THE HAMPTON METHOD.

What Judge Mackey Told a Tar-Heel Re porter About Politics-Grant's War with Mexico, in Which the Judge will be a Camp-Follower.

From the Charlotte Observer.

Judge Mackey was in town yesterday. As the Judge likes to talk and the public likes to hear him, an Observer reporter was delighted at meeting with him in a clothing store where he was being fitted to an elegant cloth coat. Upon the exdisconcerted.

To induce the Judge's eloquence to break forth one has but to puncture a break forth one has but to puncture a hole in the dikes of the political sea. The reporter suggested Grant in the South and especially in South Carolina.

"I do not know a single Democrat in South Carolina who will vote for Grant south Carolina wao will vote for Grant in preference to the regular Democratic nominee; but, on the contrary, I do not know of any who do not prefer him above all other Republican candidates. His speech at Galveston was a slap in the speech at Galveston was a slap in the face to the Northern Republicans. Their the Southern nearly are a speech at the southern nearly are a serident that a terrible poison was slowly but surely permeating the man's whole system.

The physician, after a careful examination of the unwilling patient, cut open his skin-frem about the centre of his nose almost to the roots of his hair, and then theory is that the Southern people are but the Confederate army in citizen's

clothes—a full fledged bird waiting for a fine day to fly. Grant declared that they were loyal men, and that in another war-the blue and the gray would fight side by side, and another war, too, is contem-plated against Mexico in his scheme of centralization; and not only a third but a fifth and a sixth term. Texas now claims \$75,000,000 indemnity from Mexico for spoliations committed on the border. This claim is the excuse for the der. This claim is the excuse for the war, and Grant will rejoice in the opportunity of attacking this magnificent country, consisting of twenty-seven States, with 11,000,000 population. The blue and the gray will fight together, and, by a judicious distribution of military patronage in the South, the opportunity for which this will give him, he will become the hero of the South as wall as of the North. Two words will well as of the North. Two words will flock to Mexico to represent the Mexicans in Congress. The troubled 'Greaser' will cry out in the bitterness of his soul, 'Carpet-bagger,' and the Carolinian, the

from the North now. All we care for is to elect our candidate." I have no hesitation in saying that nominee of the National Democratic party; and in this connection I would say that there is no doubt that Grant only hope for the Democratic party is to oppose him with a champion of the civic idea. This is most probable, and it is strange that a man with the acuteness of Alexander Stephens should think to the contrary and advocate so strenuously the to oppose Grant with another soldier. He is an eagle's flight above any other Northern man as a military figure, and Hancock would be dwarfed. It is only when we come to Grant's civil life that his character becomes dark. For this civil exponent, however, give us anybody

The reporter then inquired as to the State politics in South Carolina, and the

Judge was in his element.
"You must know, sir, that there are three methods of dealing with the negro voters—three methods: One is to kill him. At the present price of metallic cartridges-11 cents-this can be done cheaply and easily; but this method has objectionable points. The obtrusive character which the United States government has assumed, and the general prejudice against cold-blooded murder which strangely inheres in honorable men, are among them, The next method is to defraud the negro of his vote, but this not only degrades the defrauded but the defrauder; and, again, honorable men do not like to degrade or be degraded. The last is the persuasive method, by which the negro voter is mildly reasoned into the conviction that the white man with whom his lot is cast is his natural ally. This is the Hampton method, and by it thousands of negroes have been induced to don the red shirt and vote the Democratic ticket. Hampton's name is now a benediction in every cabin in South Carolina. General Hagood is the associate of Hampton in this method and the sympathies of the people of the State, which have never a moment been estranged from Hampton, will demand that Hagood be the next nomince for Governor.

TILDEN NOT A CANDIDATE. "Care for Politics or Politicians."

Letter to the Boston Herald. NEW YORK, April 7, 1880. It has been reserved for a correspondent of the Boston Herald to first an-

The declaration of the gentle-man himself is not necessary to assure the country of this, for the unrelenting laws of nature will prove a negative to all such calls which a friendly convention or an enthusiastic majority of voters may have in contemplation for him. While the old gentleman's failure of physical powers has been most notable and rapid within a year, yet he holds on to the charms incident to a busy and active life with a determination that is most remarkable. He goes down town nearly every day, and is very attentive in giving directions concerning his vast business investments, which he assured the correspondent involved millions and millions of dollars. Both of his hands are palsied, one of them seemingly withered, as well as deformed and useless, while with the other he is barely able to hold a pen long enough to affix his name to such documents as necessarily require his signature. His whole system trem-bles violently at all times, and it seems an absolute certainty that the disease is

NOT HIS SHIRT .- Mrs. Jones was one evening busy embroidering some muslin: Mr. Jones sat looking at the rich display she was making and at last said: "Why don't you fix my under-clothing up fancy,

and lazy to take the trouble to put on the fancy work." Nothing more was said, but Mrs. Jones looked as though something had come into her mind that wonderfully pleased

A few nights afterwards, as they were retiring, Jones appeared to be anxiously hunting something he could'tfind, and at last, very petulantly asked, "where is my nightdress?"
"Under your pillow, my dear," gently replied his wife. "No itisn't," said Jones,

you have made a mistake and put some of your flummery here."
"Oh no, that is not mine," said Mrs. Jones, as she took up the garment and held it up before her husband, "it is your night shirt fixed up as you said you would like it." And further exam-ination showed the astonished Jones, that his shirt was ornamented with a frill around the bottom, and a ruffle around the top, while a pretty piece of embroid-ery run down the front. To make the joke more decided, his wife had put all his other night shirts in the wash, so that for once he was compelled to sleep in this fancy garment, and as he expressed it when he got up in the morning, he was not sure whether he was himself or some woman. At his request his wife took off the fancy fixings, as Jones called them, and he never afterward complained that she was careless of his underclothing.

The favorable reputation the Carriages have made in localities where they have been used for several years by Liverymen, Physicians, Farmers and others requiring hard and constant use, has led to an increased demand from those localities, to meet which the manufacturing facilities of their manmooth establishment have been extended, enabling them now to turn out in good style,

The World for 1880.

Democrats everywhere should inform themselves carefully alike of the action of their party throughout the country and of the movements of their Republican opponents. A failure to do this in 1876 contributed greatly to the loss by the Democracy of the fruits of the victory fairly won at the polls.

The year 1880 promises to be one of the most interesting and important years of this crowded and rentful century. It will witness a presidential action which may result in re-establishing the Government of this country on the principles of its constitutional founders, or in permanently changing the relations of the States to the Federal power. No intelligent man can regard such an election with indifference. The Word, as the only daily English newspaper published in the city of New York which upholds the doctrines of constitutional Democracy will steadily represent the Democratic party in this great canvass. It will do this in no spirit of service partisanship, but temperately and firmly. As a newspaper the World, being the organ of no man, no clique and no interest, will present the fullest and the fairest picture it can make of each day's passing history in the city, the state, the country and the world. It will alm hereafter, as heretolore, at accuracy first of all things in all that it publishes. No man, however humble, shall ever be permitted truly to complain that he hos been unjustly dealt with in the columns of the World. No interest, however powerful, shall ever be permitted truly to complain that he hos been unjustly dealt with in the columns of the World. No interest, however powerful, shall ever be permitted truly to boast that it can silence the fair criticism of the World has seen its daily circulation trabled and its weekly circulation pushed far beyond that of any other weekly newspaper in the country. This great increase has been won, as the World believes, by truthfulness, enterprise, ceaseless activity in collecting news and unfaltering loyalty to fiself and to its readers in dealing with the questi

His lids were drawn by the tension of the skin and writhed themselves the nose and over the forehead was so dis-tended with the mattery substance underneath that it seemed as if it must burst every moment. The eyes were swollen almost to bursting from their sockets and were turned with pain until hardly any-

From these incisions there oozed a mass of loathsome, detestable putrescence, so terrible in its stench that the attendants, save one, ran from the house. Other incisions were made in different parts of the scalp, from which the hair had been shaved, and from these this terribly offensive matter oozed constantly, until the swelling was reduced and the head and face assumed nearly their normal size. Attempts were then made to free the incisions of matter by injecting water into them. It was noticed that when water was forced into the cut in the forehead it poured out of

For two days before his death a coffin had been in readiness, and the orders of the physician were to place him in it as not a candidate?" queried the corresponsoon as the breath left his body and get him under the ground immediately. After his death none of the attendants had the temerity to touch the corpse, for fear of being poisoned, so they gathered the sheets on which the body lay at each end, and thus lifted it into the coffin.

The fetid, noisome stench from the putrid mass within was such that no one the coffin was covered from sight as hur-

The "obliquitous eye," as it has been often termed by his opponents, consists of a drooping or partially fallen lid, which more than half obscures one of the organs of vision, giving a distinctive look rather than an appearance the opposite of prepossessing. His voice, as before intimated, is the feeblest of the feeble, and in conversation he is compelled to sit almost in contact with his listener in order that the almost incoherent utterances may be thoroughly understood.
