me."

Dealer—"Yes, that's right; there's the money. Now what goods do you want for the other \$7?"

Yankee—"Wall, I dunno—You see, ous excitement all the time. Going mister, I hain't much posted in your around curves, along hillsides, many other truck, so I guess I'll take brooms !" curious shadows are outlined on the track, and very often an engineer is so

Sowing Fall Wheat.

An important consideration in regard to fall theat is the manner of sowing. The seed needs to be deposited three inches below the surface to give effect to inches beliew the surface to give effect to its manner of growth, which is to throw out two sets, of roots—one set from the seed and the from the radicle, or tap root, two of three inches below it. To bridegroom was looking after the bagsecure this there must be sufficient depth gage at the depth his best man, who was of soil, and the seed must be placed at a striffic nervous, hurried the bride into sufficient depth below the strife to the wrong can and started her for Boston the roots a strong hold on the soil, one train to spon. The disconsolate

the roots a strong hold on the soils one train too spon. The disconsolate There is but one way to secure this proper depth and evenness of sowing, and that is ty crilling. Broadcast sowing and the covering of the seed by the harrow, can neither cover all the seed in cover what is put under the surface evenly, and consequently a large portion of the seed is wasted. The waste seed each year on ten acres of land will pay interest on the cost of a drill, and all the expense of keeping it in good order. Three pecks of seed drilled is equal to six pecks sown broadcast, and it is countered to be careful the next train, but got to Berwick only to find that his bride had returned to Portland. She, against the advice of friends did not stop there, but started West again and got to Boston at the same time he reached the starting place. At last accounts the two were hurrying backward and forward as steam could take them, each frantically trying to overtake the other—Kenne-bec (Me.) Journal.

— About ten days ago Mr. James

six pecks sown broadcast, and it is equally true that the excess of the yield of a Nabors had well dug at his saw mill, ten-acre drilled crop over a broadcast one five miles from this place. When he had may very easily pay the whole cost of a drill each year. This is the example of the profit made from the use of good implements and from good work, and a proof that good work only pays the farmer for his labor.—New York Times.

We will was full to overflow. Since then wall was full to overflow. Since then wall was full to overflow from the wall was full to overflow form the wall with no apparent decrease. This

A Fearful Tragedy in Charleston.

The dead body of Alexander W. Mc-Loy was found on Friday afternoon in the marsh on Cooper river, three miles from Charleston. Thursday morning Mr. McLoy left home and went to the gunpowder magazine, near which his body was found. When he reached there he took off his coat and vest and cut his throat with a knife. After doing this he walked a distance of thirty feet and tumbled into the marsh where he was found, attention being attracted to the spot by a flock of buzzards hovering near. Mr. McLoy was a member of the late firm of McLoy, Rice & Co., which was compelled to cease business on account of the death of Mr. Rice, of New York, a member of the firm. He had lost all he owned, and has been in despair since his business closed. It is supposed that mental aberration brought on by despondency, caused the suicide. Mr. McLoy was about 55 years old, and one of the most highly respected men in the community. He leaves a wife and

Last year the Department of Agri culture began to experiment in a small way at Ottawa, Kansas, with the diffusion sugar making process as applied to sor-ghum cane. Instead of crushing the cane, as in the sugar cane process, it was shaved off in minute slices, and the sucrose, or sugar yielding sap, extracted by streams of water. The results obtained were so encouraging that the field of operations was removed to Fort Scott plant experiments are now in progress on a scale of some magnitude. Monday a telegram was received from Prof. Wiley, the chemist of the department, who is in the chemist of the machine announcing the the chemist of the department, who is in charge of the works, announcing the complete success of the experiment.

The telegram states that syrup has been obtained from the sorghum cane of light save me the trouble of sending a collector on easy terms.

To those indebted to me, I will say that I am compelled to make collections by 1st November. Please come up at once, and box of your Pills has almost entirely cured him. Our friend, Mr. Adolphus Browning, has suffered for years with the dreadful discolor, good flavor, and chrystalizing well. to see you.

There was complete extraction of sucrose in six of the cells of battery. Commissioner Colman is very much elated at the results of the experiments, and regards them as of great value from an economical point of view. In the process now used in the Softli there is a loss of near

MRS. McSMITH'S.

A number of emigrants had camped in Mr. A. P. W., of Hampton, Ga., has recently emerged from one of the most remarkable cases of Blood Poison on re-New Mexico, and one night one of the party, who was sleeping on the ground, was awakened by a peculiar sensation on cord. His body and limbs had no less than four hundred small ulcers—his bones tormented him with pain-his appetite failed-his kidneys presented rightful symptoms-and all doctors and 00 bottles of the most popular Blood Poison remedy failed to give him any relief. He secured B. B. B., the concentrated quick cure, and five bottles healed muscle, he dared not attempt to shake it the ulcers, relieved all pain, cured his kidneys, restored his appetite, and made him a healthy and happy man.

MR. BOSWORTH INTERVIEWED.

[From the Southern Clipper.]
"Yes," said Mr. James L. Bosworth,
an old Atlantian, "it was twelve years
ago when I contracted a terrible case of ago when I contracted a terrible case of blood poisoning. My affliction was truly horrible. I had no appetite, did not sleep well at night, my direction method to branches usually taught in High. a terrible groaning from one of their ment as if in deep thought and then replied: "Well, I don't want any brooms as I told you, but I don't mind making a trade with you."

Yankee—"What sort of a trade?"

Went to them and found one of them with his left foreleg swollen to an immense size. The swelling increased, as did the agony and groans of the brute, until it died in about thirty minutes thereafter. The swelling increased as the swelling increased, as did the agony and groans of the brute, until it died in about thirty minutes thereafter. The swelling increased, as did the agony and groans of the brute, until it died in about thirty minutes thereafter. The swelling increased, as did the agony and groans of the brute, until it died in about thirty minutes thereafter. The swelling increased, as did the agony and groans of the brute, until it died in about thirty minutes thereafter. half cash, you take the other half in trade."

ed the centipede had entered the mule's of the leading physiciaus of Atlanta; foot just above the hoof and inoculated tried nearly every blood remedy adverbenefit whatever.

"And you remained in this condition twelve years?" interrupted the Clipper
