To Revive Anderson Agricultural and Mechanical Society and Annual Fair.

There appears to be a strong inclination among some of our leading agriculturists to revive the custom of holding County Fairs, and the Intelligencer, appreciating the great benefits which have accrued to Anderson County in the past from agricultural societies and annual fairs, welcomes this growing sentiment and will gladly do all in its power to aid in the re-establishment of a custom so beneficial and of such general advantage.

The remarkably rapid development in the last few years of manufacturing industries in this County has naturally resulted in these enterprises being kept prominently before the public to the neglect, apparently, of agricultural interests, but the intention was simply to cultivate and stimulate a spirit of industrial development at that particular time when it gave evidence of most vigorous growth, feeling assured that the agricultural development of Anderson County would continue to maintain the high reputation it has throughout the State without any special aid from this paper in the meantime.

As far back as the days of John C. Calhoun there was organized, at Pendleton an Agricultural Society, which continued vigorous up to the civil war, and was the first society to be established there after the war. Mr. Calhoun was an honorary member of this society, taking much interest in its meetings, at which essays were read on the culture of the various products. Annual fairs were held and prizes of money and impulse given to agriculture from the efforts of this society that have been of incalculable benefit to this entire section of the State. Nothing conduces more to the general advancement in any branch of art or science than the coming together annually of those whose minds and energies are being constantly given to the particular work under discussion. Ideas are exchanged, experiments made known, profitable experience discussed and progress is made easy and rapid.

In 1898 the Anderson Agricultural and Mechanical Society was formed, and Hon. B. F. Crayton, the leading spirit in organizing the society, was elected president. The people throughout the County took an interest in the Society, the fairs were made a success, agriculture was stimulated, business flourished and a new impulse was given to the front rank as one of the best, if not the best, agricultural counties in the State. Political differences which sprung up just prior to 1890 drifted the people apart and this society gave place to the organization of other societies throughout the country, having for their object the redress of grievances regarded as resulting from political conditions. These differences no longer exist, as far as possible all grievances have been adjusted, and it is now proposed to reorganize this society.

The holding of a Fair this year is, of course, not contemplated. It is too late for that, but the time for the better time for organization. If the organization can be completed this fall and several meetings held between this and the spring season, it will be possible to hold a Fair next October, which will draw visitors to Anderson from all sections of the upper part of the State and give an impulse to our agricultural and mechanical industries they have not felt for years.

To facilitate the early re-organization of this society the Intelligencer will make the library of names of a few leading men in each Township, who, if they will take an interest in the matter and arrange to get together, can make the movement a success from the very start. In giving these names the Intelligencer does not intend to omit the names of very many of our prominent citizens. Only a few can be mentioned and the following are the first occurring to the mind:

Holland's Store Items.

Sim Sullivan, a colored tenant on A. F. Shearer's land, had a lot of seed cotton stolen from the field one night last week. The thief lay on the river and in plain view of Georgia, and it is thought that the cotton was carried over the river. There were about 355 pounds in the field, and it was all taken. The place of landing was plain and tracks to and from the cotton field could be easily traced, but beyond this no other clue could be obtained.

Gathering crops, both corn and cotton, are about over. Corn on bottom lands turned out well.

Some oats have been sowed and the work still continues. Preparations are in progress for a good wheat crop. What is sowed will be put in well, as we have ample time.

Mrs. Caudle, of Anderson, is spending a few days here with her parents. A year has passed since the rural mail service has been in force, and we like it better and better. Our clever carrier, Walter L. Pruitt, has not missed a day in the year. He is always turned to accommodate his patrons. Such service cannot fail to meet approval. "I never saw" ought to tack on another hundred to his salary.

We hope the bridge at Hardscabble will soon be built before the winter rains begin to do the work done on the hill on the western side of the creek. Burke.
