subject very little consideration at this We must do the best we can with what we have. We should at all times have a current of fresh air cir- ing his friends culating through every school room Windows may be raised three to four nches at the bottom and lowered six to eight inches at the top. Of course no one should sit directly in this current of air, especially if it is very cold or damp. All sashes should be up at often comes around for his wages benight in order that the air may circulate freely. You need not be afraid ing his salary to a money shark; then, of the so-called 'deadly night air.' for more people are in their graves for lack of night air than have ever been injured by it. We must have fresh air oh, yes! He wins and pays it back. to brighten our minds, renew our This encourages him to borrow more

> "Almost every one has experience feeling somewhat like this: After sleeping all night in a close room they find when they wake in the morning about the head, breathing slightly op-

> pressed and in every way feeling badly. This is caused from lack of oxygen or sleeping in a room without the proper ventilation. This same person finds that this feeling is relieved in a

into the air.

our school houses be so arranged that lack of physical exercise, bad air, ex- the clothing taken to sea by the capan'-me dress is next, an' then comes the pupils get the best light obtain- citement, form a devil's monopoly of tain, the whole being illustrated .- Na able. But as our houses are already bad things.

constructed we will have to make the best use of the light we have. Pupils should not sit up facing the light but should either be to the side or back and preferably from the back, and there ought to be sufficient light to enable one to see in any part of the room without straining the eyes. This is mportant, as many children have defective vision anyway, and deficient light will intensify this defect. All children should have their eyes examined by a competent eye specialist.

Heating. "All school rooms should be properly neated as no one can study when shivering from cold or sweltering from heat. The temperature of the school room should be kept at about 70 degrees Fahrenheit and of course we must have a reliable thermometer in order to regulate the temperature. Fires must be started and kept up one to two hours before school time in exusual the proceedings were not only tremely cold weather if we expect to raise the temperature to 70 degrees Fahrenheit by the time school opens in the morning. There must be an open in the chair, and the leading feature of vessel on the stove filled with water so that the air may be moist.

Individual Desks. Our school houses should have individual desks. First because there is phasized the importance of a judicious less danger of contracting disease when each pupil has his or her own lighting, proper heating, proper venti- desk and is allowed to use no other. the tilers became engaged in a violent the best disinfectants and how to use keep a neat desk and be held accountable for any damage to same, and The paper was discussed in a very third, it is very much easier for teachpractical and comprehensive manner ers to control pupils when the individ-

ing Cup.

Every one will admit that we do not look carefully enough after the water Before adjournment, Free Silver supply for our schools. We should of the next meeting, and the last Sat- we must get water from a well or urday in October at 4 o'clock p. m., as spring that is in good condition, and not from just any spring or well. Of course, if the water is full of germs when taken from spring or well, it is bad enough, but it can be made a great common drinking cup. Suppose one of diphtheria, tonsilitis, mumps, measles. eases and uses the common drinking cup. In such a case it is easy to see that all are liable to have the diseas and it is not only the diseases above mentioned but also tuberculosis, syphilis and other more serious diseases that are contracted in this way. It will cost you a great deal more for medical attention besides the loss of time, care although this is about all that is done and anxiety, than it will to provide covered vessels with spigots and see to it that each pupil has his or her own drinking cup and teach them how important it is to use it. I believe a great majority of the contagious diseases are spread oftimes in this way. I mean one who has a contagious disease. I do not mean to say that we will eliminate disease entirely in this way, but

we will greatly curtail the spread. "Friends, let us try to carry ou these suggestions, for we all need to

GAMBLER CHEATS HIMSELF

Produces Nothing and Does no Good to Anybody. All forms of laxity in the religious social and spiritual spheres of our being, questionable modes of dress, dance in vogue-all are coming in for their share of discussion and consideration.

Recently Elbert Hubbard had to say about gambling the following: The amateur gambler is not necessarily a bad man-primarily his intents

He plays first simply for recreation then, to add interest, the game trans forms itself into penny-ante.

From this, to betting all the money he has, is a very easy evolution when the fever is on.

But to quit when you have won and not give your opponents a chance to win their money back, is more or less

He plays again-and loses.

Then he wants to get his money back. Of the morality of gambling, nothing needs to be said-all I affirm is that it is simply absurd to enter on a habit where success is defeat and to

win is a calamity. The successful amateur gamble graduates into a professional-he has to, for business men shun him. No man who plays cards for money can keep his position long. The fact is, none of us has a surplus of brains, and if you are going to succeed in business, all the power you have to your credit is

divine energy at your disposal. What are you going to do with it? If you draw your checks for this, you cannot for that-take your choice. And, above ity by breathing bad air, keeping bad hours and bad company.

The man who succeeds in business is the one who is in bed at ten o'clock at night: and only one thing he is jealous of, and that is outdoor exercise. Gambling robs a man of rest; and the keen edge of his life is lost in the shuffling of the paste-boards.

All he gives to his employer or world is the discard. Outside of the play he is a weak, inefficient person, and his weakness is very apt to manifest itself in burden-

The curse of gambling does not fall on the gambler alone, any more than his fault. Suffering falls upon everyone within the radius of the gambler. If if he can, he will borrow his pay be-

strength and make us more fit for all the next time. He is now obliged to play heavily be- grounds. cause his debts are accumulating. It is an old story, and dozens of men in Sing Sing can tell you all about it.

One bad feature of the poker game face with its cold smile. It reveals the habit of the gambler becomes fixed -he is a living lie.

In strict scientific economies consumes but does not produce.

THE VOLTURNO DISASTER ever stood on the sea beach and watch-

(Continued from Page One).

had received word from the Carma nia that she was hoping to be with us by 11 A. M. Life-belts were served out and put on each passenger. Food

Fire Discovered in Bunker. "At 9 a. m., the bunker was found to be ablaze. It being impossible to stop the fire in the bunker on account of gases, the watertight doors were clos ed and water poured down the No. 2 hatch onto the fire, but the fire was gaining all the time.

"At 11 a. m., the Carmania arrived and lowered a boat, but could not reach the ship on account of the high sea. Asked Carmania to look for No. boat. The steamship Seydlitz arriv ed and lowered boats, which could not reach us. About 3 p. m., the Carmania returned and tried to reach the ship with life-rafts, but all drifted past our bow too far away.

"Several steamers had arrived by dusk. The Kroonland put away boats which made four attempts to come alongside, but were swept away each

"At 9.30 p. m., the saloon and char house were flaming. The deck, bridge and all before the funnel were blazing fiercely. Pumps and dynamos stopped for want of steam. Men worked with the accumulators until 11 p. m., when the magazine on the bridge blew up carrying the aerial away.

Jumped Toward Rescuing Boats. "Several boats by this time wer laying off the ship and induced passengers to jump and they were rescued by boats. At 12 midnight, the weather was overcast and squally. Operations were suspended, it being too dark for boats to see. The fire meanwhile worked through the women's steerage to the after end of the ship, but we kept knowledge of this from the passengers who were quiet throughout the rest of the night.

"The chief engineer, the Marconi men and seamen and myself spent the night making small rafts in case the fire burned through the deck before

daylight. "At 5.35 a. m., the first boat arrived Weather and sea having moderated, poats were enabled to come alongside the ship, which enabled passengers to embark quickly. All the steamers lying around the ship sent boats. The passengers left in a very orderly way and there was no panic, women breaking down and crying when help was alongside, and all were off the ship by 8 a. m., about 400 passengers, I searched the ship myself and found no one else on board, so decided to abandon her, as the No. 3 hatch was well alight by now; so with remainder of crew embarked on the Kroonland. Ships that Gave Aid.

"Nothing at all has been heard of the two missing boats. Passing vessels were asked to keep a lookout for them. "I wish to express my heartiest thanks and gratitude to the captains of ships who stood by; also to the officers and crews who came to our assistance, for their bravery and endurce in their endeavor to come alongside the ship; also to the passengers of the Kroonland for their kindness to the rescued passengers, engineers and crew and myself, in fitting us out and doing everything for us.

Hamilton Carhartt, "Following are the names of the steamers that came to our assistance; Carmania, Grosser Kurfuerst, La Tou-ROCK HILL, - S. C. raine, Asian, Narragansett, Seydlitz Minneapolis, Devonian, Czar, Rappa hannock, also one steamer withou wireless. The ship was abandoned in YOUR CLOTHES latitude 48.30 north, longitude 34.57

JAPAN LEADS IN WHALING

American Ships Have Been Supplant ed by Those Flying "The Sun."

In the marble room of the senate Japanese visitor was waiting to see senator. The little man seemed placid to look as if they cared. Bring us as his eyes wandered up and down the your clothes or phone us and we will pages of a Japanese magazine, printed on a fine tissue paper, much like the light and filmy old-time paper napkin He explained that he was reading an at moderate prices. Prompt attenderesting account of whale fishing as tion given to work for Ladies who now carried on in the Pacific, which want Skirts Cleaned and Pressed. showed that the monopoly heretofore held by our New England towns of New Bedford and New London has been taken over by the sturdy little

Jap sailors, who have dreams of one day becoming masters of the Pacific. On the ruins of the American enter prises that largely led to its introduction into the family of nations, Japan has built up a great whale fishery The American consul at Hakodate Japan, recently made reports on this interesting subject, tracing the industry from the year 1820, when the American whaler Marco, commanded by Captain Joseph Allen, and an English ship, in charge of Captain Coffin, of Nantucket, visited Japanes waters, and in three short months

'filled up" and sailed for home. These waters, of course, soon be ame a favorite whaling ground, and in 1850, out of 543 whalers sailing under the American flag, fully 100 cruised in or crossed the Japanese grounds -in fact, the importance of this American fishery, the occasional loss of whalers on the Japanese coast and the inhumane treatment shown to shipwrecked crews, were among the principal reasons for the dispatch of the Perry expedition, which made the first treaty with Japan.

The American whaling interest has gradually declined until in 1908 one solitary whaler flew the Stars and Stripes on the coast of Japan. After Japan was opened to the world

few Japanese took up the business government in 1894 and 1896 sent se lected men to San Francisco and New Bedford, where they shipped as com mon sailors and landsmen on Amerifore he earns it, without first consultcan whalers. One of the Best

very best of the fourteen years that I have been representing the Mutual Benefit Life Insurance Company. The amount of business up to the company. The amount of business up to this time exceeds that written during all of 1912 exceeds that written during all of 1912 and that year was above the average with me. A noteworthy feature of the 1913 business is that about TWO THIRDS of it has been applications for more insurance in the Mutual Benefit by old policy-holders who had been insured in the Company from four to fourtern years and who knew four to fourteen years, and who knew by experience that the Grand Old Company was all that was claimed for it, and then some. Could the Company receive higher endorsement? A number of prominent policy-holders who also have policies in other companies, have voluntarily stated to me on various occasions that they were sorry that all their insurance was not in the Mutual Benefit. Brother, if you have no Life Insurance, you should have, and you can side-step further regrets by starting with the Mutual Benefit, and and are thinking of applying for mor you owe it to yourself to investigate the Mutual Benefit. I will be pleased to give you full information if you will call at my office, or advise me by mail that you want it.

SAM. M. GRIST, Special Agent.

SUCCESS

IS THAT POINT IN LIFE TO WHICH ALL EFFORTS
