Death of Hon. Wm. Henry Trescott.

Hon. William Henry Trescott died at the home of his son, near Pendleton, last the 76th year of his age. Editor Hoyt, of the Greenville Mountaineer, who was intimately acquainted with the deceased,

speaks of him as follows: He was a native of Charleston, and removed to Pendleton during the war be tween the States. Mr. Trescott was unus-ually gifted and highly accomplished, and his skill in diplomacy was very remarka ble, so that the greater part of his life was spent in positions where as a student of international law his services were most valuable. When he was thirty years of age he became secretary of legation at London, and he was selected by Gen. Cass for assistant Secretary of State under President Buchanan, and was acting as secretary when the war broke out. He represented Anderson County during and after the war in the Legislature until reconstruction took place, and soon afterwards he removed to Washington, D. C. where he was connected with the depart ment of State as special counsel for a num ber of years, including the incumbency of Hamilton Fish and James G. Blaine, both of whom greatly appreciated the ability of Mr. Trescott as an international lawyer. He was a prominent figure in the diplo matic circles of Washington, and remained in active life until two or three years ago, when he came back to Pendleton. His graceful pen showed that he was a master of literature, and his pure and undefiled English was unsurpassed. The Contederate monument at Commbia bears an inscription which came from his head and heart, and is considered a masterpiece in composition, while expressing the nobless and most patriotic sentiments. WE hope the people understand that our taking these Doctors into the business doesn't mean that they are all to live off the Firm. The Managers and Clerks, of course, are dependent upon the success and profits of the institution, as they have no other visible means of support. These Doctors, however, get their living physicing folks, and their principal bases of supplies are those who imagine

It is the volume, properly managed and directed, that leads to success in any line; and we hope by a community of capital and influence to so increase the volume of our business as to compensate for the decrease in net profits.
