Anderson Intelligencer. SO GOES THE WORLD.

BY E. O. ROBBINS. Our varied days pass on and on, Our hopes fade unfulfilled away, And things which seemed the life of life Are taken from us day by day ; And yet, through all the busy streets The crowd of pleasure seekers throng, The puppets play, the showman calls. And gossips chat the whole day long-And so the world goos on.

Our little dramas come to naught, Our lives may fall, our dailing plan May crumble into nothingness, Our firmest castles fall to sand And yet our children sing and dance, The merry-makers laugh and shout, The stars unmindful still shine bright, Unconscious that our light is out-And so the world goes on.

The house grows sad that once was gay, The dear ones seek their blessed ho And we may watch and wait in vain To hear their well-known footsteps con And yet the sunlight checks the floor, And makes the summer shadows long The rosebuds at the casement bloom, The bird pours forth his cheerful song-And so the world goes on.

And God goes on, and with our woe Weaves golden threads of joy and peace Guarding with his heart of hearts Our days of pain, our days of ease. He marks them all, the seed, the sheaves The dancer's smile, the mourner's tears And keeps them safe, His children all, Through all the great, eternal years— And so, thank God, the world goes on.

MILLIE'S FAULT.

BY H. A. DAVENPORT.

Millie Mapleton sat in an easy chair by an open window of the sitting room, her head leaned against the chair back, her feet resting on an ottoman ; the white hands were clasped loosely over the sewing in her lap, the dark grey eyes had a dreamy, unseeing look, and an unconscious smile was havoring upon her sweet mouth.

She made a pretty picture, that summer afternoon, yet she was even then yielding to her besetting sin of idleness. Perhaps that is too general a term-her fault was just this, she spent hours of precious time in day dreaming; she built beautiful air castles, where she dwelt with those she loved; she dreamed luxurious dreams that fuscinated her like some day that I remain with you." written romance; she followed for hours the leadings of her imagination in stories rembling. that were, according to her mood, exciting, sweet, or sorrowful; and while these dreams seemed to carry her into a different atmosphere, full of intoxicating delights, her daily duties were often left andone, and the burdens of the house the dose too bitter to take ?" fell the more heavily on her mother, who was already overworked; for she was a widow and poor, her only child besides Millie a helpless crippled boy, of twelve years, and in the family also were old Mr. and Mrs. Aiken, distant relatives, who, though they added very much to three months." the small income by the liberal price they paid for board, were yet a great addition to Mrs. Mapleton's care and habor. PREPARED BY H. R. STEVENS, Boston, Mass.

What is Vegetine?

What is Vegetine? It is a compound extracted from barks, roots and herbs. It is Nature's Remedy. It is per-fectly harmless from any bad effect upon the sys-tem. It is nourishing and strengthening. It acts directly upon the blood. It quiets the nervous system. It gives you good, sweet sleep at night. It is a great panacea for our aged fathers and mothers, for it gives them strength, quiets their merves and gives them Nature's sweet sleep, as has been proved by many an aged person. It is the great Blood Puritier. It is a soothing remedy for our children. It has relieved and cured thousands. It is very pleasant to take; every child likes it. It relieves and cures all diseases originating from impure blood. Try the VEGE-TINE. Give it a fair trial for your complaints; then you will say to your friend, neighbor and acquaintance, "Try it; it has cured me."

VEGETINE for the complaints for which it is recommended, is having a larger sale throughout the United States than any other one medicine. Why? Vegetine will Cure these Com-plaints.

lowing this fault of hers; she was losing the power of controlling her thoughts, and of doing vigorous brain work when occasion required. In this also she did not realize the effect of her castle building. She had never comprehended, perhaps never even thought about the weakinfluence of an uncontrolled, undisciplined imagination.

But Millie certainly knew that she ought to be busy at work at that mo-ment; for on the next morning they ex-pected her mother's brother, Prof. Morehead and his wife, for a visit of a few days, and this sewing her mother wished to have finished before their arrival. Somehow Mrs. Mapleton was always in a state of nervous anxiety before and during those visits, chiefly because Mrs. Morehead was so oppressively wealthy and grand, and aristocratic, and had the art of making people of limited means and luxuries feel that she was extremely condescending to endure their moderate accommodations. Partly, also, because of the awe they all felt for Prof. More head himself, for he was really a great man, a profound thinker, and one who had a wide-spread fame as an author and scientist.

Millie's work came out as usual. It was not done when night came, and so Mrs. Mapleton sat up after bed time and finished it, and the next morning the spare chamber looked as faultless as she could make it for Mrs. Prof. Morehead's. inspection.

But when the morning train came rushing in, and they watched for their guests, only the Professor came walking up the village street. After their greetings were over he explained that his wife had gone to Saratoga with some friends who were very anxious for their company, and that he had persuaded her to go alone with them and enjoy the summer in the way he knew she would like best, and let him spend the time in quiet rest. He was weary, over-worked, and almost sick. Would they not consent to take him in for the summer, and let him find health and relaxation in their quiet home and lovely peaceful village?

So it came to pass that the great professor spent nearly three months with them. A happy time it was, too, and fraught with good results, especially to Millie. She learned to love very dearly the quiet, dignified gentleman, and al though her reverence for him was, if went away entirely free from that fear with which we often regard great men. She learned to know and understand him as she had never done before, and when a few years later the grand head was laid low in the grave, she grieved and mourned for him as for a father. The professor had been with them but

a few days, when one warm afternoon found him seated, boo. in hand, in the shady sitting room, the coolest, and cosiest room in the house. He occupied a large, easy chair, and was apparently absorbed in his reading. But for all that his eyes occasionally wandered over to Millie, by the open window, with her sewing in her lap. She was in the same mood as the first day we saw her-fitful smile. spells of working, then the hands dropped loosely in her lap, the dreamy smile came over her mouth, and the far-off, yet eager look, into her eyes.

Two or three times the professor watched her with an air of interest and keen penetration. At last he said to this maiden of sixteen:

"Little girl, tell me where your thoughts have been wandering? 'In fairy land, I think, by your eyes." But for answer Millie only looked down, and smiled, and blushed rosily.

"Why not give me a little clue to the thoughts that were evidently so pleas-

ant?" persisted he. "May be I was in a sort of fairy land." she laughed. "Any how, in my land of dreams and stories, as mother calls it, I expect it's very foolish, but then," with another little laugh, half brave, half bashful, "I save the money and time it | that belongs to the Indian summer, when
