Agricultural Societies.

The following article from the Lynchburg (Va.) News, on the subject of Agricultural Societies, is quite as apppropriate to this State as to Virginia; and we commend it to the attentive consideration of our readers :

While everybody is so deeply concerned for the reconstruction of the Union, it is somewhat remarkable that so little attention is given to a subject of equal, if not of paramount, importance-the reconstruction of the State in her social and industrial interests. The impression seems to prevail to a great extent that everything depends upon the admission of our Senators and Representatives to the Federal Congress, and national politics, consequently, absorbs the popular attention to the exclusion of domestic and local affairs. Now, while it is conceded that representation in the National Government is a very sacred and valuable right, yet there are interests nearer home of even greater practical importance to every citizen of the State-interests so intimately connected with our prosperity as individuals and as a people, that they are really indispensable to it. The success of the President's policy, the admission of our Congressmen, and the restoration of our State to a position of perfect equality in the Union with all the other States-desirable as these things are, they will not cure our worst ills, they will not restore our lost fortunes, nor put into our pockets the money necessary to meet our wants. It is not a doctrine of sordid materialism that the dearest interests of a people depend upon the development of their natural resources and the increase of their wealth. Money or wealth, as a means is a sine qua non: food and raiment for the body, education for the mind, cannot be procured without it. It is required

canals, for erecting churches, and for the support of ministers and teachers. A sage has said, "The greatest public benefactor is he that causes two blades of grass to grow where only one grew beculture is our chief resource as a people - The pursuit in which we cannot ask and to this fact are we mainly indebted God's protection must be criminal; the for the nobility of character for which the South is distinguished. Whatever, then, may tend to the improvement of agriculture has a just claim upon the attention

for building and keeping up railroads and

I never knew you to pay anything that us. He cannot be wise or innocent who looks with careless indifference upon any measure of enterprise tending to the promotion of general prosperity. It is in this view we arge the propriety of resuscitating the State Agricultural Society and the revival, under its auspices, of the annual Fairs, which created such a wholesome interest in the popular mind before the war. The industrial pursuits and interests of our impoverished section need every stimulus that can be applied to them. Nor let it be supposed that the see beyond a present temporary advantage, often obtained at the price of future permanent injury. Especially in agricul-ture, will it not do to labor with reference merely to immediate gains, without regard to the future. The worn-out old fields all around us attest the folly of such a policy. What we want is, that generous rivalry among the tillers of the soil which the comparison of results at the fairs naturally inspires, that intelligent bines the elements of success drawn from various and numerous experiments. The estem of annual Fairs is the most effi- of the world, it seeks in seclusion to minlately whie afflicted with a bad cough, cient agency for producing these results that has yet been employed, and deserves

But there are many more benefits re-sulting from Fairs. It gives to the farmer and his family an opportunity for pleasant and profitable recreation, once a year, in a visit to them, where they meet with a vast concourse of colaborers and kindred spirits, have an opportunity of inspecting and procuring the latest improvements in agricultural machinery, and buying and selling superior stock and seed; and they learn, by the most infali-ble tests, the extent of the State's resources, and the relative value of lands in the different sections. The advantages of these Fairs to mechanics are too obvious to be repeated, and to all classes, indeed, the benefits to accrue from them seem to us perfectly apparent. We call upon our brethren of the Press, then, in all portions of the State, to raise their potent voice in advocacy of the early resuscita-tion of these powerful engines of material prosperity and enlightened advancement.

The Richmond correspondent of the Danville Register tells the following anecdote about Gen. "Alleghany" Johnston, on the march to Bristoe Station in the tall of 1863. The General was riding

"I say there, what are you doing up there? Why ain't you with your regi-

The Winter of the Heart.

Let it never come upon you. Live so that good angels may protect you from this terrible evil -the winter of the heart. Let no chilling influence freeze up the foundations of sympathy and happiness from its depths; no cold burthen settle over its withered hopes like snow on the faded flowers; no rude blasts of discontent moan and shriek through the desolate chambers.

Your life path may lead you amid trials which for a time seem utterly to impede your progress, and shut out the very light of heaven from your anxious gaze.

Penury may take the place of ease and plenty; your luxurious home may be exchanged for a single low room, the soft couch for a straw pallet-the rich viands for the coarse food of the poor. Summer friends may forsake you, and the unpity-ing world pass you with scarcely a word of compassion.

You may be forced to toil wearily, steadily on, to earn a livelihood; you may encounter fraud and base avarice which would extort the last farthing, till you well nigh turn in disgust from your fel-

low beings. Death may sever the dear ties that bind you to the earth, and leave you in fearful darkness. The noble, manly boy, the sole hope of your declining years, may be taken from you, whilst your spirit clings to him with a wild tenacity which even the shadow of the tomb cannot wholly

But amid all sorrows, do not come to the conclusion that nobody was ever so deeply afflicted as you are, and abandon every sweet anticipation of "better days" in the unknown future.

Do not lose your faith in human excellence because your confidence has been betrayed, nor believe that friendship is only a delusion, and love a bright phantom which glides away from your grasp

Do not think you are fated to be mis erable because you are disappointed in your expectations and baffled in your pursuits. Do not declare that God has forsaken you, when your way is hedged with thorns, or repine sinfully when he calls your dear ones to the land beyond the extra lot of Smoking Tobacco by the retail.

O. H. P. FANT,

Keep a whole trust in heaven through every trial; bear adversity with fortitude, and look forward in hours of temptation and suffering. When your locks are white, your steps falter on the verge of Death's gloomy vale, still strive to retain the freshness and buoyancy of spirits which would shield you from the winter

Home Virtues.

In the secluded scenes of home life, by influences direct and indirect, are many of those traits of character formed and tested which most ennoble our nature, and which are more serviceable to the world. In the outward intercourse of life, the thronging mart of worldly interest, the character assumes forms and expressions which do not belong to it. Blinded by self-love, or soothed by the flattery of the world, the heart is hidden from itself, and we appear, are for the moment, better than we are! But in the privacy of home the heart wears no holiday dress. It is there just what it is; and the thought speaks out its native language. To its virtues come thronging no public honors and praises. Home with its wide field of unobstrusive duties is spread alone before the eye of divine approval, and its labors are illuminated with the light of holy

Youth never wears a brighter beauty than when, leaving the gilded pleasures ister to the comfort of an aged or infirm parent. Nor does intellect ever beam with greater lustre than when the pride of reason bends to listen to the counsels of a mother.

little labors of love, and constant opportunities for trifling acts of kindness, like ish the heart in perfect symmetry. And & J. L. Arnold. doubtless a wise hand hath so mingled the cup of daily life that, by its calls upon our charity, patience, and self-control, we may be fitted for our nobler, higher home. Not a day comes without its peculiar trials; its duties which call for fulfilment glide away forever. The infant brother prattles, disturbs us, and passes on to manhood, but the patience his childish caprices fostered is our enduring possession. The infirm sister or parent calls now for ceaseless activity, self-denying effort; a few days, and the wild flowers tremble above her, and we rejoice in the privilege of having ministered. And thus with all the duties which flow from that sweet word—Home. They are the school for the highest talents, the opportunities for the noblest efforts, finally to be crowned with the "Well done" of heavenly ap-

LITTLE THINGS .- The preciousness of little things was never more beautifully expressed than in the following morceau by B. F. Taylor:

Little marten-boxes of homes are generally the most happy and cozy; little villages are nearer to being atoms of a shattered paradise than anything we know of, and little fortunes bring the most content; and little hopes the least disappointments.

Little words are the sweetest to hear; little charities fly furtherest and stay longest on the wing; little lakes are the stillest, and little tarms the best tilled .-Little books are the most read, and little songs the most loved. And, when nature would make anything especially rare

- About one thousand negroes, lately living in Georgia, Virginia and Tennessee will depart from this country for Liberia, about the first of next month. They go under the auspices of the American Colonization Society.
