Notice to Road Overseers. THE County Commissioners hereby no-tify the Overseers of Public Roads in this County to put their roads in thorough

condition, by putting the whole eight days required by law upon their roads before the first day of October, crediting the work already done this year upon the number of The Commissioners further notify those Overseers who have not done the first four days work already, that they must do this by the first of September, and the other four days by the first day of October.

The Overseers must also make their refour days by the first day of October.

The Overseers must also make their returns promptly to the Commissioners under oath as required by law. The Commissioners will not now prosecute Overseers who have failed to comply with the law, because it was published late, and there has been an unusual amount of sickness in the Spring. They do not desire to prosecute any one, but they now give full and fair notice that the law must be complied with, and they will prosecute every Overwith, and they will prosecute every Over-seer who does not obey the directions herein given. All must obey the law, to

make it bear equally on all. In order that there be no misunderstanding we repeat Those Overseers who have already worked four days are required to put four more days upon their roads before the first of October, and make their return at the close of the last working; those who have not already done four days work, as ordered, must finish four or more days work by the first of September, and make their reportational that time, and also do the balance of eight days work on their roads by the first of October, and make their second report.

If any Overseer fails to comply with these instructions he will certainly be prosecut-

ed; therefore the Commissioners, having thus given every indulgence possible, and full and fair notice, hope there will be no ereliction on the part of any Overseer.
