It is gratifying to observe the general favorable report in regard to the dairy products of the farm. The never-failing milch cow, where she has been allowed a living P. chance, has come to the relief of the numerous households of Brushy Creek town-

ship by freely giving from her lacteal resources those rich supplies of milk and butter, which are so necessary to the comfort and sustenance of every family. It

may be that the enumerator was particularly fortunate, but he never sat down to the table of any household where the milk and butter did not maintain a conspicuous position, and in some cases the beautiful, rich, golden color of the nicely-prepared butter would have, we think, entitled it to a place alongside of the Northern creameries or oleomargarine. Of course, this was not the happy lot ot all, but there is no

good reason why it may not be. The preparation of clover and grass lots, with rve or barley for a winter pasture, will enable the poorest to revel in the luxuries of milk and butter. So mote it be.

Under the operation of the stock law the number of stock is gradually being reduced to be supplied by a better quality.
