Tennessee has just furnished to the orld the most unique of all recorded

Major Wynne, a well known citizen of Dickson county in that State in a fit of passion growing out of some domestic broil murdered his wife. In token of their indignation at this outrageous crime the neighbors and friends of Major Wynne organized a mob, seized the wife murderer and hurried him off to some

convenient limb where he was lynched. The unique feature of the performance, however, is found in the entire friendliness and harmony existing between the victim and his lynchers. Major Wynne not only offered no resistance to their laying violent hands upon him, but entered with entire harmony and approval into all their actions. He made a brief speech to his friends just before being swung into eternity in which he cordially commended their course, and said he would have been ready to do as much for any of thera'under the circumstances. He even went so far as to express regret at having called his wife a "bad name," and to warn his hearers against domestic quarrels. Having finished his confession, expressed his repentance and given the foregoing friendly advice to his waiting murderers, he requested them to "make a

The glassblowers of Thebes were as reat proficients in their art as, possibly greater than, we are after the lapse of early forty centuries of progress and retrogression. They possessed the art of staining glass, and they produced this commodity in the utmost profusion. Rosilini gives an illustration of a piece of stained glass of considerable taste of make recitations and sing songs and design and beauty of color, in which the color is struck through the whole vitrified structure, and there are instances of the design being equally struck through pieces of glass half an inch thick, perfectly incorporated with the structure and appearing the same on both the obverse and the reverse side.

How they discovered the art is a matter concerning which nothing can be gathered, probably because the discovery went too far back in the national country .- Chamber's Journal.

A Childless Home.

Smith and his wife have every luxury that money can buy, but there is one thing lacking to their happiness. Both are fond of children, but no little voices prattle, no little feet patter in their beautiful home. "I would give ten years of my life if I could have one healthy, living child of my own," Smith often says to himself. No woman can be the mother of healthy offspring unless she is herself in good health. If she suffers from female weakness, general debility, bearing down pains, and functional derangements, her physical condition is such that she cannot hope to have healthy children. Dr. Pierce's Favorite Prescription is a sovereign and guaranteed remedy for all these ailments. See guarantee printed on bottle wrapper.

PROHIBITION'S PLEA.

The State Prohibition Executive Committee would present a few facts and proposition for the consideration of the voters of South Carolina, as justifying the appeal which we make to them to support the present movement to secure the prohibition of the liquor traffic in

ful results at this time, all over South Carolina, is attested undeniably by the largely increased criminal business of our Courts, the filling of our jails with criminals, our penitentiary with convicts, and our asylum with lunatics, the degradation and ruin of many of our brightest young men, and the general condition of unrest and demoralization which is everywhere apparent. In a word, it is the agency most potential in its influence in opposing the intellectual, social, material, financial, educational and moral interests of our people, and opposes an almost insurmountable barrier to the salvation of human souls. This condition of things is neither natural nor desirable, and exists in spite of the denunciation of God's immutable word against it, and the efforts of the good and true to reform it.

All efforts to regulate or restrain the traffic, or mitigate its evils by law, have proven abortive, because under the demoralizing influences, inherent in the traffic, the liquor seller utterly disregards or violates every provisions which is intended to restrain, and the authorities of their share in the profits, which in the shape of a license fee, comes in to swell the revenue of the County and municipal treasuries. Under these same influences, too, the people have become tolerant of its evils because of the false impression made upon them that the revenue derived from it relieves them, to that extent, from the burdens of taxation. Thus it is that the legalized liquor traffic in South Carolina is to-day conducted in utter disregard of every restraining prothese provisions were framed.

If these statements were true of any other business or class of men among us their mere announcement would be sufficient to arouse such a storm of righteous indignation as would only be satisfied by the final and complete removal of the evil complained of.

This being apparent as to the nature and results of the liquor traffic, who is resible for its continuance?

Making Gold Leap.

The rhythmic sound of hammer blows issuing from a cellar attracts attention of many a passer-by. The most curious stop, and though the windows see a row of men vigorously pounding square packages, turning them about at every blow. On a sign at the door of the store overhead there is a golden leaf with the word "gold" on it.
