A significant fact is that hops in the South were never known to be injurrown, is situated on a high hill about a asked the woman in charge if she had ed by mildew or insects, while in the half a mile from the creek. The view seen the parcel. "There's a bit of paper from the house over the plantation is as on the chair beyant," said she; "perhaps New York district, where the crop is a pleasing as the most ideal farmer could that's it," which it proved to be, and the staple, these attacks are always dreaded and frequently destroy a large per cent. gentleman returned a happier and a wiof the fruit. The Southern hops have ser man.

another great advantage, in that they A man in the same city lost a roll of mature much earlier than the crop in the productive as years' deposits of sediment bills amounting to \$10,000, which also North. In the South they can be cured was wrapped up in a newspaper. He told in the sun and air without the expensive is walled in by high hills, in places so a friend of his loss, and the friend made steep as to be difficult of ascent. At the him describe all the ground he had been aid of drying houses and other processes universally employed in the North and lower end of the plain, indeed the only over since he had the money. The last in Canada. No additional machinery end in sight, an almost mountainous place mentioned was the postoffice. The would be needed in this section in the night was wet overheard and slushy unridge runs directly across and forms preparation of hops for the market, hea huge basin, probably a quarter of a der foot. They visited the postoffice, and cause they could be packed and baled in mile in width. But for a narrow gap of going to the spot where the man had been the cotton presses which are to be found less than a stone's throw from side to standing they found two or three bits of in every militia district and almost on side here there would be, as it is possible torn newspaper. It was the same. They every plantation. Now hops are a prothere once was, an immense lake, more looked further, and at last found the lost fitable crop. The demand for them is than fifty feet deep and : 'les in length. treasure. It had been kicked in turn by increasing. Experiments conducted in As it is, the creek flows through the gap every one who came into the office, and the idlest and most unscientific way have without a ripple, and so deep is the chanwhen found was untied and completely demonstrated that hop vines yield libernel through the bottoms, that except soaked with water. It was all, there, ally on Southern soil. There is every when overflowed by freshets, every acre however, and the friends returned to the reason to believe that the careful culture is as dry and workable as the choicest hotel and spent several hours in cleaning of hops would be profitable here. This uplands. Appreciating the advantage- and drying it. The gentleman was so question ought to be taken hold of by ous conditions in which nature had left grateful for the sensible advice which had our agricultural experiment stations, the work, the owner, at a cost of some saved him from a serious loss that he took They can demonstrate just how much three thousand dollars, has constructed a out his friend and bought him the handpromise there is in hop culture in the somest gold watch chain that he could find South, and they ought to do so as soon and eight feet broad at the top, across the | in the city. as they are able .- Macon Telegrauh. A still more remarkable incident is re-

bled to inundate all the fields above and | lated of the finding of \$130,000, lost by The Importance of Tree Planting.

Tree planting time will soon be here. in Paris some ten years ago. As one I want to tell the farmers something that will be of more service to them and their country, ten years from to-day, than the election of any man to office. It is this. Plant out black locust trees on bluffs, hillsides or any waste places they wish to grow up, and in five years they will have an abundance of the best comrades, picking up the package, thrust posts for their cutting. These trees grow surprisingly fast any-

where in the Piedmont country, and seed and by sprouts, so there is no trou-

in tree planting and tree preserving.

Nothing adds so much to the comfort
