

WIDESPREAD DISASTER

Texas Flood Damage Extends Over 10,000 Square Miles.

Houston, Texas, Sept. 12.—Reports of loss of life and property damage other than at San Antonio as a result of Friday night's deluge mounted steadily today with restoration of communication into the central Texas flood district.

Thirteen persons, mostly tenants in the lowlands, are known to be dead with a possibility of this being increased when more accurate reports are available.

Property loss is regarded as almost beyond estimate. It is believed that the loss of growing crops may run into millions of dollars, while livestock losses will account for hundreds of thousands of dollars more.

Georgetown reports two persons dead and three missing with property damage of approximately half a million dollars. Sixteen inches of rain in 24 hours sent all streams out of bounds and cattle and cotton in the lowlands are a total loss.

In addition to the thousands of square miles of central Texas already hit, more southern sections now are menaced by the onrushing water.

The San Marcos river is on a rampage, much haled cotton has been washed away and ungathered crops are almost complete losses, reports indicate.

The Little river and Big and Little Brazos also are running wild. Calves and hogs report five dead from the streams and property and crops damaged about \$1,000,000.

At Bastrop, in Brazos county, the Colorado river went over her banks Saturday night and did great crop damage.

At Hearne, the Brazos, and Little river tonight were falling, but great damage is left in the flood's wake. Six negroes are known to be dead.

An area four miles wide from Temple to Hearne was under water at an average depth of 15 feet, reports state.
