IT'S FALSE!

The Statement is made a Hundred Times a Day

"THAT I CAN BEAT FLYNN'S PRICES."

Now, this is all wrong in every sense that it is intended to convey—what would you call it? I claim it is untrue, and I consequently brand it as false.

Of course a man can sell his goods for half what they cost, or give them away if he wants to. But it appears to me this town is not very well stocked with the half-cost or giving away kind of merchants. Goods disposed of in this manner

Ever since the Indian warrior roamed at will through the ancient forests of Carolina the trader's and merchant's object was always to get as much as he could for his goods. But now, at the closing of the nineteenth century, during which been gradually crowded out, and in a few years will permanently disappear from

the mercantile records of this generation.

Now, the perplexing question of the hour with me is, How low can I sell and live? When this will be accomplished I know I will commence rapidly to ascend the ladder that leads to success. People may hold back and be a little cautious for a time, but my sledge hammer prices will work like magic in the end, and my Store

"ONE-PRICE STORE,"

It is gaining ground as rapidly on the others as an Express train on an old stage Advertise! Advertise! Advertise! The public have been fooled so long by fiaming advertisements they have justly lost confidence in them and scarcely read them, because the parties advertising never do what they claim in their advertisements, but I herewith strike the bogus advertiser a home lick, and offer

A REWARD OF TEN DOLLARS

To any person that can prove I do not sell just what I advertise. I also offer a reward of Ten Dollars to any person that can match the following matchless prices, for they are stunners:

Pretty Calicoes at 3\frac{3}{4}c. sold elsewhere for 5c, Good Calicoes at 4\frac{1}{2}c, sold elsewhere for 6\frac{1}{4}c. Beautiful Calicoes at 5c, sold elsewhere for 8c. Nice Torchon Lace at 1c, sold elsewhere for 2½c.

Nice Torchon Lace at 12, sold elsewhere for 22c.

Nice Torchon Lace at 12c, sold elsewhere for 32c.

Nice Torchon Lace at 22c, sold elsewhere for 32c.

Best Pins, "needle points," at 2c, sold elsewhere for 5c.

Best Sewing Needles at 2c, sold elsewhere for 5c.

Prices like these strike terror into the hearts of other merchants, as high prices have received their death blow, and people who want to buy are happy. Read on:

488 Buttons for 5c, sold elsewhere for 20c.

Hairpins for 1c, sold elsewhere for 5c.

Vardwide Sheeting for 5c, sold elsewhere for 7c.

sold elsewhere at 20c, 25c, 30c, 35c, 40c. Irish Linen Napkins and Doylies at 75c, \$1.00, \$1.50, \$2.00 per dozen, would be considered cheap elsewhere for double the money.

My Linen Table Damask will beautify any dining room at or little over half the price asked in other Stores. My Black and Colored Henriettas and Cashmeres should be seen to be appre ciated. They are marvels of beauty in richness of shade and superb finish, and

the only thing that is wrong with them is the price, which is 25 per cent less than they can be bought in the up country. I import these goods myself, and therein lies the mystery. My stocks of— Clothing, Hats, Shoes, Overcoats and Jackets

Are immense. In these goods you can save from 10 per cent on coarse Brogans to 35 per cent on Clothing.

Dress Goods in all the Fashionable Shades

And prices from 5c per yard up, with trimming to match, are much admired by all ladies of cultivated tastes who have examined my stock, and to examine is simply

Ladies and gentlemen of good taste who are in need of something stylish and fashionable at much less than it can be bought elsewhere, need never leave the

The Education of Young Farmers.

ANDERSON, S. C., THURSDAY MORNING, NOVEMBER 13, 1890.

Education is properly the care and charge of the State. We owe it to ourselves that every other citizen should be prepared to fill his or her place in life with advantage to the public. This is a fundamental principle of our system of government, in which every man has a share by his vote, and needs to be edudoes not include any of the numerous works in construction, among which is a cotton mill of 53,000s spindle. It would far as to include that every person who must support himself by his labor should have every facility for fitting himself in an effective manner for his work. take half a column to enumerate all her industries and those in construction. Money flows in and around her as free as have often opened the portals of love, but water, and it takes three national banks | it has been left to California to produce Doubtless it is on this principle that the to transact her financial business. It the only cabbage that ever led to real ro-Agricultural Colleges have been insti-tuted and that experiment stations have been added to them for the technical in-

who neglects or refuses to avail himself of these public means of education fails to perform the part of the duty which devolves upon him as a citizen, which is to make himself useful to the value which provides means for the training of the same which provides means for the training of his children, and when he declines yet a city of magnificent distances. Dr. be the largest ever raised. While this he is able to do so, he neglects a plain and will soon be opened for educational from England two Britons, so fresh from at least, to an Agricultural College when he is able to do so, he neglects a plain duty. No doubt many farmers suffer disability in their occupation for want of a sufficient education. Farming is not to be carried on by a rule of thumb or by servile imitation of obsolete practices. Years ago all mechanical vocations were carried on without knowledge of scientific principles upon which they were based. But this ignorance no longer prevails. Every worker in wood knows the strength of the timbers he uses, or at least the master workmen do, or should, — a wagon that did not actually cost in their native soil that they walked along the day, and seem to prosper more than any other. One thing I saw at Florence gave me especial comfort. The wagon factory that is turning out thirty first class wagons every day, and will soon increase its work to fifty. Ever since the war we have paid millions in annual tribute to the north for our wagons and buggies and carriages. The time is near at hand when we will make our own. A few years ago we paid \$90 for a wagon.

A few years ago we paid \$90 for a wagon.

— a wagon that did not actually cost A few years ago we paid \$90 for a wagon.

—a wagon that did not actually cost more than \$40. Studebaker and Whiteleast the master workmen do, or should, and may if they will. Every worker in metals is guided by scientific knowledge. The brewer and the tanner understand

water, and other northern companies got immensely rich from Southern patronage. the chemistry of their arts; and so it is with all technical trades. But the farmer, as a rule, knows nothing of the better wagon for \$50, and is making monscience of his art. He plows, but does not know why his plowshare has a particular about \$40, for I saw them in the neighboring towns where the merchants keep them, and the merchant pays the freight curve, nor does he know why certain lines of draught cause the plow to run easily and do good work; he turns the soil without knowledge of the reason for makes a profit. There is a world of magnifect timber around. Florence, and and sells them to the farmer for \$50 and it, he harrows in like ignorance, and nificent timbers around Florence, and when he sows his seed it is regardless of this wagon company invites an inspection the necessities of the soil for its proper of the stock of ash and hickory and Why can't we duplicate this factory in ineffective use of the plant food he buys.
At least, this is the rule, and the exceptor very fine hotel, and it is hoped that the tions only make the failures the more conspicuous. JOE BROWN.

Senator Brown Gives a Sketch of His Own Life. In his great speech at the State Fair Macon, Hou. Jos. E. Brown gave the

following brief sketch of his life, for the encouragement of the struggling young men of to-day:

My father was a farmer with small neans, and had a wife and ten children to support; and I was raised upon a farm and worked hard as a farm hand until I was 19 years of age, when, with the consent of my parents, I left the farm, in Union County, Georgia, in November, 1840, with the view of going to school at Calhoun Academy, in Anderson district, South Carolins. My only education was that I could read and write and I had been in arithmetic as far as the "rule of

drove before me as I walked on my way

to Calhoun Academy, about 125 miles, where I entered the school under the control of Mr. Pleasant Jordan. I sold my steers for eight months board, and as I had no money with which to pay tuition, Mr. Jordan was kind enough to give me credit for that. Suffice it to say that after the end of the eight months I taught an old-field school for three months to get a little money to aid me. Under the encouragement of Dr. O. P. Broyles, of Pendleton. S. C., and of his father, Major Aacon Broyles, of Calhoun, and of the late Judge J. P. Reed I returned to school and got board and tuition on credit for the next two years. In the meantime, by close appli-cation and hard study, I had prepared myself for teaching in an academy, and I went to Canton and took charge of the academy there in 1844, where I had a

with which I paid most of my past in-Having obtained the text books while teaching, I studied law by myself, but never read a day in a lawyer's office, and in Sept., 1845, I was admitted to the bar in Canton by the Hon. Augustas Wright, then presiding, who was very compli-mentary to me on the examination which I then stood. With the aid of Dr. John Lewis, so well and favorably known to the people of Georgia, I was furnished the money to go to Yale College to the law school, where I graduated in 1846. I was married to Miss Elizabeth Gresham, in South Carolina, in 1847. Soon after this came the period when I held

fine school, and made some \$500 or \$600,

my first official position, and the people delegated to me their first trust. In 1849 I was elected State Senator from the Counties of Cobb and Cherokee. So that the period of my entrance into public life dates back forty-one years. In 1852 I was a member of the electoral ticket that cast their vote for Pierce and King. In 1855 I was elected judge of the superior court of the Blue Ridge circuit over the Hon. David Erwin, who was then presiding. In 1857 I was nominated by the Democratic convention of Georgia without any knowledge on my part that my name was being used for Georgia without any knowledge on my part that my name was being used for the office of Governor. I was elected in Cotober of that year. In 1859 I was again elected Governor, and in 1861 I didn't know it." "De land sake!" exagain elected Governor, and in 1861 I was elected for a third term. In 1868 I was appointed chief justice of the su-preme court of the State for a term of it all the time." welve years. After serving a little over two years my health failed and I resigned the office and went into the business

of railroading. I thought I had permanently retired from politics; but in 1880 when the Hon. John B. Gordon resigned his position in the United States Senate, Governor Colquitt tendered me the appointment to fill the vacancy. I accepted it and served for about three weeks under the appointment before Congress adjourned. I then became a candidate for reelection to the office of Senator to fill the vacancy of between four and five years which remained unexpired. The contest was a heated one and the race an exciting one, but it resulted in my favor by over two-thirds majority. Again in 1884 I was a candidate for the term of six years in the Senate. I had no oppo-sition and was elected by the general assembly with practical unanimity; was

but one desenting vote. My present term will soon have expiration of the term. I will under no circumstances be a candidate for another office of honor, trust or profit. The few remaining days of life, if I have any, I hope to spend in the State where I have been so often honored and among the people to whom I feel the greatest grati-tude and to whom I am under everlasting

obligation. As a member of the State Senate, I presided temporarily over that body. As chief justice of the State I was the regular presiding officer of the judicial de-partment of the State, and as Governor I resided over the executive department. I never was defeated in any race I ever had where the question was to be decided by popular vote.

As already stated, at 19 years of age, in November, 1840, illiterate and without means, I left my father's farm on foot to go 125 miles to an academy to school. In November, 1857, just seventeen years later I was inaugurated Governor of Georgia, being then a little over 36 years of age, and probably the youngest man that had filled the place. If the example is worth anything to the young of the State, my egotism will be pardoned. The intention at least is

right. What one boy, under the circumstances mentioned, has accomplished may be accomplished by another, and if not to the fullest degree, there may be many approximations by boys of pluck, energy and perseverance. The way is open to every bright boy to better his condition. May you all determine to do so.

Animals Using Fire.

A knowledge of the use of fire and artificial lights has always been regarded as distinctly human, and as marking a definite separation line between man and the lower animals. It would appear from a paragraph in Stanley's new book, "In Darkest Africa," that this distinction can no longer be claimed.

On page 423 of the first volume of that work the author says that among other natural history notes which he gleaned from Emin Pasha was the following: "The forest of Msongwa is infested with large tribe of chimpanzees. In summer ime, at night, they frequently visit the plantations of Mswa station to steal the fruit. But what is remarkable about this is the fact that they use torches to light the way! Had I not witnessed this extraordinary spectacle personally I should never have credited that any of the Simians understood the art of making fire." - Chambers' Journal.

Catarrh Can't be Cured

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you have to take internal remedies. Hall's Catarrh upon the blood and mucous surfaces. Hall's Catarrh Cure is no quack medicine. It was prescribed by one of the best physicians in this country for years, and is a regular prescription. It is com-Wichita. Mrs. Lease is possessed of oratorical powers and a comprehension of the political situation, which are, for a woman, wonderful.

home of virtue and beauty. If I was a rich man and could call back about 25 heard a setting hen making a great noise and went to see what was the trouble. He found that a chicken snake had perfect combination of the two ingrediations. perfect combination of the two ingredine Sold by Druggists, 75c.

ALL SORTS OF PARAGRAPHS.

 Sunday is now generally observed in apan as a day of rest. - In many transactions the middle

man very soon gets in the first place. - Some people take the world as they find it. Others want the world and can't
