THE fight was on South Main Street at the Bazaar and Ten Cent Stores of C. S. Minor & Co. It was an attack of the combined forces of seven other merchants on the famous C. S. Minor. They fought in defence of their prices, which they claimed had been crushed out of all respectability by the said C. S. The oration published below was delivered by Mr. Fred. W. Nardin at the Commencement of the P. M. I.

TEACHERS' INSTITUTE.

The Teachers' Institute for Anderson County convened on the 20th of June and continued through the week. Prof. C. W. Welch was the conductor, and Mi Miss Helen Graham McMaster and Mr. Sligh assisted.

We will not undertake to give an idea of the work of the Institute, for we can not put it on paper. Every teacher present seemed delighted. Miss Hubbard, Miss Maggie Evans and Prof. J. B. Watkins took part in the work.

Prof. Welch is a gentleman of ability. and gave some very good suggestions. The teachers were all charmed with Miss McMaster's work. She is so animated, clear and enthusiastic. Some of us failed to see the application of Mr Sligh's work in the Institute He was not satisfied with any book he discussed, and directed his remarks more to faultfinding with the books; than to pointing out the best methods for using the

The attendance has been very good and great results have been accomplished. Association of the teachers is very helpful. We wish the people of the County could have been present to witness the work.

Every teacher will go away determined to do better work in the future, and feeling better equipped for work. It was stated by one of the instructors that it is conceded throughout the State that Anderson and Newberry are the two foremost Counties in the cause of education. We do not occupy a fourth, third or second place, but first among the Counties-no retrograding. The teachers of Anderson County have been repeatedly complimented by the instructor. We wish in closing to say that we will always cherish a pleasant recollection of the hours spent in the Institute, and will especially retain the very pleasantrances of the inst

"THE PRESS." I have chosen "the press" as my

theme more with the desire to post and

a subject : for, with my youth and inex-

perience, such an idea would be gross presumption. It is a truth few will care to controvert, that all great things have their origin in very small beginnings, and nowhere have we a better illustration of this fact than in the printing press. In its first conception it consisted mainly of a wooden screw and two blocks of wood. This simple machine originated in the brain of a German by the name of Gutenburg, about the year 1450. Little did its inventor anticipate that from it would spring the huge, ponderous mass of machinery that is to-day propelled by steam, printing thousands upon thousands of books, newspapers, magazines and pamphlets. In my opinion no science of the present age has made such gigantic strides towards improvement as has the press. Before the year 1400, printing was unknown. Books there were, but they were written by hand upon parchment. Just imagine for one moment the strain upon body and mind that was necessary to accomplish the task of writing five or six volumes in this way, to say nothing of the equally as wearisome task of reading. Now, in this nineteenth century of ours by s few revolutions of machinery volume upon volume can be printed in a single day, and nothing but pleasure is experienced in the reading. Of course the invention of printing by movable types greatly reduced the cost of books, and from this date their number rapidly multiplied and knowledge was more widely diffused than ever before. The press becoming then, as it has ever since been, the greatest educator in our midet. In this busy world of ours we cannot all be called to stand upon the high places of authorship, or hope to tread the world's great stage busiest or the very poorest not being informed on all live issues and current events of the day. Never have the facil-

It was Bulwer who said: "The pen is mightier than the sword," This being true, he who villifies another anonymously through the press is as bad as one who stabs his neighbor in ambush. Therefore, we should not say or write anything of another which we would not like to have said or written of us. The influence of the press upon society is untold, and it is one of the most potent factors in civilization the world has ever known. I know some who won't mend the front gate nor put a pane of glass in the window nor chop the stovewood nor bring the water, but they go tramping around talking politics, while their wives and children are supporting the family by raising chickens and picking berries to take to town. And there are politicians mean enough to fool these people, and to make them believe that somebody is imposing on them and has gobbled up their share of the money. Another History of Flat Rock.

This church is located about six miles south of Anderson city on the Leatherusefulness. Some 200 yards west of the public highway is a large flat rock showfrom which the church derived its name, On the 17th of November, 1832 the church was organized with sixteen members, ten males and six females. The Rev. John A. Davis was called to the pastorate and Aaron Hall, clerk, all of whom have passed away. The church was organized with members from Mountain Creek church. Aaron Hall, Joseph Hall, Jesse Davis,

tain day, and that day the conversation came up as to the importance of having church in the community. Doubtless the spirit of God suggested the idea to these humble believers as they were engaged at hard labor for the temporal support of their families. It was determined either that day or soon thereafter and settled down upon the site near which the present house of worship now stands. Mr. Joseph Hall, father of Aaron and Sanford Hall, was the oldest settler in the community, and owned all the land in and around Flat Rock. He agreed to give two acres of land, and Jesse Davis and David Tate agreed to pay him for two more acres. However, no measures were taken to secure a title for the said four acres of land. Time passed and the above-named property fell into the hands of Mr. Joab Hall, who made a warrantee title to Mr. Grief Tate for four acres of land on which the log house of worship was built. Mr. Grief Tate holds the title until this day.

Nothing was done towards building a house until they were through working their crops. The above named brethren, together with many others, then went to work and built a large log house of worship which lasted until the year 1856. Joseph Hall and Joel Davis were the first The church went to work at once for
