DISABILITY INSURANCE There are comparatively few men who go through life from the time they are 15 years of age until they "go west" as the dough boy puts it, who do not lose more or less time from their daily occupations on account of disabling accidents or sickness, and as a rule they are not prepared to stand the financial loss, to say nothing of the doctor's bill and often hospital expenses and when they once get back in harness they find the burden they were carrying before they were knocked out greatly increased.
