We have a very good school at this place now. Miss Lillian P. Crosby is our teacher, and I think she is liked by all the patrons.

The farmers of this community are using cotton seed meal and acid, mostly, for fertillizers this year. We all know it is cheaper at the start, but whether it will pay in the end is to be found out.

Our soil here is of a black, sticky nature, with no rocks, stumps, steep hills, brier patches, crab grass, and very few negroes. We don't use any fertilizers—not even the

stable compost—on our land. We count on getting from one-half to three-quarters of a bale of cotton from the acre, thirty to

sixty bushels of corn, and from fifty to ninety bushels of oats. Wheat is uncer-tain, but last year over twenty bushels to the acre. Millet grows fine here. The alfalfa clover is the best feed I have ever

seen. It makes over a ton to the acre, and we mow it three or four times a year.

We don't pull much fodder.

We use machinery and sulky plows in

mearly all our work on the farm. My ten-year-old boy can plow over seven acres of cotton in a day, or cut, bind and pile ten acres of oats in the same time with three

mules to my binder. This looks like work when I compare it with the old cradle and

muscle power it takes to run it. We have another advantage. Our farms

are fenced with barbed wire, and we turn in our horses and cattle whenever we want

to. We have a hog law, and we keep the best breeds in the world. I suppose some
