They got into an altercation about a dus-ky Roman belle, named Anna Putnam. There are two sides to the affair. Holland says Upshur shot him without provocation, while Upshur claims that Holland drew his pistol and snapped it at him, whereupon he drew his pistol and fired at Holland. The ball entered Holland's left breast two or three inches above his heart and was cut out of his back by Drs. McCurry and hailey. The wound is not necessarily dangerous, and Holland returned to Anderson Sunday. Upshur was brought before the Town Council and relieved of \$10."

The second annual exhibit of the Anderson County Poultry and Pet Stock Association will be held in this city next Tuesday. Wednesday and Thursday, and day, Wednesday and Thursday, and promises to be a big success. This Association is doing a good work for our sec-tion, and it deserves the attention of our whole people. Among other things, it has for its object the improvement of farm poultry and the breeding of thorough-breds. Our farmers especially should breds. Our farmers especially should take an interest in the Association, attend its exhibits and learn something about raising poultry. There is always a good cash market for poultry and eggs, which, of course, is a benefit to the man who has such things for sale. The officers of the Association, Messrs. A Letter From Mexico.

SATILLO, MEXICO, Nov. 28, 1893. MR. EDITOR: In living in a foreign country among a foreign people, one learns to look at things from a different stand-point, and to view them in a different light from what he ever did before. This American as he comes among the easy-going, quiet Mexicans. The Mexican is rarely ever in a hurry, and is often willing to put off until to morrow what he might do to-day. This tardiness on the part of Mexicans touches the American at a few points. For instance, the postoffice is never opened here until 8 o'clock a. m., and no matter how anxious one may be to get his mail, he simply has to await until the time fully arrives before he can get it. Again, if you have an engagement to meet a gentleman at a certain hour, you need not be surprised if he should come an hour late. Time has no value to the Mexican. He takes it easy and does not

worry about it.

But the reader should not be too hasty to infer from the foregoing that Mexicans never do anything at all. Should he do that, he would be greatly mistaken. They have built a cathedral in the city of Mexico that is the fourth largest building in the world. And while it took them nearly a century to build it, yet I doubt whether, within reasonable limits, it shall ever fall into ruins. The idea of permanence seems to enter into every thing that the Mexicans do. They build for generations yet unborn. This fact is also seen in their system of irrigation. I is doubtless known to many in the States that in the north of Mexico, just as on the Pacific slope, there is very little rain during the year. So the Mexicans did centu ries ago what the citizens of the Pacific alope are just now thinking of doing— used irrigation for all farming purposes. Some of these irrigation ditches are over three hundred years old. I saw one re-cently that brought water four or five miles, and before it reached the plain, was at the height of two or three hundred feel on the mountain side. Of course, this water might be used to great advantage for manufacturing purposes before i reaches the plain. The Mexicans are be ginning to wake up out of their long sleep, or rather they are being aroused by entersing American capitalists. But whether he sleeps or wakes, his past attainments in the matter of irrigation will be a perpetual blessing to all who shall live in the

consumption. It is but just to say, how-ever, that in the valleys of Mexico, irriga-ments, with interest from day of sale, sereded.

I shall mention only one other matter in this letter, and that is in regard to the letter, and that is in regard to the Dec 6, 1893

ing country, the doubts of Americans to the contrary notwithstanding. Goats, sheep, cattle, burros and horses are raised in abundance. Horses are much cheaper here than in the States. A good horse can be bought for forty or fifty dollars, while a pony may Le had for fifteen or twenty dollars. The markets are kept supplied with beef, mutton and kid. One is struck especially with one characteristic of Mexican raised stock, and that is their power of endurance. This is true both of oxen, burros and also of their ponies. The writer recently made a trip to the country, riding a small Mexican pony. The distance was not more than fifty-five miles, and the trip was made in a little more than one day. On my return, I rode twelve miles in less than an hour and a half, but it did not hurt the pony a

all.

While in the country the writer noticed several things that were characteristic of Mexicans. They tie everything with strings, of which he has abundance. For instance, when he goes to milk his cow, he never runs the risk of being kicked or of seeing the cow put her foot into the pail of milk. What then does the patient Mexican do? He simply ties the cow's hind legs together with a stout twine string, and milks his cow in quietness. Hatto la vista (good-bye for a while.)

Every male citizen between the ages of

twenty-one and fifty years at the beginning of the present fiscal year (Nov. 1st, 1893,) is liable to poll tax unless incapable of earning a livelihood from being maimed or from other physical defects.
Cotton, Wheat, Corn and other crops
on hand the lat of January, 1894, are not
taxable, but all of these articles, in excess of one hundred dollars' worth, on hand the 1st day of Angust last are liable and must be listed for taxation.

Real estate will be assessed this year and taxpayers will please refer to their deeds to be sure they return the correct number of acres, lots, buildings, &c., as this assessment of real estate will stand for four years. All buildings worth ten llars or more are to be returned for taxation. To facilitate the work, and insure correctness, I would insist upon all taxpayers, before returning, to make a memorandum of each building and its value, the number of horses, mules, cattle, hogs, sheep and goats, watches, organs and planos, carts, buggles, wagons and carriages, dogs, &c., with the value of each; and also the value of all machinery, moneys, notes and accounts (above indebtedness) on hand or owned by them on the 1st day of January, 1894. We must insist upon texpayers making returns by the 20th February, the time prescribed by law, otherwise a penalty of 50 per cent., must be added to the valuaons. We must also insist upon correct returns to prevent errors at the time o collecting taxes. The work of this office is very arduous. We have to charge up some seventy-five or eighty thousand dollars of taxes, aggregate the number and value of all the horses, mules, cattle, &c., acres of land, lots, buildings, in the county, and in addition, furnish serial requests and verify the sales of the county and a serial requests and verify the sales of the county. ly dispensary. So we confidently hope that our friends will comply with these easonable requests, as our time is too limited to correct errors that might be avoided, or to take additional returns that

might have been made within the time prescribed by law.
