The fine water power at Hatton's Ford, on Tugaloo River, about thirteen miles west of this city, has been purchased by a company of local capitalists of Anderson from J. J. Fretwell, who retains an interest in it, for the purpose of erecting a large electric power plant. All the power will be brought into this city over the electric wires and used by cotton mills and other manufacturing plants in and near the city. It is estimated that the plant will elevelop about 7,000 horse power, which will be about 2,000 greater than the plant of the Anderson Water, Light and Power Company at Portman Shoals. The work of building the dam will begin in a short while and pushed to completion as rapidly as possible. Most of the power has already been engaged, and by the time the plant is completed it will, no doubt, like the one at Portman, have all it can do.
