BASE BALL.—We learn that the long contem-plated match game between the first nines of the Alert and Palmetic Clubs, will be played on Saturday, the 13th inst., on the Citadel Square, at 2 o'clock, P. M. Both clubs are in full practice, and the lovers of the national game may expect a well-contested and exciting game. This time the l'al-mette Club are the challengers, and the recent game between the second nines will only stimulate the first nines to greater efforts. We have been informed that it is the intention of the players to erect a large awning and seats for the accommoda-tion of the ladies, and we, therefore, sincerely hope that the fair sex will honor the gentlemen hope that the fair sex will honor the gentlemen accommodating efficial; in the opposite corner with their presence and encouragement. The tent will be creeted in a shady spot, and there will be a letters and notes can be obtained. It would police force in attendance to preserve order. It is not be a fair without the customary grabtime to exercise after the fatiguing routine of comice duty, and we are pleased to see that the for just one grab. The tables are ranged along game is becoming popular. The public generally, and the ladies especially, are invited to witness

A LUCKY HAUL.-We have recently been favored by an invasion of the turtle tribe, and the stalls in the fish market have been seldem bare of specimens of the cooter, the terrapin or the turtle. A visitor to that locality may any morning observo some monster of the deep reclining on his back and vainly flapping his wings in his efforts to es-cape from his unpleasant position, while the smaller fry are confined in baskets, which are covered with cord and effectually secure them. The lovers of savory soup and tondor steaks will be pleased to learn that the market floor was graced storday by the presence of a noble pair of these interesting animals, and although their poculiar formation provented them from tripping the light fantastic toe, their flux moved with a gentle sound that was music to the ears. These interesting apecimens were evidently fondly attached to each specimens were evidently fondly attached to each other, and it can be said of them as of more fa-vored beings, that, "lovely in their lives, in their deaths they were not divided." They were cap-tured off the battery by an enterprising follower of Isaac Walton, who certainly thought his lines were cast in pleasant places when they were ed by such tpromising subjects. The captur was easily effected, and the deluded pair transferred from their native element to the market stalls, where their fate is scaled, and the pot will soon bubble and beil with joy over its contents.
As they weigh about fifty pounds each, there will be an abundance for all; but we advise an early visit to the Fish Market.

Mayon's Count-July 10 .- Rosa Ra LIZZIE ABIITON, two females who have seen the interior of the Guard House before, were brought up for keeping a disorderly house in Elliott etreet, and the evidence against them was so conclusive, that his Honor directed them to remove in two days, or he would put them where they couldn't move in two months. Three unfortunate white boys, who were the

only ones caught out of about twenty who were swimming in day time in Boyce's dock, were fined \$2 each. From their appearance we should judge 24 each. From their appearance them no harm, although, we have no doubt, the cleanly fish were highly delighted when the police appeared

and scared off the fitthy intruders.

Four hotels, which were dispensing cobblers, juleps, smashes, and other liquids that enable men to pass unseathed through the terrible het weather which oppresses us now, were fined \$100 each, as no licenses had been granted them.

An individual who had refused to have his chim-ney swept was and sent to jail for con-tempt of court, having conducted himsen many erly before his Honor.

A SPARKLING VISITOR.—Our sauctum was er ivened yesterday by the presence of an old and valued friend, a lineal descendant of Dr. Heidsick, whose jovial countenance made us forget the lapse of time. But we remembered that time is fleeting, and our guest was soon decapitated, and while we quaffed the sparkling beverage we thought of the donor and drank long life and continued prosperity to the Southern Express Company. While hey express such packages as those us their popularity can never fail, and the greates harm we wish them is that they may never inhalge in a better beverage than the green seal broache

"MoonLight on the Sea."-The streets, las right, leading to the Battery were as lively as we remember over to have seen them. What with the heat of the city, the inviting sea breezes, the music and the moonlight, few could resist the emptation of a pilgrimage to White Point Garden. The cars were as crowded as we have eve thousands. The ovening was delightful, and the jingling of the street car bells, carrying the midsummer night's promenaders, were tantalizing to the last degree to our unfortunate selves, doomed to write of gentle zephyra and cool, refreshing breezes in a hot room, under a heavy head of gas, with scarcely a breath of air. Such are the mise-

THRIPT AMONG THE FREEDMEN.-The National Freedman's Saving and Trust Company have branches in nearly every Southern city, and through their means the freedmen have been induced to lay by a portion of their hard earning for some probable rainy day. It was thought at one time that it would be impossible for the freeden to economize, and their money would be spon in frivolities, but this has proved to be an unfound ed prognostication, and everywhere the same gra-tifying result is obtained. As an evidence of the thrift and economy now visible among this class coor population, we give the following control of the freedman's Saving and Trust Company, in two feecks, three hundred and one deposits have been received, about half of which were from children and young persons.

The deposits were many outry persons.

The deposits were many of them of small amounts, but reached \$4689.94.

The colored population is about ten thousand.

The deposits at the branch in this city in June amounted to \$27,864.94, and the excess of deposits ver drafts was \$8141.36.

These Savings Banks are intended for the us

of the freedmen, but none are excluded from the benefits to be derived from depositing their money in them. Their rules are liberal, and they offer inducements that cannot be surpassed. But the statements we have given show that the popularity of the institution is well founded.

Sr. Sternen's Fain,-The Hibernian Hall was again the centre of an admiring crowd last night. The cars brought many persons from the upper wards, and the sweet strains of music attracted others. The ladies who have charge of the table have arranged them with unusual taste, and the floral devorations which surmount and surround the different stands, at once attract the attention All of the requisites of a , oll ordered fair are to be seen; in one corner of the Hall is a fine marble soda fount, presided over by an urbane and seering to see our young men thus devote a little and the little sprites who have charge of this de the side of the hall, and are presided over by divinities whose every wish proves a law, and from whose appeal to purchase there can be no with-drawal. Near the door is a table devoted to conchology, and is alone worth a visit to the Fair the shells and shell work being both rare and curious. In a word, St. Stephen's Fair is an undoubted success, and as the ladies who have charge of the undertaking have only established a moderate entrance price, we trust that they will meet with that recompense their cause and their

GENERAL SICKLES' LETTER TO SENATOR TRUM-Sir: I have decided not to begin registration in this District, until Congress determines who shall be registered. I trust, therefore, that it will be the players of the state of the state of the state of the players of the state of the the pleasure of Congress to extend the time for the completion of my registration, until—say, Oc-tober or November. If I proceed now, and disregard the wishes of the President, my action would be regarded as insubordination; if I follow his in-timations, many would probably be registered not aligible according to the true interpretation of the

Acts of Congress If it is meant that all who have held any office-Federal, State, or nunicipal—having taken an oath of office to support the Constitution of the United States, and afterwards engaged in rebellion, or given aid and comfort, etc., are disfranchise this should be expressly declared, otherwise, if left to construction, it may be held that no other officers are included than those classes enumerat-ed in Article VI. of the Constitution, and that even as to these, a full parden removes the disqualifi-

expressly mentioned, or else described by some classification; as for example, after the word "office," add "any licensed calling or employment or profession." Otherwise, if the eligibility of awyors be left to construction, it may be held that a lawyer is not a public officer, although a func-tionary of a court or other judicial body.

The truth is, we have now in operation two dis-tinct systems of reconstruction, originated by Congress, and ongrafted upon the President's plan of reconstruction. The first Congressional plan is expressed in the Howand Constitutional Amend-ment, leaving suffrage to be regulated by the several States, and imposing upon certain classes of persons disqualification for office, as a punishment for rebollion and as a safeguard for the future. That plan having been refused by the rebel State Congress passed the Reconstruction Acts, which form a second scheme of reconstruction, entirely listinct in principle and plan from the former. 1 the second plan, Congress assumes control of the question of suffrage, which is extended to all who can take a prescribed eath, and also enforces the disqualification for case, which would have been the penal and conservative feature of the first plan. Now, it seems to me that the true conservative guarantee against reaction is in the addition made to the loyal vote by the enfranchisement of the colored people. That being done, the occasion for the disqualification clause ceases. Hence, the true solution, I believe, is to declare, with universal suffrage, a general amnesty-naming the excep-tions. A more liberal amnesty is, in my judgment, essential to the success of the Congressional plan of reconstruction. It will enlarge the range of popu-lar choice for the important judicial, executive, and logislative departments of the State governments, logistative departments of the State governments, otherwise inconveniently confined to classes very few of whom are tit to hold office. The people can surely be entitled to judge and select from those who took part in the reboilion, the men at once qualified and sincere in their adhesion to the new order of things. Such men, being eligible to office, will have motives to identify themselves with reconstruction, and to support the views of the majority. Now, more than ever, e.e. of children. jority. Now, more than over, n en of ability and ex-perionce in public business are needed for the State governments in the South; and it is truly unfortunate that at such a morent, nearly all who know anything of public affairs, and especially those who could fill judicial stations, are disfranchised. This exposes the experiment of general suffrage to needless hazards. If the experiment fail, it is most likely to fail from the inability of the propole to put to other. the people to put in office those who could and would assure success. It would have been advan-tageous perhaps, to have removed many disaffect-

tion required.

LITTLE GLAST HORSE POWER THE LITTLE GIANT. THE BEST, MOST COMPLETE AND CHEAPES

In introducing this new Power into the market, we would state that the following are some of the advantages possessed by the "LITTLY CIANT" over all other Horse powers:

1. Ingress strength on account of being double-peared, which not only doubles the strength by dividing the strain on twee the number of feeth, but by gearing on both sides of the wheels it equalizes the weather on the shalts, and materially lessens the relicion, cambling the horses to do much more work than with any other Power.

Fower,

2. Its compactness and extreme portability, it weighing
about one-half as much as other Horse Powers, and occuboves, thus saving much expectable, and he needs to bove, thus saving much expectable, and he needs the most promiting it for the most promiting the most promiting it from its foundation, will be appreciated by femorys and planters as specially adapted for driving Cotton than.
