WEDNESDAY, MARCH 13, 1901.

Portman Letter.

Andersonians may now be happy. and don't be so slow. The big machinery has all arrived at the Portman power house. The power house here is the manufactury for the electric. ity that freighted on its few wires throbs through every artery of the business world of Anderson. From the power Gallard's family, who lives in the suhouse this energy is unwound, or uncoil. burbs of our little village, has measies. ed, as it were, from the great circuits of In fact, Dr. Guyton was called to see Mr. speed, re-wound upon the spindles of Gailard's mother. We hope that the trade at the substation in Anderson, and dreadful malady will not get into our litin living threads of fire sent through the | the berg. Some of the citizens are talking fabric of commerce an1; manufactory throughout the city and its environments.

Nine miles additional wire are being strung by Mr. Long between Portman and Anderson by which to convey 1660 extra horse power. There shall now bea potential of energy to the amount of 4,593 top, in the way of a "box supper." This horse power, which, escaping its narrow

bounds here, shall in its own domain of our village for the purpose of raising usefulness wind, grind, whirl and weave | funds to finish paying for an iron fence for the finance of the rich and the comfort to enclose the cemetery at Reaverdam of the poor. Capital might well bacome more capatalistic by the aid of this subtle fiery stead. \$15.00 secures the rental of onehorse power for a year. How little the

high-strung noble animal eats, how easily groomed and stabled ! The uninitiated cannot tell the momentum of one horse as motive power in a mill or printing press, but the farmer can tell its worth on his one horse crop. He the equal of Joe McGee, of your city. would be glad to reut several such horses for fifteen dollars per year each, without food, raiment, stabling or care.

There are now four manufacturing machines at the power house. The latest or present arrival is a third larger in capacity than those previous, and is of a construction to require less room. A new machine arrived last year of 1,333 horse each, so it will be seen that the electric company is growing in power, Ander son growing in population, and the pop ulance in prosperity and comfort. The correspondent for the INTELLIGENCER was conducted by Mr. Frank Mayes through the avenue of wheels and velocity. This was a dispensation of special grace to the INTELLIGENCER's scribe, as all outsiders are barred, and the engines of electric power are as Mount Sinal, bounded around, and none dare touch them lest they die. The tromendous revolution of those swift wheels, their momentous meaning of life or death ! the gazer is lost in sublimity and cares little to come down from the mount of contemplation to ask a question; but "how are these wheels now making electricity?" asked the idls questioner, who, like a child, asks idle questions.

child, asks idle questions.
Mr. Mayes, with the patience of a gentlemsu, explained: "You see this leather band connecting the wheel with this."
the machine over here. The smail matchine is called an exciter; it weighs about 2,000 pounds, is charged with cleetricity, as the wheel is set in motion by water power the velocity is carried to the exciter. All life is activity the activity received from the wheel. Each wheel has its own exciter."
"Yes," said the collightened questioner, "Yes," said the collightened questioner, "G, the exciter always reserves a resite the wheels stop?"
"O, the exciter always reserves a resite the wheel stop?"
"But," said the interviewer, with the start, after the wheel begins."

The farmers are very busy just now proparing their lands for another crop. me will plant corn next work, others are putting in their fortilizers, and you can hear from early more ontil late that doleful sound "Geo, liss ' Come round

The small grain is looking well and promises a hoppital barrest

Guyton News.

We hear that the measies are raging in the Pisgsh community, but not in a very bad form. We hear that Mr. Walter attack. We are just as happy as mocking birds now, Mr. Editor. The nearer spring comes the happier we get. The fruit trees are beginning to show a little sign of a good fruit crop this year strong of quarantining to protect our village. We don't know just now what

year. Mrs. Will Thompson, we are sorry to hear, is very ill with pneumonia. Dr. Willie S. Hutchison is waiting on her. We again, Mr. Editor, have to say something to our boys about cursing in the presence of ladies. It don't sound very nice, and especially on the public highway, where everybody can hear them. action the vitlage council will take in this mattor. We young folks had quite an enjoyable occasion last Tuesday night at the residence of our townsman, Dr. C. L. Guyontertainment was given by the ladies of

sound very nice, and especially on the public highway, where everybody can hear them. On first Saturday night there was a music entertainment at Mr. Lawrence Thompson's, given in honor of Miss Eva Gentry, of the Concord section. It was much enjoyed by the large crowd in attendance. Mr. and Mrs. Thompson, with their lovely daughter, knows how to entertain their guests. Mr. John A. Shirley and bride of Bel-ton, who have recently married, have been visiting friends and relatives in this section. We hope their lives will be crowned with success. Mrs. C. A. Welborn is confined to her bed. We hope she will soon recover. We heard one of our girls say her best fellow killed her cat, and she told him he might as well killed her, and said, "now your head or your heart, with which one can you part?" Dr. W. S. Hutchison has plenty to do now since Dr. Duckworth has gone to take a special course at New York. Hope the doctor will soon return. A MAIDEN. Bantist Church. Quite a number of invitations were sent out and at 8.30 the invited guests began to come in, each lady bringing a box containing everything good to eat, and in each box was the name of the owner. It was amusing when the boxes were sold to see the gentlemen trying to find out which box belonged to his "best girl." Mr. D. Anderson was the Crier and proved to be We would advise any one having property to sell to call on Mr. DeWitt Anderson. At 10 o'clock the dining room door

was opened and guests began filing into supper, and it was a sight to behold the tables, which were loaded with delicious The long looked for and hoped for snow has come and gone, and noy the little folks are wishing for another one, bat we hardly think that their wishes will be gratified this time. Farm work has been progressing nicely for the past three weeks, conse-quently a great many of our farmers have begun putting in guano, and some are now thinking of planting corn. Nearly all of the fertilizer that has been hauled to this section of the county came from the Anderson Fer-tilizer Factory. estables-cakes, all sorts of sandwiches. ham, chicken, pickles, custards, &c., all served with hot coffee. We want to say power, two more previous to this of 800 that Miss Alice Duckworth and Misses Ada and Ida Rogers will be long remembered for giving us this entertainment, for we certainly enjoyed ourselves. After supper we returned to the parlor and the young gents were invited into a room to themselves. Mr. D. came in with a white robe and would cover up one of white robe and would cover up one of the young gentlemen and march him into the parlor and sell him to the ladies. Mr. D. would tell them that be was alright and would work anywhere, and was not over 7 years old, but the ladies would want to look in his month, others-would ask Mr. D. to trot him around, some would say that his feet looked like he has been foundered, but att this did not discourage Mr D., for he was bound to sell at some price. After the sale, we had a me elegant music, and at 12 o'clock we began to bid the Dr, and Mrs, Guyton tilizer Factory. Mrs. Wm. Elrod is very sick with the grip. as is also Mrs. J. F. Hackett. Their many friends wish them a speedy Their many friends wish them a speedy recovery. It seems that at a certain school near Anderson, on the Trinity read, the children are not only learning the benefit and importance of the use of the English language but are also growing proficient in the art of throwing rocks and using filthy language, as was evidenced by a gentleman one day last week while passing along the road on his way home from the city. He chanced to be passing the school house at more particular to be the school house we began to bid the Dr. and Mrs. Guyton good night. HONEY BEE.

Holland's Store Items.

howing set of school boys, yelling, cursing and throwing rocks like a pack of Comanche Indians. Such conduct as that is unbecoming and a disgrace to any community. Mr. Harrison Hacket is visiting in Oconce County at present, Mr. Wm. Harper and wife, of Six Mile, Pickens Co., visited relatives at this pickens for days are

Mile, Pickens Co., visited relatives at this place a few days ago. One of the most interesting meetings that we ever had the pleas ire of at-tending, was that of the Iola Debating Society last Saturday night. The sub-ject discussed was, "Resolved, That emancipation has not been a benefit to the negro." Each side did all that they could to win the decision in their favor, but both could not win, conse-quently the judges decided in favor of the negative. Both ladies and gentle-more were invited to come and and hear

Iola News.

Rain, rain, is the order of the day at this writing, Mr. Editor, and it is re-freshing to all mankind. Guess some of us had such fine sport snowballing case other. Mr. Claude Horton is better now, but has been very ill with fever. We hope he will continue to grow stronger. One of Septos' dashing sports, Mr. Allen Browne, spent a few days with his friend, Mr. Adolphus Holder. The grip is an intimate friend to us. It calls on us every once and awhile. It calls on us every once and awhile. Mr. James Wilson has had a light C.F. Jones & Co.,

satue bright idea that inspires a chil? when he asks what the moon is made of "but where does it get the electricity first? Where does it get the 'residue ?' '' "The exciter is charged when it comes here," said Mr. Mayes. The questioner did not ask where the charges came from, or who made them, the limit of under-standing had been reached, and with the air of one whose comprohension was now surfelted turned a listless giance around to the opposite wall, and said, "What are those clock-looking things?" "O, those are registers," said Mr Mayes, "two registers for each machine, to show where the current is grounded; that is, to show where between this and Anderson the current is lost, or drops by

Anderson the current is lost, or drops by induction. Four for the lines, to indicate where their current is lost by breakage or other accident. These volt meters register the pressure of power on the machines from the generators. We ro-cord every hour the amount of current in transit: the report is sent into br Orr's office in Anderson." "Of course your machines are shut down on Sundays?" asked the intervie x-

This entire country was saddened hall.
This entire country was some hall.
This entire country are Messry. W. D. George, R. C. Canton, J. R. Nowoll and F. C. Goggins, each of whom alternates with the other for day and night services.

An appreciative entertainment was given the evening of the S.h. inst. by the young gentlemen of the power house. Mr. and Mrs. Busby gave the "freedom of the house" to the young people, and music and dancing for a while shook off the drowsy lethargy of monotony. Every member present was a staunch supporter of religious denominational principles, but each realized that activity and the ha. miess playfulness of child-hood are not condemnatory virtues. Messers, Joe and Sam Williams, of Port-man supplied music that would inspire even the feet of the aged to the supple mess of youth.
