ETIWAN GUANOS, SOLUBLE MANURES,

AND SULPHURIC ACID, MANUFACTURED AT THE

ETIWAN WORKS, CHARLESTON, S. C.

BY THE SULPHURIC ACID AND SUPERPHOSPHATE COMPANY.

THE new well-known ETIWAN GUANO is manufactured from the Native Bone Phosphates of South Carolina. These Phosphates in their natural state are insoluble, and require to be ground to powder, and made Soluble by Sulphuric Acid. This Company has now in operation the largest Sulphuric Acid Chambers at the South, and are, therefore, able to manufacture at the lowest rates, the highest grade of Fertilizer; it being clear that the greater the proportion of Soluble Phosphate which any Fertilizer contains, the less the quantity required per acre. In order to make the Fertilizer complete, Ammonia and Potash in sufficient quantities are added. With these views the Company manufacture and offer for sale

Warranted to contain from 15 to 20 PER CENT. OF DISSOLVED BONE PHOSPHATE OF LIME, and from 2 to 2 1/2 per cent. of ALUMINA, with a sufficient addition of PERUVIAN GUANO and POTASH, to adapt it to all crops. Price \$63 per ton, cash; on time, \$70 per ton, and interest 7 per cent. per annum.

Of high grade, suitable for Manufacturers or for Planters, being in itself an excellent Fertilizer, and specially adapted for compost. As large quantities of Sulphuric Acid are used to dissolve the Phosphate, this will be found a cheap and convenient way to transport that material. The grade furnished will be from 18 to 20 per cent. Dissolved Bone Phosphate. Price \$40 per ton cash. On time, \$45, with interest at 7 per cent. per annum. Still higher grades will be furnished to order at an additional price per cent.

Specially prepared for composting with cotton seed and other plantation manures. Price \$35 per ton, cash; on time, \$40, with interest at 7 per cent. per annum.

At much lower rates, consisting simply of the Native Bone Phosphates ground to powder. Price \$20 per ton cash. On time, \$22 and interest at 7 per cent. per annum.

Mr. John H. Holmes. DEAR SIR: The GYPSUM submitted by you for analysis is the most remarkable I have ever seen for its freedom from impurities of every kind, containing as it does but one-third of one per cent. of insoluble matter. If it can be supplied of similar quality, it cannot fail to prove a great boon to Southern agriculture, as there is no crop to which it is not beneficial, whether applied alone or in conjunction with other manures.
