

THE MAGIC PAINTING

WHEN THE ROOM WAS DARKENED THE COW WENT TO SLEEP.

How the Transformation Was Effected and How Some Other Seemingly Wonderful Effects May Be Produced by the Aid of Chemicals.

The Chinese Emperor Tai Tsung possessed among other treasures a picture known as a magic painting. It represented a pastoral scene with a cow standing in a field and mountains beyond.

When the picture was shown to strangers or guests and they admired it, the emperor would say: "Yes, this is a remarkable painting. The cow, as you see, is standing, but if the room was darkened the cow would think it night and would lie down."

The picture was a water color, over which was painted in colorless phosphorescent paint a similar picture representing the cow lying down. In the light the standing animal was seen, but at night or in a darkened room only the phosphorescent picture was visible.

A Dresden chemist, named Schade, has discovered a method of imitating it which can be accomplished as follows: First paint in ordinary colors the picture of the cow standing. Then melt some Zanzibar copal over a charcoal fire and dissolve 15 parts of it in 60 parts of French oil of turpentine. Filter this and mix with 25 parts of pure linseed oil which has been previously heated and cooled.

Now take 40 parts of the varnish so obtained and mix with six parts of prepared calcium carbonate, 13 parts of prepared white zinc sulphide and 36 parts of luminous calcium sulphide, all of which can be obtained from any chemist.

This emulsion should be ground very fine in a color mill. The result will be white luminous paint, which should be used to paint the cow lying down.

Many seemingly wonderful tricks can be performed with the use of a few simple chemicals. One of them is the ball of fire. Take for this barium sulphate (BaS), 1 part; magnesium carbonate (MgCO3), 1 part; gum tragacanth q. s. This should be mixed and rolled into marbles and kept at a red heat for about an hour, then allowed to cool slowly and placed in a glass stoppered bottle.

A few hours before using place in the sun, and the marbles at once become luminous.

At the entertainment ordinary marbles are passed among the audience, one or more of the luminous marbles being concealed in the hand. The exhibitor then takes a marble from some one in the audience, holds it between his thumb and forefinger, blows upon it, and asks to have the lights turned down. As this is done he substitutes the luminous marble, and the mysterious light is seen.

Another trick is very effective. Take two similar bunches of artificial flowers. Brush one over with glue or mucilage and powder it with the dust from one of the marbles described. Then place in the sun. When taken into a darkened room, luminous flowers are seen.

The magician exhibits the flowers that have not been prepared and shows that there is nothing peculiar about them. Then, as the light is turned down, he substitutes the concealed bunch, blows upon the flowers, and presto! displays to the astonished observers a luminous bunch, each flower of which stands out as if at white heat.

Luminous letters can be written and exhibited in the dark to the wonder of the audience. Luminous ink is made by placing a piece of phosphorus about the size of a pea in a test tube with a little olive oil. Place the tube in a water bath until the oil becomes heated and the phosphorus liquid. Shake well and pour into a bottle with a glass stopper. Admit air just previous to using it, and the fluid will become luminous tracery in the dark.

Water can be rendered luminous in a very simple manner. Dissolve a small piece of phosphorus in ether for several days in a glass stoppered bottle. In this place a lump of sugar, then drop the sugar in water, which will at once become luminous.

Luminous paints can be made any color—green, yellow, violet or blue—and if applied to various objects make a wonderful display at night.—New York Sun.

The country child requires attention, according to Miss Cobbe. She relates an incident which took place on her return after a lengthened absence to her country home, when she addressed a youth formerly under her tuition.

"Well, Andrew," said Miss Cobbe, "how much do you remember of all my lessons?" "Ah, ma'am, never a word."

"Oh, Andrew, Andrew! And have you forgotten all about the sun, the moon and stars, the day and night and the seasons?" Andrew scratched his head and replied: "Oh, no, ma'am," he said. "I do remember now. And you set them on the schoolroom table, and Mars was a red gooseberry, and I ate him."

His Distinction. "I'm sure I don't know why the Rev. Mr. Fifely calls himself the boy preacher," said Mrs. Snaggs. "He's 54 years old if he's a day."

The man who was "born tired" should use Prickly Ash Bitters. It makes work a necessity to give vent to the energy and exuberance of spirits generated by functional activity in the system. Sold by Evans Pharmacy.

Down East Curiosity.

It takes a down east man to ask questions, but once in a while one of them finds his match. Jonathan overtook a gentleman who was traveling on horseback, notwithstanding the fact that he had lost one leg.

"Been in the army, I guess?" was the anxious inquiry. "Never was in the army in my life," the traveler returned.

"Fit a duel, p'haps?" "Never fought a duel, sir." "Horse threw you off, I guess, or something of that kind."

Jonathan tried various dodges, but all to no effect. At last, almost out of patience, he determined on a direct inquiry as to the nature of the accident by which the gentleman had come to lose his leg.

"I will tell you," said the traveler, "on condition that you will promise not to ask me another question."

"Agreed, agreed!" exclaimed the eager listener joyfully. "Well, sir," remarked the gentleman, "it was bit off!"

"Bit off!" cried Jonathan. "Waal, I declare; I'd just like to know, powerful well, what on arth bit it off!"

Wood Cotton. WASHINGTON, June 15.—Consul Mahin, of Reichenberg, Austria, under date of April 21st, quotes an account in a local newspaper of a process for making artificial cotton from the wood of fir trees.

The article concludes: "Artificial cotton can be produced so cheaply that the genuine article can hardly compete with it and one cannot say that it is a sham, for it is composed, exactly as the natural cotton, of pure cellulose."

Mr. Mahin adds: "In a country such as this, where forests of fir trees abound and are made perennial constant replanting as the large trees are cut down and where all the cotton used in the numerous factories must be brought from far India and the United States, such a device should be profitable."

For a Hardy Orange. WASHINGTON, June 15.—The agricultural department, which has been experimenting to produce a sweet orange that will stand the frosts that have repeatedly swept the orange belt in Florida, has progressed to the point of budding the oranges so secured on growing trees in Florida.

The trifoliata grows as far north as Philadelphia, but bears no fruit worth mentioning, though it is a vegetable cousin of the sweet orange. Seedlings from the hybrids so far produced promise to give an exceedingly hardy and valuable fruit producing tree.

Dr. Webber's mission in Florida is to bud a quantity of these seedlings on live orange trees. This, it is hoped, will give definite results several years sooner than if the department waited for the hybrid seedlings to mature and bear.

The department's experiment will be assisted by a number of Florida growers and the work will be extended north in time as far as Washington. Seedlings are being taken to keep the new hybrids thoroughly in control of the department to prevent worthless or inferior varieties being put on the market.

When the work has progressed sufficiently the new varieties will be distributed through the regular channels.

CASTORIA For Infants and Children. The Kind You Have Always Bought Bears the Signature of

Dixie Thompson, the "Bean King" of Ventura county, Cal., planted 20,000 acres in beans last year. The crop was 1,300 car loads, embracing more than 100 varieties. The beans were sown and cultivated in the same manner as corn, and were harvested by special machinery.

If you are suspicious of the motives of other men, the proof is positive that you yourself will bear watching.

PAUL E. AYER, Real Estate Agent.

Expected Her to Help Some.

Silas is a country character, who means well. He tries to earn a living and "tinkers around" at odd jobs and chores and whatever he can get to do; but he works a good deal as he talks, with a painful drawl that is very suggestive of that state of natural restfulness which his ilk call "born tired."

Silas came to mend a fence the other day for one of his patrons in the suburban village where he belongs with a peculiar air of festivity about him. He had on a bright new necktie of blue Japanese silk, and his honest face was covered by an expansive grin all the time that he was receiving his orders.

"You seem happy, Silas," said Mr. Blank, with some curiosity, when he had finished about the fence. "Ya-as," drawled Silas. "Ya-as, I've been a gittin' married this mornin'."

"Married? You? Why, Silas, man alive, what on earth have you gone and done that for? You can't support yourself as it is!"

"Wull," said Silas, "I ken poety nearly support myself, 'n' I think its a durny pify she can't help some."

Willing to Quit. A good story is told of an interview of W. H. H. Bingham with one of the State boarders at Windsor. Some of the prisoners were at work lathing the guard room during a recent official visit of the Governor, and the latter was inspecting the progress of the work.

Mr. P. Ketcham, of Pike City, Cal., says: "During my brother's late sickness from sciatic rheumatism, Chamberlain's Pain Balm was the only remedy that gave him any relief."

Thomas Thurman, deputy sheriff of Troy, Mo., says if everyone in the United States should discover the virtue of DeWitt's Witch Hazel Salve for piles, rectal troubles and skin diseases, the demand could not be supplied.

DeWitt's Little Early Risers act as a faultless pill should, cleansing and reviving the system instead of weakening it. They are mild and sure, small and pleasant to take, and entirely free from objectionable drugs.

It isn't likely that Solomon succeeded in convincing all his wives that a word to the wise was sufficient.

Effect of Drink on Health. MIDDLETON, CONN., June 9.—The first official announcement of the results of Prof. Atwater's experiments on the value of alcohol as a food was made to-day in a circular issued by the Middleton Scientific Association.

They prove that two ounces of alcohol taken in twenty-four hours have no bad effect on a man. More than two ounces act as a poison.

These particular experiments were conducted under the auspices of a committee of fifty for the investigation of the drink problem, of which committee the chairman is Seth Low, president of Columbia University and delegate to the Peace Congress at The Hague.

As soon as Prof. Atwater learned that more than two ounces were harmful, he went no further in that direction. He had no desire to learn how much he can drink without hurting him.

S. S. S. GOES TO THE BOTTOM. Promptly Reaches the Seat of all Blood Diseases and Cures the Worst Cases.

In every test made S. S. S. easily demonstrates its superiority over other blood remedies. It matters not how obstinate the case, nor what other treatment or remedies have failed, S. S. S. always promptly reaches and cures any disease where the blood is in any way involved.

Everyone who has had experience with blood diseases knows that there are no ailments or troubles so obstinate and difficult to cure. Very few remedies claim to cure such real, deep-seated blood diseases as S. S. S. cures, and none can offer such incontrovertible evidence of merit.

Fortune for a Convict.

SAN FRANCISCO, June 7.—Richard Daverkosen, who is now serving a term in the county jail for stealing thirty cents from the poor box of St. Joseph's Catholic Church, will find 300,000 gulden, or about \$75,000 American money, to his credit in the National Holland Bank when he is released.

He took the thirty cents because he was on the verge of starvation and was too proud to beg. After his conviction his wife and children left him, returning to their former home in Germany.

Several days ago the German consul here received a letter from La Chapelle, making inquiry for Richard Daverkosen, once staff officer of Von Moltke, and stating that an inheritance of 300,000 gulden, part of the estate of his maternal aunt, Madame Schlecher, was awaiting him.

He was found in prison and taken by two officers to the consulate, where he established his identity as Capt. Daverkosen. He joined the German army on the outbreak of the Franco-Prussian war, and made a good record. It is said he will inherit \$300,000 more on the death of his stepmother.
