Manifest it to them. Children, in some respects, are like grown people. They do not generally like to go where they are not wanted. In most instances the irregular attendance can not be charged against the teacher. It is to be charged chiefly against the parents, either directly or indirectly. In many instances they do not make the school house comfortable, and the children regard it a punishment to be required to go and sit for hours on the hard, uncomfortable seats in the school room and suffer with cold feet and bodies, too, sometimes. In many instances there is absolutely nothing to cheer and encourage the child in its pursuit of knowledge. No maps, globes or

It is strange that the great fraternity of lazy men have not drifted to these islands; or it would be if they were not so lazy.
