THURSDAY, OCT. 1, 1891 TT. RMS.

A Road Congress will be held in Atlan on the 29th of October. It will be aposed of delegates from all the South States, each State being allowed twice s many delegates as it has representaives in the lower House of Congress. The tject is to devise practical methods for proving the public roads of the South.

aking the main issue between them and the Democrats in the present campaign the free silver plank in the Democratic lifform. With this as the issue they But Gov. Campbell and his friends making a brave effort to hold the wilv publicans to the true issue—the tariff tion. On this subject the Democrats w their enemies into hopeless confu-

it costs something to live and a good deal to die; in fact, everything costs.

T.E Y. M. C. A. AND A PUBLIC LIBRA-

That was a timely suggestion made rom the pulpit last Sabbath night that our town needs a public library-a wellselected library where our youth and young men may resort for the purpose of cultivating the nobler qualities of heart and head. There can be little doubt, as was said, that there is too great atendency among us to read only light and trifling productions, or not read at all. The remarks were made in the course of a sermon preached by request of the Young Men's Christian Association.

That the establishment of a library of good books in our midst would prove a blessing to the community cannot be questioned. Such an institution should be and can be procured, and its establish-

ment to build a handsome and useful home for the Y. M. C. A. in this city, time energy and loyalty and loye will be infused into the noble work. The Association already owns a lot in a pleasant location and has about \$2,000 now in the treasury. There is still due the Association six or seven thousand dollars in subscriptions, which were made for the building of this home. We are encouraged to hope that at no distant day the home will be erected and dedicated in the prayers of fathers and mothers and rothers and sisters to the glorious puryoung men to a higher mental and moral plane in life and of preparing them for the final summons that will bid them go to their reward in the life everlasting. Let the Association and its friends first of all build a home for the Y. M. C. A., but let them not forget how valuable a good library will prove in promoting Y. M. C. A. work. Perhaps the Association will have more money in the treasury than will be needed for building purposes. If so, the remainder cannot be better invested than in books for the Association. If there will be no funds from this source that may be applied to the library. then put solicitors to work and our generous people will not refuse to subscribe to so commendable and useful an institu-

Every Fourth Row in Corn.

To the Editor of the News and Courier Heartily in favor as I am of the proposed reduction of the area of cotton cultivation, I see some difficulties in the way that ave not been suggested. To cut downthe cotton crop to ten or twelve acres to the plough would be to reduce that crop y fully one-half and necessitate the anting of the remaining land either in corn or small grain, fencing it in pastures or allowing it to go out of cultivation. oubtless the latter plan would prove a vated, which are too poor to pay for the work. Yet as the tax collector will come around, and store accounts and interest on mortgages must be paid, it would not be convenient in every instance. It is a well established fact that negroes

of the whole cloth." Likewise, if his of the cotton, but, the negro does not, and apparently cannot, make grain. g his charges, the preponderance of Therefore, if the one half of our present

plough and not attempt to sow the re-mainder in grain, and at the same time nthfulness of the accusation or the de-nt, and until this is done the matter and be settled to the satisfaction of would require an immense increase in the laboring population, as it is clear that it would take twice as many ploughs and plough hands to work a given area in crops of say twelve or fifteen acres, as in crops of say twelve or literal acres, and crops of twenty four 10 thirty acres and the additional expense would, in case of failure from bad seasons, for instance, prove disastrous. This brings me to the

prove disastrous. This brings me to the suggestion I have to make.

Two years ago I was conversing with a Mr. Turpin, member of Congress from one of the western districts of Alabama, who, by the way, was unseated directly after by Tom Reed's Congress, then in Washington. Knowing him to be a large planter in his section, I asked him how he did about corn for his hands and stock. He replied that, up to the last six or severe years, he had annually spent a large He replied that, up to the last six or seven years, he had annually spent a large part of the profits of his cotton arop for corn for stock and meal for hands. Then he cropped on the share system, and, having to furnish feed for the stock, and to buy it, he found it a very poor paying business. That the negroes would not make corn when planted in separate fields or patches, but he had noticed that when a stray stalk came up among the cotton and was allowed to stand, it always grew well. So he positively forbade the planting by his croppers of any separate corn fields, and forced the planting of every fourth row of la. I prepared and fertilized for cotton in corn. This was worked exactly as if all planted in cotton, and the result was that, since the adoption of this simple regulation, he had not of this simple regulation, he had not bought a grain of corn on either of his

bought a grain of corn on either of his three large plantations.

The plan is simple, easily understood and easily followed, and strikes me as being the very best and most practicable that I have ever heard of to reduce the cotton area and increase and secure the yield of corn. He told me that he planted the corn at the same time and worked it with the same tools and in the same way as his cotton, hoeing and ploughing it through and through, and the yield every year was not only satisfactory, but surprising, and that as a matter of fact it had not reduced the yield of cotton by one-fourth, as the corn rows gave ventilation to and chance to spread to the cotton rows adjoining. I intend adopting or trying this plan in the future, and recommend it to the serious consideration of my brother farmers.

News and Centier.

- Russeli Barnes, a West Virginia man now 40 years old, is a freak in the way of sion such matters as we deem regarded from infancy as an imbecile, but his development has gone on slowly, and now he exhibits the apitude of a schoolboy and betrays a love for study. Prof. Morris, who is much interested in the case, says that Barnes in interested in the case, says tha slow intellectual development. Until lately he has been regarded from infancy

Southern Industrial Progress.

facturer's Record of this week contains its quarterly review of the industrial progress of the South, showing that, not-withstanding the usual dullness of the summer and the late financial stringency there has been a steady and solid advancement. Reviewing the progress of that section since January, the Record says: "The most trying period which the industrial growth of the South has ever encountered, and doubtless the most trying that it will ever have to face, has been that covered by the last nine or ten months. It would have been natural for a rapidly developing section like the South, where thousands of new enterprises were being organized or were under construction, to have felt the effect of financial troubles far more seriously than case. Of course, many enterprises

just getting under way when the panic came have been halted, and some have een abandoned, but this has been mainin the line of development and town rises in operation have gone along steadhave stood the financial strain emarkably well. Despite the extreme lepression in iron, Southern furnaces have generally been running to their full have generally been running to their full capacity and making some profit; cotton mills have been busy, and in nearly every line of manufacturing there has been a steady, substantial gain, even through the great monetary stringency. The way in which the South has stood the strain has supervised the financial world, and has has surprised the financial world, and has materially strengthened the confidence of he capitalists of the North in the great

"The panic is passing away; the whole country is entering upon a period of un-precedented prosperity, and in all human precedented prosperity, and in all number probability the next two years will be the most active in industrial advancement in the history of our country. In this great activity and prosperity the South will undoubtedly share. Its vast resources will command the attention of capital; new furnaces and steel works will be built, new cotton mills established, new mines opened, many miles of railroad built, and in every branch of its trade and industry new activity will be felt. "During the last nine months the South has continued to establish new manufac-turing enterprises, and in that time 2,742 new concerns have been organized, the list being as follows: Iron turnaces, 6; machine shops and foundries, 72; agri-machine shops and foundries, 12; flour mills, 40; cotton mills, 58; furniture fac-tories, 38; gas works, 20; water works, 77; carriage and wagon factories, 26; electric light plants, 124; mining and quarrying enterprises, 413; wood work factories, 372; ice factories, 58; canning factories, 48; stove foundries, 6; brick factories, 48; stove foundries, 6; brick works, 129; iron and steel works, rolling mills, etc., 40; cotton compresses, 18;

She Loved Him in Poverty.

a poor German, settled near Anstell some time ago. He was an honest, hard-working farm laborer, and won the respect and confidence of all who knew him. He received but little attention from the wo-men in the settlement. But there was one ways kind to the stranger, and their friendship soon ripened into love. As ooth were very poor, matrimony was not

A few months ago a letter with a for-eign stamp arrived at the Anstell post-office, directed to Richard Hornig. It an-nounced to him the death of his father in Germany, and that he was sole heir to 3,000,000 marks. Mr. Hornig visited Germany, and had no trouble in getting his fortune, and returned to Anstell last week. Of course this change in his condition made a marked change in the reception accorded him. But his heart was still It is a well established fact that negroes do a very large share of the farm labor in this and other cotton States, and it is as well known that as a corn, wheat and oat farmer the negro is not a dazzling success. The negro can and does make the most of the cotton, but, the negro does not, and apparently cannot, make grain. Therefore, if the one half of our present cotton area was planted in grain and depended on negro labor for cultivation it would almost certainly prove more unproductive than at present.

To cut down the area in cotton to the plough and not attempt to sow the remainder in grain, and at the same time to keep our farms in profitable cultivation, true to the little woman who had been he had selected truly loved him, and this, he said, he desired above all else.

The Latest Woman's Craze.

Topeka, Kansas., September 25.—
Shortly after the election in this State last fall Miss Fannie McCormick, the People's party candidate for superintendent of public instruction, declared in a speech that if the farmers' wives had been properly organized the Alliance would have elected its entire ticket. Yesterday the charter of the National Woman's Alliance, with Miss Fannie McCormick as its president, was filed with the Secretary of president, was filed with the Secretary of State. The incorporators include the wives of each of the Alliance Congress-men and Senator Peffer's wife heads the list. The organization is national and a list. The organization is national and a vice-president is named for every State in the Union. Lecturers will be sent into the field to establish Sub-Alliances to operate with the Farmers' Alliance. The object of the association is to establish a bureau for the education of women on economical, social and political questions, and to make and develop a better state mentally and financially with the full and unconditional use of the ballot.

No Danger in North Carolina.

WASHINGTON, September 23.—Senator Ramson fears that the interview with him yesterday, being expressed very briefly and omitting entirely some things that he said, may be misconstruct and prove misleading, so he adds to it fonight, and says there is no danger whatever from a third party movement in North Carolina; that the large majority of Farmers' Allianeamen and the stream of Farmers' Alliancemen and the strong-est and most influential of their leaders are patriots and Democrats. He thinks a few of the demagogues among the Alliance are trying to keep up this agitation in order to advance their porsonal fortunes, but beyond this the movement amounts to nothing. He is confident that the farmers throughout the State can be depended on to vote the Democratic ticket with absolute accordance.

- Connecticut's teleacoo crop is worth thirty million dollars.

- Rhode Island, the smallest State, has the largest population to the square mile. — When Charles Tunnison was killed by lightening at Warren, O., beneath a tree, on his chest was photographed the image of a branch of a tree.

The latest is from a Lexington jury of inquest, whose verdict was that "the man come to his death by what was the matter with him before he died." Next. - Commissioner Raum boasts that he is adding 100,000 pensioners to the pension list every year. Baum is a daisy. As a pensioner the Confederate armies were not a circumstance to him.

A New York hotel-keeper is exhibiting a box of twenty-five cigars which have been sent him by a Havana maker as a sample of what the Prince of Wales smokes. They are seven inches long and cost \$1,800 a thousand.

—A resident of Ansonia, Conn., declares that it always rains there on the 25th of July. He says that his family has kept a record of the weather for 100 years and in all that time there hasn't been a July 25th on which it did not rain. - George Holmes, of Cincinnati, is the

owner of a peculiar diamond. In the morning it is a beautiful sky blue, at noon is perfectly white, and at 6 o'clock in the evening it begins to turn black, and after sunsat it is like a piece of coal. - There is an average of nine murders

a week in this country committed by drunken men, and to be directly traced to whiskey. Yet with this fearful record—and it is only one count in the indictment—there are people who say: "Do not agitate prohibition!" — Smokeless powder having proven a success, and smokeless locomotives being a near probability, the inventive genius should now turn his attention to the

creation of a smokeless eigarette, which if successful, would cause all womanhood if not mankind to rise up and call him

empt manufacturers of spirituous or malt liquors who sell in original packages of not less than ten gallons. - According to a Government regula-

INVITATION.

THE LADIES of Anderson, and of Anderson County, and of the State of South Carolina, and of all sister States, are especially invited to come; also, the gentlemen will be gladly welcomed. In fact, we hope to make the visit of every man, woman or child to our Store not only a pleasure but a lasting benefit to them. We will begin to add new features to our already very extensive stock on and after the first of September. So everybody come to the GREAT BARGAIN HOUSE, No. 6 Brick Range.

MY COLLECTING HORSE

WILL go on the war path October 1st, 1891, and, with several years experience, and about six months rest, I think he can win the race. I have been running for the second prize, but now T must have the FIRST. If you don't want to lose your stakes, call and see me with your first Cotton. I have no promise to make for extensions, or longer time. When the race is up I want my money. You know when your paper is due. Late Cotton and other debts to pay is no excuse. Take fair warning-SAVE COST AND TROUBLE.

> WE HAVE A LARGE STOCK OF Carriages, Phætons, Buggies, Carts,

And a few good HORSES and MULES. You can buy anything in my line at a
