## EDITORIAL NOTES.

Governor Hayes says in his letter of acceptance that he only wants one term of the Presidency. It is a pity for him to be so modest in his aspirations, and yet not be able to have them gratified. He is one of the many thousands who are wanting things they cannot get.

Col. J. Wash Watts, of Laurens, published an article some time since showing that superior hay could be made of the common rag weed which grows in our fields after a crop of small grain. This is the time to cut and cure the weed. Our farmers should try this for themselves to test its practicability. If it can be made available as hay, the crop of rag weeds will decidedly appreciate in value:

Colored men, vote for Hampton. He is a friend of your race, and to-day has his former slaves living upon his plantations in Mississippi. They are contented and prosperous, and love and honor the noble Carolinian who is nominated for Governor of South Carolina. He teils the people of this State that if he is elected he will be the Governor of the whole people, and will give equal justice to all classes of our people.

Ex-Gov. Wm. Allen, the rag baby fanatic of Ohio, says that Tilden's letter of acceptance enunciates the policy of his party on the finance question, and that it is "a shrewd, able, statesmanlike per." He considers it the "germ of future reform," and will vote and labor for his election. The Democracy of the Union are sinking all differencies in the common effort to reform the national government, and victory will almost certainly crown their efforts.

The New York Times in 1871 spoke thus of Gov. Tilden: "Vote for Samuel J. Tilden. The voters of the Eighteenth Assembly District ought to esteem it an honor and a privilege to elect Samuel J. We appeal to every Republican to work and vote for him, and do so the more cheerfully-as we make this appeal-because he is an honest Democrat." General McClellan, who was one of the finest Generals in the Northern army during the late war, has written a letter strongly advocating the election of Tilden. He favors civil service reform, economy in public expenditures, and local self-government in all the States. The letter declares that too great and uninterrupted power is apt to lead it into corruption, and that the Republican party of to-day is unable to free itself from rings and effect a reformation. He desires a reform, and thinks the elevation of the Democracy to power will effect it. The letter concludes by calling upon his comrades of the war to support. Tilden. It will have a strong influence in Tilden's favor.

The President thinks our people have had a resting spell, and now wishes to tire them out again by this military interference which they then condemned. He and his party will have cause to regret his temerity before the Presidential election is over. The people of the United States are the sovereigns of this country, and the President cannot thwart their will by the use of troops.

A NEW FIRE EXTINGUISHER. The fire insurance companies are in a state of despondency just now. There seems to be a probability of their business with marked industry and capability. His administration was distinguished for being utterly destroyed. An "extin-guishing patent chemical solution" has been discovered, which, if recent experifairness towards all classes, and a rigid economy in the disbursement of public ments are of value, will put out the most funds. If the tale which is told here by Carl Burk, of his adventures on the steamboat by which he was returning to his home in New Haven be true, we may well ask ourselves when are we safe? That a man should be seized and thrown overboard from a steamer, plying between two large cities not many miles apart, and at a time when the boat was full of passengers, is a thing so remarkable as to be almost incredible. Yet there seems to be every reason to believe what the narrator says. He certainly was picked up, nearly exhausted, from the waters of the Sound, and every other incident that he has menhas been verified. We await further de-

velopments with interest. In the mean time about all that we can say is, that, if such an outrage be possible a very radical alteration will have to be made in the ar-Committee in the following statement: rangements of our steamers.
