I count this thing to be grandly true,
That a noble deed is a step towards God,
Lifting the soil from the common clod,
To a purer air, and a broader view.

We rise by things that are under our feet, By what we have mastered of good and gain, By the pride depressed and the passion

And the vanquished ills we hourly meet. We hope, we aspire, we resolve, we trust, When the morning calls us to life and

light, But our hearts grow weary, and ere the Our lives are trailing the sordid dust.

Wings for the angels, but feet for men!
We may borrow the wings to find the We may hope, and resolve, and aspire, and pray, But our feet must rise or we'll fall again.

Only in dreams is the ladder thrown
From the weary earth to the sapphire
walls;
But the dreams depart, and the vision because he was known to be an enemy, of Conkling and for the purpose of breaking the latter up. Failing in this, Robertson, a still greater enemy, was

And the sleeper wakes on his pillow of stone. Heaven is not reached at a single bound;
But we build the ladder by which we rise
From the lowly earth to the vaulted skies,
And we mount to its summit round by round

—J. G. Holland.

GRANT SPEAKS.

His Imperial Wrath With Garfield and Friendship for Conkling.

CHICAGO, June 13. General Grant, accompanied by Mrs. Grant, Fred Grant and his wife and Miss Sharpe, arrived here yesterday morning. Owing to the poor health of Mrs. Grant, the general will remain until Wednesday, when he will proceed directly to New York. To a Morning News representative he said: "I have accomplished the purpose for which I went to Mexico, having btained all that I went for without any great difficulty, despite the attempts of certain newspapers and persons to create opposition through talk of annexation, etc. The articles were published by the Chicago papers and copied into those of Mexico, and at first aroused a little opposition, but I went before congress and in a short speech told them what I wanted, and they gave me my charter at once. No charter was ever before issued in so short a time. The road will be in all about 700 miles long, running from the City of Mexico through Pueblo to the Pacific coast, while another branch must go down to the guif. It will be of great benefit to Mexico in developing the resources of that country and to the United States. The charter provides for the completion of the road in ten years, but in all proba-bility it will be finished inside of three years. Four surveying parties are already at work. I shall very likely re-

turn there next winter. In regard to the situation of affairs in Albany, Mr. Grant said : "If you want to know what I think of the manner in which Conkling has been treated by the president and by his colleagues in the senate I will tell you without any hesitancy. I think it is most outrageous, and if you want to test, I will tell you that I am with Conkling and Platt. Conkling is my friend. He has been a warm supporter of mine, but for all that I do not owe him near so much to-day as Garfield. It is true Conkling did not support Garfield in the Chicago convention, but he saved him in November. Without New York State Garfield could not have been elected, and without Conkling New York State would not have gone republican. Whenever the State has gone republican in the past years the cause could be traced to Conkling and his personal efforts.—
When I say that Garfield owes more to
Conkling than I do, I do not mean to
under estimate the obligations that I am
under to him, but I was elected once without the State of New York, and when it did go for me I would have been without it. When Conkling went to Warren and commenced his vigorous campaign for the republican party, Garfield matters looked very serious. A defeat was almost certain. It was then and then only that the republicans took heart, and from that time on the battle turned. Conkling went into the campaign because he was a republican, and because he desired the success of his party, not because of any trade he had made with Garfield. It was in accord-ance with resolutions which he had offered in the national convention pledging the support of every delegate to the candidates nominated, whoever they might be. This was done because several had declared that if I was nominated they would bolt. In regard to the Mentor treaty of which we have heard so much there was not a word of truth in the sensational reports that were published concerning what occurred during our visit. We were in the State speaking, and in compliance with Mr. Garfield's oft repeated requests determined to call at Mentor, as it could be done without putting us much out of our way. Conkling said that he would go with me. Arriving at Garfield's house we found a crowd of people there, probably 150 in all. We went into the house and sat down and talked with Garfield and others present, but not a word was said by either Conkling or myself to Garfield in the way of a trade or bargain, nor was any understanding of any kind whatever arrived at. All that we said while with Garfield was in a general way, and could be heard by those around us. In fact it would have been impossible for us to say anything that those around us could not hear. All this talk about the Mentor treaty is mere nonsense. I have no doubt but that when Conkling resigned, he did so with the intention of keeping out of politics and out of the senate, and I think he acted wisely. He was sick and disgusted with the condition of affairs; he had been insulted by the president and slighted by the senate.

There is or should be a great deal in

senatorial courtesy which means simply

this, that when the president makes an

appointment in any State and fails to elicit the approval of the two senators

from that State the matter ends there and

the nomination rejected. If the repub-

lican senators from any State object to any

nomination the rest of the party is

intended as such on the part of Mr. Gar-field, to ever select for the New York

collectorship this man Robertson. He

was a personal and political enemy Conkling, and was probably chosen for

that reason. I don't believe it ever

would have happened if Blaine had not been in the cabinet. I know nothing

personally of Conkling's purposes or intention, having neither seen nor heard from him since the affair happened; but

from my knowledge of him, and from what I have learned of those who have

talked with him I am of the opinion

series of attacks were made upon him

through the press and from all quarters.

It was said that he acted petulantly, and was inclined to sulk and play the child

done I was allowed to play. I early formed the habit to which I now owe HE above cut represents the HALL SELF-FEEDING COTTON GIN, manufactured at Sing Sing, New York, which has been sold in all of the above-named Counties, and which has given entire satisfaction wherever used. The saws are - Some Milwaukee people ask the appointment of female police officers. made of the best imported steel. The saw shaft is the largest made. An examination of other Gins will convince you it is the most substantially built Gin in use. It never breaks the roll, and therefore does away with the expense of the revolving head, as the secret of making the Gin to prevent its breaking the roll is in the proper shape of the roll-box. It is the only Gin that runs successfully with the - In several counties in Kentucky the Feeder and Condenser attached, and the only Gin that will feed yellow cotton. Below I give you a few testimonials and names: Lewis C. Clinkscales, Abbeville; A. J. Stringer, J. W. Poore, Belton, W. M. Shirley, S. R. Timms, John D. Kelly, Basil Callaham, and many others: man is lovely and accomplished until her husband becomes rich.

BREWERTON P. O., Laurens Co., August 6, 1880.

Mr. John E. Peoples, Anderson, S. C.—Sir: The 60-Saw Hall Cotton Gin, Feeder and Condenser we bought of you last Fall is a perfect success in every respect. We run it by steam, and gin 10 bales of 450 lbs. per day with ease. It is the best constructed and finest finished Gin I ever saw. It gins faster, makes a better sample, and thus far excels in turnout any Gin ever used in this part of the country. This can be proved by all the people who have had cotton ginned by me. We sinced and thus far excels in turnout any Gin ever used in this part of the country. This can be proved by all the people who have had cotton ginned by me. We ginned for the public last Fall 600 bales, and give the best satisfaction of all the ginners. The seed being so perfectly clean, it makes a better sample. Further, it separates from the seed cotton, before going into the roll-box, rocks, grit, nails and matches. There is less danger from fire, owing to the Self-Feeder taking out all hard substances before they come in contact with the saws. The cotton picked by the Gin the last seeson was carefully weighed before it was nicked and after being baled and last season was carefully weighed before it was picked and after being baled, and the average yield the season through was 1 lb. of lint for every 23 lbs. of seed cotton. I have used since the war Gins of four different makes. Yours makes a better liut, cleans the seed better, gins much faster, and for its simplicity unsurpassed. 1 think it is destined, in a great measure, to supersede all others. I heartily recommend it to those who wish to purchase Gins. It will more than repay the additional Very respectfully,

KNIGHT & BALENTINE

BELTON, S. C., May 4, 1881. Mr. John E. Peoples, Anderson, S. C.—DEAR SIR: Your favor of the 30th of April received, and in reply I have to say that after a very late start I ginned 150 bales of cotton on the Hall Self-Feeding Cotton Gin. Everything has worked well, and the whole outfit has given entire satisfaction, both to my customers and myself. I would not think of running a Gin without the Feeder and Condenser. The Feeder does better work than possibly can be done by hand. Both the Feeder and Condenser are indispensable. Yours truly

JOSEPH D. PINSON. Anderson, S. C., May 7, 1881.—John E. Peoples, Agent Hall's Gin—SIR: The 40-Saw Hall Gin, made at Sing Sing, N. Y., bought of you last Fall, has given perfect satisfaction. It cleans the seed well, and makes a superior lint, and runs light. The saw shaft and saws are the best I ever saw.

L. H. WELBORN.

PLATFORM WAGON SCALES, FOR GINNERS. A 2-Ton SCALE FOR FORTY DOLL'ARS. They have been tested in this County, and give satisfaction. Every Ginner

To J. E. PEOPLES-The 50-Saw Hall Gin, Feeder and Condenser I bought from you last Fall beats any Gin I have ever seen, and I have used and tried four different kinds. It runs light, makes a good sample, gins fast, and will surpass any Gin in making a good turnout and in cleaning the seed. Now, if you desire a good Gin, try the Hall Gin, Feeder and Condenser, made at Sing Sing, N. Y. The Feeder and Condenser can't be beat, as the Feeder will feed any kind of cotton vellow or dog-tail.

ANDERSON, S. C., May 18, 1881.—John E. Peoples, Anderson, S. C.—DEAR SIR: The 60-Saw Hall Gin, Feeder and Condenser, made by Hall S. F. Cotton Gin Co., Sing Sing, N. Y., bought of you last Fall, has given perfect satisfaction to myself and customers. I have used the Emery, Star and Needle Gins, and much prefer the Hall to either of them. I ginned last season upwards of 400 bales cotton on the Hall Gin, and during the whole season the Gin, Feeder and Condenser did not give me an hour's delay. I can cheerfully recommend it to any one wishing to purchase a Gin. I found no difficulty in ginning yellow cotton, as the Feeder feeds yellow cotton, and takes out all grit and hard substances before it comes in contact with the saws.

WM. A. NEAL.

Anderson, S. C., April 30, 1881.—John E. Peoples, Anderson, S. C.—Dear Sie: The 80-Saw Hall Gin, Feeder and Condenser, made at Sing Sing, N. Y., bought of you last Fall, beats anything of the kind that I have ever used, and I have used several different makes of Cotton Gins. It is the best Gin in use for durability, lightness of draft, cleaning the seed perfectly, and never breaks the roll, and gives entire satisfaction to myself and customers. I was burnt out the 25th of last September, and my customers waited one month on me until I could get another Hall Gin to gin their cotton. This can be proven by my neighbors. The Feeder and Condenser can't be beat. I have never had any trouble with them.

Yours truly,

M. A. COBB.

Piercetown, S. C.—Mr. J. E. Peoples, Anderson, S. C.—Dear Sir: The 50-Saw Self-Feeding Hall Cotton Gin, with Condenser attached, made at Sing-Sing, N. Y., purchased of you last Fall has given entire satisfaction. It saves the labor of one hand, and feeds more regularly than could be done by hand, never breaking the roll for a day at a time if attended to. I ginned 350 bales last Fall with it, and it is in as good order appearantly as ever. It makes samples to compete with any other gin. Mr. Sanford Martin had a bale ginned on my gin last Fall tkat was pronounced by the Piedmont Manufacturing Company to be the best ever brought to that market.

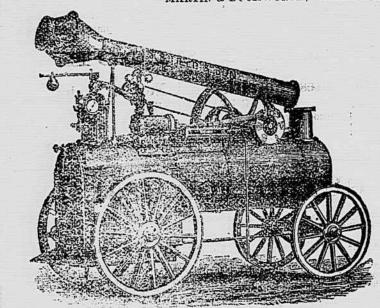

D. H. HAMMOND.

DUE WE.T. S. C., July 24, 1880.—Mr. J. E. Peoples.—DEAR SIR: In answer to your postal I will say that the Hall Self-Feeding Cotton Gin. made at Sing-Sing, N. Y., that I bought of you has given entire satisfaction. I ginned nine bales a day weighing 450 lbs. Cleans the seed perfectly and makes a superior sample of lint. I want no better for speed and lightness of draft. Only wish I had taken an 80-saw instead of a 60-saw.

Yours truly

J. L. HADDON. Yours truly,

ANDERSON, S. C., May 14, 1881.—Ino. E. Peoples, Anderson, S. C.—The Hall Gin manufactured at Sing-Sing, N. Y., and purchased of you last season, is the best constructed and finest finished gin we have ever used. It runs light, never chokes or breaks the roll, and for sample cannot be excelled by any gin ever used in this section. It has given this neighborhood entire satisfaction, and in our opinion is equal to or better than any other gin in use to our knowledge, and would advise any one wishing to purchase a good gin to buy the Hall Gin in preference to any other. to buy the Hall Gin in preference to any other, MARTIN & DUCKWORTH, Williamston, S. C.

course true of the democrats, but in this case it was a coalition against Conkling, and he accepted it as such. In the first place it was an insult and was doubtless intended as such on the part of Mr. Co. THE SCHOFIELD ENGINE, which has been sold in every section of the Southern States, and which has given such universal satisfaction, will be kept on hand, and sold at prices that will compete with any first-class Engine manufactured. The following testimonials will give an evidence of its superior simplicity, durability and

The undersigned, Administrator of the Estate of John E. Norris, deceased, will apply to the Judge of Probate for An-ANDERSON, S. C., May 6, 1881.—John E. Peoples-Dear Sir; The Schofield Engine pur Anderson, S. C., May 6, 1881.—John E. Peoples—Dear Sir; The Schodeld Engine purchased of you—six-horse power—has given perfect satisfaction. It is the best Engine I have ever used, and I have used three other different makes. I like it for three reasons. 1st. It is simple and durable. 2nd. It runs smoother and steadier than any Engine in our country. 3rd. It has more power than any Engine made to the number of horse-power. I run a 50-Saw Gin and Feeder with 25 lbs. steam, and can recommend this Engine as the one for farmers to have derson County on Wednesday, July 6, 1881, for a Final Settlement of said Estate, and gine as the one for farmers to buy.

PIERCETOWN. S. C.—Mr. J. E. Peoples—Dear Sir: The five-horse power Schofield Engine purchased of you last Fall has given satisfaction. My engineer says it is the lightest running Engine he ever had anything to do with. Can keep up more steam with less wood than any other. It runs a 50-Saw Hall Gin, with Feeder and Condenser attached, with all ones and rin source hales par day. wood than any other. It runs a 50-Saw Hall Gin, with Feeder and Condenser attached, with all ease, and gin seven bales per day.

ANDERSON, S. C., April 3, 1881.—To J. E, Peoples: The six-horse Schofield Engine 1 bought from you last Fall has given entire satisfaction. It is very simple in its machinery, and any ordinary man can run it without any trouble. I am running a 40-inch Circular Saw Mill, and have sawed as high as 3000 feet in one day out of old field pine logs—logs being very small. It has more power than any 6-horse Engine I ever saw. I cheerfully recommend this Engine to all who desire an Engine. It can't be beat as to smooth running.

ABRAM BOLT.

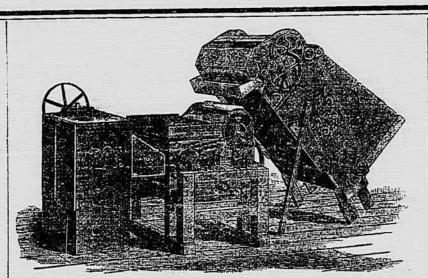

him. All these stories seem to emanate from the white house and that locality Even after he was out they could not let him seet in pages. Conkling is a proud Samples of the above Machinery can be seen by calling at my Store, and parhim rest in peace. Conkling is a proud man, and he said when all these contemptible stories came to his ears: I yill show them what I can do. I will bo back. I will fight them, and he will and Grist Mills, Cotton Gins, Self-Feeders, Condensers and Presses, and all Plantation Machinery. Write for prices and terms. Repairing faithfully done. Letters by mail receive prompt attention.

June ties desiring to purchase will find it to their interest to call on or confer with me by

JOHN E. PEOPLES, Agent, Anderson, S. C.

DANIEL PRATT GIN COMPANY GIN, FEEDER and CONDENSER.

THIS is the 50th year of the Daniel Pratt Cotton Gin Business, during which time they have manufactured over 22,000 Gins, which are used in every cotton-growing State in the Union, in Mexico, South America, British East Indies, and in almost every other

country where cotton is grown.

The Revolving Head placed in the end of the cotton-box prevent the Gin from chok-The Revolving Head placed in the end of the cotton-box prevent the Gin from choking and the roll from breaking. Any common plantation hand being able to feed the Gin satisfactorily. The Feeder is superior to any other machine of the kind in use. They are simple in construction, and easily managed. They stand upon the floor, and are therefore not so hard to get at. The Condenser is equal to any in use—we believe superior to any now made. The lower end of the cylender being open, all dirt from the lint is driven through the floor by the air from the gin-brush. By the use of this Condenser the lint-room can be entirely done away with, saving many dollars in the construction of buildings, making the labor of handling the cotton before packing far easier, and loss and damage by fire is reduced to a minimum. The Feeder and Condenser will pay for themselves in one season. Every machine is fully warranted to do perfect work, and until the purchaser is fully satisfied with the machine we do not ask for payment. Should any machine prove in any way defective, we make the same good at our expense, upon any machine prove in any way defective, we make the same good at our expense, upon notice being given to us. We give the names of gentlemen in this and adjoining Counties who have the Dariel Pratt Gins, Feeders and Condensers in use, and refer the public to them, believing that their recommendation of the machines will be more satisfactory to any one desiring to purchase than the ordinary stereotyped form so common:—

A Dose of Tarrant's Selfzer Aperient

Has removed the agony of rheumatism, and its continued use entirely healed the patient. Rheumatism is but little understood. Some empirics resort to embrocations, which are really dangerous. It is how acknowledged to be a blood disease, resulting from acidity. This aperient corrects all such acidity, and thus cures the disease. All the rheumatic sufferers are advised to try it. SOLD BY ALL DRUGGISTS.
