The Laurens Advertiser, which is opposed to prohibition, says:

The prohibition executive committee, having secured about the requisite number of signatures for submitting the Act, purpose to open an active campaign in a two weeks. The farmers will, then have gotten through the busiest part of their working session, and will have better opportunities for attending the various meetings for discussing the questions connected with prohibition.

The Laurens Advertiser was, we ight, marked by something of aspery in its comments on the Anderson load Law last Winter. We did not care to discuss the matter in the temper hat then snemed to actuate our contemporary, but time seems to have modified s feeling on the subject, as appears in the following editorial of last week:

issatisfaction and lawlessness, and a State has fallen. During the last ray proposed a new mode of working the public highways in Anderson County. While it is true the Advertiser cannot orse some of Senator Murray's ideas, change in the road law is, we believe good, and if instead of applying to one e, no intelligent thinking man could act to it. As it is, however, much stisfaction exists in Anderson. Some scions of the County have gone so far a to ceclare that they will not heed the aw, but will work the roads as heretore. We cannot see by what system o soning those who were sent to make ws for the State, came to the conclusion that this law was good for Anderson and not good for the State.

That our public roads need attention is a fact which no one will controvert.

While the Murray road law is a decided improvement on the old system, yet it might be improved upon. The great trouble with our road working is, that no man is responsible for it. In this issue will be found an article from the Nation. will be found an article from the Nation. In speaking of dirt roads it says: "The reason they suffer is that, as they have no standard of goodness in roads, and do not make specific requirements as to what shall be done to keep the roads in good order, it is never possible to bring trustess, or select men, or roadmasters to a proper account. They always escape if they can show they have put on the annular spring plaster; and when it is washed away, as it is sure to be a little later, they throw the blame on the freshets, and the simple citizen, not knowing what to say in answer to them, says nothing."
