During the inspection the Musical Union Band discoursed some of its excellent musie, which was exceelingly enjoyed by all. The Riflemen presented an attractive appearance, and the condition of their uniforms, guns and accoutrements, as well as the manner in which they executed the nanual and the evolutions, were quite satisfactory to Gen. Humphreys, who complinented the Company very highly. Anderson is proud of the Palmettoes. We hope at no distant day to be able to record the fact that every young man in the city is a member of the Company. The Local spent a few hours in the pleas-

ant little village of Honea Path last Saturasticating in the mountains of North day in attendance upon a committee meeting in the interest of the temperance cause. Of course, the trip could not have been otherwise than pleasant. We dined with and down and bent to such a shape as that clever host, Mr. J. J. Shirley, who with his amiable wife are noted for their generosity and hospitality. Mr. Shirley ias one of the most charming homes in the village. He has recently built a fish pond, which he has stocked with carp. The pond is situated near his house, in a beautiful place. House Path and the country contiguous, like almost every other ection, has suffered severely from the drouth, and the people are a little despondent. In conversation with several citizens we were informed, however, that the farmers generally were in a better condition to withstand the effects of the drouth than they were in 1881, as good crops of small grain had been harvested this season and the farmers were not so deeply in debt. An Interacting Occasion.

MR. EDITOR: The first Summer meeting rica cards on Sunday. The case crea-of Pomona Grange of Anderson County was held with Sandy Springs Grange on

was need with Sandy Springs Grange on the 17th inst.

The special feature of the day was a plow-ing match, which, owing to its novelty and the interest which is now being felt by our people in improved agricultural implepeople in improved agricultural implements, brought together quite a large number of people. The following implements were on exhibition: Two Cassady Sulky Plows, one Osborne Sulky Plow, one Brown Walking Cultivator, with the riding attachment, one Standard Cultivator, one Acme Harrow. These implements were all thoroughly tested, and the people delighted with their work.

The importance of such meetings must be obvious to all. The system of farming as practiced by our fathers is no longer tenable. The prices demanded for labor are frequently exorbitant, and laborers, as a class, are entirely unreliable, and to make farming remunerative we must, to a great extent, do our own work, become independent of negro labor. To do this we must have improved farming implements, and in order that we may determine which of the order that we may determine which of the many plows, cultivators, harrows, etc., offered for sale are preferable, the various implements should be competitively tested in the presence of farmers. During the present and immediately succeeding years thousands of dollars will be invested in machinery by the farmers of Anderson County with a view of saving labor and economizing time. Much money has been already invested in machinery, which is comparatively worthless to the farmers, and much more is destined, at any early day, to be injudiciously invested, unless we, as farmers, demand that parties offering such articles for sale demonstrate by actual test in our presonce that their articles possess those merits which they claim for them.

them.

A general invitation was extended to all agents to have their plows on exhibition at Sandy Springs, but to my surprise Mr. Perry, of Greenville, was the only gentleman who had a plow on the ground for sale. This plow gave perfect satisfaction. We had hoped that the agents of our own County would be there to press the merits of their plows, but from indifference or fear of competition the invitation was ignored.

As the success and interest of the occasion was in a great measure due to the presence and assistance of Messrs. W. W. Russell, D. Sloan White and A. B. Bow-den, who own all the plows, cultivators and harrows that were on the ground, per-mit me to express the thanks of Sandy Springs Grange for their valuable assist-

horse power and more improved agricultural machinery.

The turnout at Sandy Spring, was large and respectable, and were handsomely entertained by the operations of Messrs, Perry, White, Bowden, Russell and others in plowing, cultivating and harrowing. Several sales of implements were effected. We expect the same energetic farmers, with many others, agents, salesmen and owners to be at Harper on the 31st. All farmers and citizens generally are invited to witness the contest.

A Temperance Call.

At the recent meeting of the Grand Division Sons of Temperance at Marion, S. C., a tresolution was adopted looking to a better organization of the work throughout the State. To this end it was determined to divide the State into districts, and appoint a committee in each section to propagate the Order by organizing Divisions in every locality. The first section composes the counties of Anderson, Oconoe, Pickens and Greenville.

by organizing Divisions in every locality. The first section composes the counties of Anderson, Oconce, Pickens and Greenville, with the following named persons as a committee, viz. L. P. Smith, Dr. M. C. Parker, B. L. Johnson, M. B. Gaines, W. F. Cox, T. F. Callaham, Tilley Shirley, J. A. Eskew, Rev. S. Lander, Rev. J. O. Wilson, J. N. Vandiver, W. J. Robertson, Rev. W. A. Hodges and D. A. Smith
A portion of the committee met at Honea Path on Saturday, August 18, and adjourned to meet at Belton on Saturday, September 8th, at 2 o'clock p. m. It is earnestly desired that every member of the committee attend this meeting. And as it will be a meeting of conference, it is hoped that each Division will send as many delegates as possible. Persons who are not members of the Order but friendly to the cause are respectfully invited to join with us in our efforts to extend the temperance influence in our beloved State. Please remember the time and place and meet us.

Description of our Gin.

THE VAN WINKLE GIN is made with substantial iron frame, self-oiling boxes, brush boxes self-adjusting. Every precaution taken to prevent grit getting in the journals. The brushes are made with iron bound heads, and the sticks dovetailed in and driven in from the end, and any one of them can be taken out or replaced without interforing with the other sticks. We use no wire nor glue, and it is improved pattern, the saws of best English steel and needle pointed. Every part of the Gin has been gotten up with great care, with the especial idea of making a machine that will not get out of order, easily repaired if it should, always ready for work, and give the best general results. Any piece can be duplicated from our factory.

Has long been before the public, and is too well known to need any further description. Its chief points of merits are: It takes very little room, is easily handled, and takes so little power; can be used on all kinds of powers—horse, water or steam. Ginning and packing can all go on at the same time, without interfering with the Gin. A two-inch belt will pack a 500 lb. bale of cotton. It sayes its cost the first season in labor.

Anderson, S. C.—Mr. John E. Peoples—Sir: The Steam Power Van Winkle Cotton Press bought from you last Fall has given entire satisfaction. I packed bales of cotton weighing 660 to 725 lbs. in five minutes with all ease, using a 4-inch belt and 25 lbs. steam. There did not seem any more strain on the Press than with a 450 lb. bale. For strength, durability, lightness of power, small quantity of steam required, economy of space, I deem it the King of all Cotton Presses; especially so as the low price at which it can be bought for puts it within reach of every man running a steam Gin. In fact, I would not be without it for twice its cost. I would advise all my friends to buy one of Van Winkle's Steam Power Cotton Presses, as you will save its cost in labor in one year.

Andreson, S. C.—John E. Peoples—Dear Sir: The Van Winkle Steam Power Press we bought of you last Fall is the very Press adapted to the wants of the farmers of this County. It saves labor, takes but very little room, and very little power to run it up and down. We only work one hand with our Press. Can cheerfully recommend it to any one wishing to purchase a Press, as it will save its cost in a short time. We packed bales weighing over 600 lbs. with a 4-inch belt.
